Rainy Season:

Guyana Kirk Smock, 2008 South America's often overlooked English speaking country lies far off the well trodden tourist path. Guyana is the ideal destination for the discerning visitor seeking adventure. Within its vast interior the Guiana Shield, one of the four pristine tropical rainforests left in the world, converges with the Amazon Basin, creating a unique geography composed of coastal waters, mangroves, marshes, savannas, mountains, and tropical rainforests. Bordered by Venezuela, Brazil, Suriname, and the Atlantic Ocean, the lively locals, a melting pot of East Indian and African descendants peppered with Chinese, Europeans, and Amerindians, create a culture decidedly more Caribbean than Latin.

Buddhist Monastic Life Môhan Wijayaratna, 1990-11-30 This 1991 book provides a brief yet detailed account of the ideal way of life prescribed for Buddhist monks and nuns in the Pali texts of the Theravada school of Buddhism The author describes the way in which the Buddha s disciples institutionalized his teachings about such things as food dress money chastity solitude and discipleship This tradition represents an ideal of religious life that has been followed in South and Southeast Asia for over two thousand years In previous writing on the early period of Buddhist monasticism scholars have usually tried to give an historical account of the evolution of the monastic order and so have seen the extant Vinaya texts as coming from distinct historical periods This book takes a different approach by presenting a synchronic account which allows the author to show that sources are in fact predominantly consistent and coherent

Religion at Work in Globalised Traditions Anders Kaliff,2014-03-26 Why do traditions disappear How is the disappearance of tradition also a vehicle for social change and re inventions of practices and new traditions Using case studies from one Sukuma area along the southern shores of Lake Victoria in Tanzania global processes of how religions work in practice are analysed by focusing on rainmaking witchcraft and Christianity Traditionally Sukuma society was culturally and cosmologically structured around the chief the ancestors and rainmaking Everything was dependent upon the rain Rainmaking as a ritual practice has disappeared and ancestral propitiations are declining while at the same time Christianity is spreading and witchcraft and witch killings are increasing Although Christianity as a religion may provide answers and hopes for life after death the religion provides few solutions in the here and now when it comes to poverty and suffering problems and challenges that have to be solved Witchcraft on the other hand does or is believed to do so and the increase in witchcraft is analysed in relation to the impacts of more than a century of globalisation from the missionaries and colonizers onwards With the declining ancestral tradition witchcraft and Christianity as religious practices supplement each other in the ways they are believed to work in providing answers solutions or divine interferences in different realms this world and the Otherworld Offering an approach going beyond structural functionalism on different premises the book's focus on religion at work will facilitate new understandings of how to study religion as it is perceived and believed in practice **Vegetable**

Monsoons over China Ding Yihui,2013-03-09 The monsoon over China is one of the major components of the general circulation on a global basis Its activity bears a significant regional implication in East Asia and Southeast Asia Recently the remarkable relationship and teleconnection between this part of the monsoon and other regions over the world have been revealed However little of the overall picture of monsoons over China is known by meteorologists in English speaking countries This monograph provides the first opportunity to extensively introduce this subject and give a comprehensive and systematic description of the major aspects of monsoons over China with a special emphasis on the fluctuations of the monsoon on various scales and the effects of the Tibetan Plateau on the monsoon Much highly original material and achievements Chinese and Western meteorologists have made from the past 20 years have been incorporated with a unifying approach In each chapter the observational and theoretical including modelling treatment will be closely

combined in order to fully illustrate the relevant problems. The unique thermal and dynamical effects of the Tibetan Plateau on the monsoon circulation features which are one of the central problems of the Asian monsoon are highlights of this monograph. Researchers in meteorology and weather forecasters should find this book a very useful introduction to monsoons over China not only for its systematic treatment of the subject but also because of its considerable historical information. This monograph is equally suitable for graduates or more advanced students in meteorology, hydrology and oceanography. *The Adaptation to and Mitigation of Climate-Sensitive Natural Hazards* Diandong Ren, Gen Li, Mervyn Lynch, Anning Huang, Bo Lu, 2022-11-29 **Conflict and Sustainability in a Changing Environment** Gwendolyn Smith, Elena P.

Bastidas, 2017-01-02 Using a case study of the Trio indigenous peoples in Suriname *Conflict and Sustainability in a Changing Environment* presents an inside view of a community facing climate change and on the path toward sustainable development. Smith and Bastidas take the reader beyond an examination of examples from the field of practice and into a thorough case study on climate change. With more than ten years of field experience, Smith and Bastidas present an in-depth bottom-up analysis of sustainable development including tools for practitioners, insight for academics and advice to policymakers.

Human and Social Dimensions of Climate Change Netra Chhetri, 2012-11-14 Anomalous climatic outcomes such as higher temperatures, intense rainfall and flood, frequent and severe droughts are now at the new level. Without appropriate adaptation measures, climate change is bound to exacerbate vulnerability of society, place food security and human health at risk, threaten the lives of growing urban population and impede the goal of attaining sustainable development. The human and social dimensions of climate change, including climate policy, are essential parts of our response to the many challenges emanating from climate change. By focusing on a wide range of topics and involving a diverse array of scholars, this book sheds light on human and social dimensions of climate change topics neglected and often poorly understood by scholars and policymakers. CLIMATE CHANGE AND AGRICULTURE OVER INDIA G.S.L.H.V. PRASADA, V.U.M. RAO, G.G.S.N.

RAO, 2010-04-17 Global warming has led to climate change which in turn has led to frequent occurrence of floods, droughts and cold and heat waves affecting the productivity of food grain in a large measure. This book studies the effects of regional climate change on the agriculture sector in different states of India. The book also discusses the impact of global warming on the agriculture sector across the world and describes in particular how climate change variability is affecting rainfall, temperature and land in various states of India. It also suggests adaptation techniques which can be evolved to neutralize the adverse effects of climate change. Besides the text, it explains the need for weather risk management, agro-meteorological advisory services, weather insurance and the principles and practices of integrated watershed management through a consortium of approaches for mitigating the adverse impact of climate change in the semi-arid tropics. This book, with contributions from experts in the field and edited by academics who are authority on the subject, should prove to be extremely useful to undergraduate and postgraduate students of Agriculture, planners, policy makers and administrators.
