## **Renewing Urban Communities Environment Citizenship And Sustainability In Ireland Urban Planning A:**

*Renewing Urban Communities* Mark Scott, 2017-07-05 Ireland is now an urban society and both parts of the island have experienced rapid urban generated growth and new patterns of development in recent years This inter disciplinary book adopts an all Ireland perspective to investigate the tension that exists between sustainable urban development values and rhetoric such as increased densities brown field development the compact city and social inclusion and the emerging geography of urban Ireland influenced by consumer and lifestyle choices The introduction provides an overview of the dynamics of urban change particularly during the 1990s and the experience of rapid economic growth The following chapters are divided into two parts considering sustainable urban environments and sustainable communities This book will appeal to students academics policy and decision makers given that it adopts both a qualitative and quantitative approach and introduces a range of new empirical studies covering both physical and social sustainable development

**The Routledge Handbook of International Planning Education** Nancey Green Leigh, Steven P French, Subhrajit Guhathakurta, Bruce Stiftel, 2019-08-05 The Routledge Handbook of International Planning Education is the first comprehensive handbook with a unique focus on planning education Comparing approaches to the delivery of planning education by three major planning education accreditation bodies in the United States Australia and the United Kingdom and reflecting concerns from other national planning systems this handbook will help to meet the strong interest and need for understanding how planning education is developed and delivered in different international contexts The handbook is divided into five major sections including coverage of general planning knowledge planning skills traditional and emerging planning specializations and pedagogy An international cohort of contributors covers each subject s role in educating planners its theory and methods key literature contributions and course design Higher education s response to globalization has included growth in planning educational exchanges across international boundaries The Routledge Handbook of International Planning Education is an essential resource for planners and planning educators informing the dialogue on the mobility of planners educated under different national schema

*Housing Contemporary Ireland* Michelle Norris, Declan Redmond, 2007-03-11 This book the first comprehensive accessible review of housing in Ireland for many years introduces key housing developments and also reports on the findings of the latest research on the transformation of the sector in the past decade Topics include the impact of the house price boom on wealth and affordability the urban renewal schemes and private rented housing the management of social housing the accommodation of Travellers and homeless people rural housing policy and politics During the past decade Ireland s economic growth has attracted international attention This book analyses the consequences of that growth on housing and serves as a primer to other countries on the complexities of delivering sustainable housing solutions in the face of economic success As such this book will be of interest to students practitioners and policy makers involved in the housing field worldwide and to anyone who wishes to learn more about the causes and effects of Ireland s recent housing boom

**Beyond the Rural-Urban Divide** Kjell Andersson, Erland Eklund, Minna Lehtola, 2009-02-11 The rural urban dichotomy is one of the most influential figures of thought in history laying the foundation for academic disciplines such as rural and urban sociology The dichotomy rests on the assumption that rural and urban areas differ fundamentally This book deals with this topic

**Towards a Liveable and Sustainable Urban Environment** Liang Fook Lye, Gang Chen, 2010 1 Eco cities re examining concepts and approaches Hidefumi Imura 2 Let s get real critical visions and sustainable eco urbanism William S W Lim 3 Some thoughts on the development of eco cities in Asia Lye Liang Fook and Chen Gang 4 Building ecotopia critical reflections on eco city development in China Pow Choon Piew and Harvey Neo 5 Moving toward eco friendly city perspective on Thailand Rujiroj Anambutr 6 Challenges to implementing the eco city concept in Indonesia s major cities Suraya A Afiff 7 Eco city China s realities and challenges in urban planning and design Wang Tao and Shao Lei 8 Sustainable living an overview from the Malaysian perspective Hardev Kaur and Mizan Hitam 9 Prospects on ecological development in Philippine cities Marife M Ballesteros

**The Dublin-Belfast Development Corridor: Ireland's Mega-City Region?** John Yarwood, 2017-03-02 The aim of the Dublin Belfast Development Corridor is to link several towns and cities by various modes of communication in order to create a poly centric mega city region in Ireland on a scale large enough to compete with the major urban clusters of continental Europe This volume brings together an interdisciplinary team of leading scholars and practitioners from both sides of the border to discuss the Dublin Belfast corridor and the associated challenges of cross border development from economic geographic regional studies sociological and planning perspectives As well as providing insight into this important project the book also throws light on regional development more generally

*The New Spatial Planning* Graham Haughton, Philip Allmendinger, David Counsell, Geoff Vigar, 2009-12-04 Using a rich empirical resource base this book takes a critical look at recent practices to see whether the new spatial planning is having the kinds of impacts its advocates would wish Contributing to theoretical debates in planning state restructuring and governance it also outlines and critiques the contemporary practice of spatial planning

**Greening Affordable Housing** Abdullateef Olanrewaju, Zalina Shari, Zhonghua Gou, 2019-01-30 Books on green building theories principles and strategies applicable to life cycles of all kinds of buildings and building types are already widely available However those specifically on greening affordable housing that guide various housing stakeholders at different life cycles are still very limited This book intends to fill this gap Integrating green building enables stakeholders to address the environmental component that has not traditionally been seen as an integral part of affordable housing development The book presents theories and principles with practical methods strategies and processes not only to make affordable housing green but also to support economic stability and social equity

**Decentralization in Environmental Governance** Christian Zuidema, 2016-10-04 Decentralization in Environmental Governance is a critical reflection on the dangers and risks of governance renewal warning against one sided criticism on traditional command and control approaches to planning The book formulates the arguments that support when and how

governance renewable might be pursued but this attempt is not just meant for practitioners and scholars interested in governance renewal. It is also useful for those interested in the challenge of navigating a plural landscape of diverse planning approaches which are each rooted in contrasting theoretical and philosophical positions. The book develops a strategy for making argued choices between alternative planning approaches despite their theoretical and philosophical positions. It does so by revitalizing the idea that we can contingently relate alternative planning approaches to the circumstances encountered. It is an idea traced to contingency studies of the mid and late 20th century reinterpreted here within a planning landscape dominated by notions of uncertainty, complexity and socially constructed knowledge. This approach called Post contingency is both a theoretical investigation of arguments for navigating the theoretical plurality we face and an empirical study into renewing environmental governance. Next to its theoretical ambitions, *Decentralization in Environmental Governance* is practical in offering a constructive critique on current processes of governance renewal in European environmental governance.

*Parallel Patterns of Shrinking Cities and Urban Growth* Rocky Piro, 2016-05-06 Focussing particularly on urban fringe and rural areas, this book addresses the parallel phenomena of growth and decline. In doing so, it not only broadens a debate which generally concentrates on urban municipalities, especially inner city areas, but also covers new ground by starting to build a new theoretical framework for the spatial planning related assessment of these phenomena. Bringing together contributions from internationally renowned authors such as Sir Peter Hall, Steve Ward and Johannessen, the book compares international case studies and highlights their relationships with one another. It concludes by emphasizing common themes that are addressed as well as showing applicability to other urban and rural regions. Overall, the book provides a timely and comprehensive analysis of the spatial consequences and related spatial planning concepts in theory and practice which aim to further sustainable development of city regions, urban fringe and rural areas experiencing growth and decline.

**A Living Countryside?** Tony Varley, 2016-03-23 By examining a range of experiences from both the north and south of Ireland, this book asks what the ideal of sustainable development might mean to specific rural groups and how sustainable development goals have been pursued across the policy spectrum. It assesses the extent of commitment to a living countryside in Ireland and compares various opportunities and obstacles to the actual achievement of sustainable rural development. How different sectors of rural society will be challenged in terms of future survival provides an overarching theme throughout.

*Affluence, Mobility and Second Home Ownership* Chris Paris, 2010-10-04 Despite the current recession, the frequency of second home ownership is still surprisingly high throughout the western world. While the UK and Ireland previously had lower occurrences of multiple dwellings compared to the rest of Europe, they are quickly catching up with a current surge in the ownership of second homes. The recent MP expenses scandal in the UK has also drawn attention to the prevalence of second homes or more within the middle classes and the fact that the concept is becoming increasingly popular. Chris Paris uses this text to address the reasons behind why second homes are becoming more popular both within the usual

domicile of the individuals and in international locations The socioeconomic factors and historical contexts of homes in cultures across the world are fundamental to explaining the choices in transnational home ownership and Paris case studies and comparisons between additional homes in Europe Australia America and Asia expand upon the motivation for people to own a second home Affluence Mobility and Second Home Ownership draws together debates on gentrification globalisation consumerism environmental factors and investment to provide a balanced look at the pros and cons of second home ownership and what implications it has for the future An ideal text for students studying geography urbanism and planning this book is also of interest to individuals interested in the changing ways in which we make choices on our places of residence Neoliberal Urban Policy and the Transformation of the City A. MacLaren,S. Kelly,Andrew

MacLaran,2014-08-12 This book reviews the character and impacts of actually existing neoliberalism in Ireland It examines the property development boom and its legacy the impacts of neoliberal urban policy in reshaping the city public resistance to the new urban policy and highlights salient points to be drawn from the Irish experience of neoliberalism *Action on Poverty Today Issue 11 (Winter 2005)* ,

**Second Home Tourism in Europe** Zoran Roca,2016-04-01 Bringing together a wide range of studies from twelve European countries this book offers a state of the art overview of the driving forces behind spatial diversity and social complexity inherent in second home expansion in all parts of the continent from Scandinavia to the Mediterranean and from the British Isles to Russia in the context of contemporary mobility patterns largely induced by tourism As befits the overall conception of the book as a compendium of current second home research planning and policy issues the book endorses the following multidisciplinary approaches to the second home phenomenon as an expression of the leisure class mobility and recreation based lifestyles as well as a constitutive element of post productivist land use patterns and landscape change and socio economic and territorial development planning and policy related perspectives on social change and spatial re organization provoked by the expansion of second home tourism in times of prosperity and crisis This book shows that second home tourism has become such an important sector of the economy that it is no longer possible to let it develop freely it is the source of new forms of social deprivation it generates residential economies that are particularly sensitive to the economic cycle it often impairs beautiful landscapes and increases human pressure on natural environments As a result it is one of the major physical planning stakes of touristic areas From the concluding essay by Paul Claval

Universit de Paris I Sorbonne Paris France **Public History in Global Perspective** Georgina Laragy,Richard Legay,Ciaran O'Neill,Hannah K. Smyth,2025-07-21 Where should public history sit within the matrix of global international trans national and more local histories Since its emergence in the 1970s Public History has typically been read as community oriented and more local in its applications The academic field in particular has developed along national lines and indeed we see in the many monographs edited books and journals that have emerged a distinct tendency to consider public history as understandable mostly in its relation to the nation state and its attendant mythologies The meta narratives that public history

pushes against are the building blocks of national histories political military and heroic histories Conceiving of a global public history seems to have more radical potential than an international public history which arguably simply collects these national histories What would a global public history look like and how can it disrupt the field if interpreted radically This book will centre the work of scholars and professionals in the field of Public History It will offer novel reflections on postgraduate Public History learning work experience and application from recent graduates and partnered institutions A mix of theory and practice traditional and creative methodologies it demonstrates the value of integrating work experience practitioner workshops and close collaboration in Public History training     *'The Next Best Place'* Eric David Compas,2008

The British National Bibliography Arthur James Wells,2006     *Book Review Index* ,2006 Every 3rd issue is a quarterly cumulation     **Climate Change 2022 - Impacts, Adaptation and Vulnerability** Intergovernmental Panel on Climate Change (IPCC),2023-06-22 The Working Group II contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change IPCC provides a comprehensive assessment of the scientific literature relevant to climate change impacts adaptation and vulnerability The report recognizes the interactions of climate ecosystems and biodiversity and human societies and integrates across the natural ecological social and economic sciences It emphasizes how efforts in adaptation and in reducing greenhouse gas emissions can come together in a process called climate resilient development which enables a liveable future for biodiversity and humankind The IPCC is the leading body for assessing climate change science IPCC reports are produced in comprehensive objective and transparent ways ensuring they reflect the full range of views in the scientific literature Novel elements include focused topical assessments and an atlas presenting observed climate change impacts and future risks from global to regional scales Available as Open Access on Cambridge Core
