Reorient Global Economy In The Asian Age:

ReORIENT Andre Gunder Frank, 1998-07 Frank shows how Marx and Weber got it all wrong A fundamental rethinking of the rise of the West and the origin of the world system Absolutely essential to understanding world history Albert Bergesen University of Arizona The great virtue of this stimulating book is its relentless push to redefine our framework for thinking about the early modern economy A benchmark study R Bin Wong University of California Irvine ReOrient Andre Gunder Frank, 1998 Andre Gunder Frank asks us to ReORIENT our view away from Eurocentrism to see the West as a mere blip in what was and is again becoming an Asia centered world In a bold challenge to received historiography and social theory he turns on its head the world according to Marx Weber and other theorists including Polanyi Rostow Braudel and Wallerstein Frank explains the Rise of West from 1400 onwards in world economic and demographic terms with a sweeping historical perspective that places it in clear conjunction with Decline of the East around 1800 European states he says used the silver extracted from the American colonies to buy entry into an expanding Asian Market which already flourished in the global economy by means of the very productive commercial and institutional mechanisms that were supposedly unique to Europe Then as the East entered into a decline phase of the cyclical world economy the nations of West resorted to import substitution and export promotion in the world market to become New Industrializing Economics That is precisely what East Asia is doing today Frank points out to recover its traditional dominance in the world economy the center of which is once again moving to the Middle Kingdom of China Anyone interested in Asia economic and social history in international relations in political economy and in socio economic theory cannot afford to ignore Andre Gunder Frank s exciting reassessment of our global economic past and future

Reorienting the 19th Century Andre Gunder Frank, Robert A. Denemark, 2015-10-23 Andre Gunder Frank was a path breaking scholar in several disciplines over an illustrious and contentious 50 year career First amongst his many important works is the book *ReORIENT Global Economy in the Asian Age* which sought to correct a Euro centric world view of the development of the global political economy Frank passed away in April 2005 while working on this new book a sequel to *ReORIENT* In this book Frank shows many of the myths of European industrialisation hegemony and capitalism which have hidden the fact that Asia remained a serious power not just into the 18th century as Frank himself argued in 1998 but well into the 19th century as well When Frank passed away his colleagues rallied to finish this book and it is presented here as his final major statement

Global Nexus, The: Political Economies, Connectivity, And The Social Sciences

Wazir Jahan Karim,2019-08-27 The Global Nexus Political Economies Connectivity and the Social Sciences is a provocative critique of the social sciences in the age of neoconservative and alt right globalisation sweeping across modern democracies globally The writer persuasively argues that the mainstream western social science modality of describing indigenous knowledge and sub altern discourses as alternative knowledge is due for serious review for it describes devalues and renders it the same renegade status as the alternate realities of the alt right neo conservative agencies of Western and Asian governments The abuse of indigenous knowledge by neoconservative governments to promote racism ethno centricities and misogyny has also reduced vital sources of local knowledge to fodder only salvaged by the good press specialists of the media in investigative journalism communications and literature who propose that worldviews and ideas of the underclasses including women migrants minorities refugees war prisoners and refugees should be brought to the fore and mainstreamed for the reader to understand that the stories they tell and their reasons why tell them are closer to truth than fiction These lost voices often silenced suppressed and understated generate new knowledge of the marginalised and disadvantaged sectors of modern society reflecting the social realities of globalisation Focusing on Southeast Asia with comparisons across nations in the Levant and the Middle East Europe and the United States Wazir Jahan Karim vividly demonstrates how plural political economies have emerged and rendered flaws in the globalisation process As powerful elites compete to accumulate and control wealth power and vital global resources the growing phenomenon of global agencing wealth and poverty generating institutions exist together in complex networks of hierarchical relationships strategies and alliances with dire consequences for those on the receiving end of the global spectrum

An Economic History of Early Modern India

and material wellbeing in the region Using detailed studies of markets institutions rural and urban livelihoods and the standard of living it develops a new perspective on the history of eighteenth century India one that places business at the centre rather than the transition to colonial rule This book is the first systematic account of the economic history of early modern India and an essential reference for students and scholars of Economics and South Asian History **World Society in the Global Economic Crisis** Christian Suter, Mark Herkenrath, 2012 This volume examines the considerable economic social and political consequences of the present global crisis for world society It focuses on central issues including crisis impacts on world society structures crisis perceptions and public discourses and experience of global crisis at local and regional levels **The World-System as Unit of Analysis** Roberto Patricio Korzeniewicz, 2017-09-22 World system analyses have recast the study of between and within nation country inequality as constituent aspects of a single field of inquiry the study of inequality and social stratification as processes that always have been global in their very essence World system analyses maintain that global social stratification pivots around institutional arrangements that render distributional outcomes as simultaneously national gendered racialized and global processes This book takes stock of some of the enduring theoretical and empirical contributions of a world system perspective and identifies promising directions for future inquiry and discussion Some chapters reassess the scope and methodologies of world system analysis around several key problems e g the spatial and temporal boundaries of global commodity chains the construction and challenge of various dimensions of social inequality systemic and antisystemic social movements Others take stock of areas in which world systems are promoting methodological innovation and or generating useful global data and identify questions that demand additional methodological and empirical attention for future research In different ways this book help us to critically reconsider some of the enduring legacies within a world system perspective such as Karl Polanyi s concept of the double movement or the distinction drawn by Giovanni Arrighi or Immanuel Wallerstein between systemic and antisystemic movements As argued by many of the authors in this book a world historical approach calls for greater sensitivity to the manifold ways in which conceptual boundaries change over time and space Taking seriously the issue of unit of analysis this book explores critically productive ways for better understanding global patterns of continuity and change **What Is Global Studies?** Manfred Steger, Amentahru Wahlrab, 2016-11-10 What is Global Studies and how does it relate to globalization Responding to this frequently asked question Manfred B Steger and Amentahru Wahlrab provide the first comprehensive overview of this emerging field Authoritative and accessible this primer speaks to students and instructors interested not only in key theories but also in applied teaching and learning programs designed to educate global citizens to meet the concrete challenges of the twenty first century Linking the influential arguments of major thinkers in Global Studies to their own framework the authors discuss the Four Pillars of Global Studies globalization transdisciplinarity space and time and critical thinking The book with instructive appendix materials will appeal to readers seeking a deeper understanding of Global Studies one of the most

Reading the Global Sanjay Krishnan, 2007 The global is an instituted perspective not just an empirical process Adopted initially by the British in order to make sense of their polyglot territorial empire the global perspective served to make heterogeneous spaces and nonwhite subjects legible and in effect produced the regions it sought merely to describe The global was the dominant perspective from which the world was produced for representation and control It also set the terms within which subjectivity and history came to be imagined by colonizers and modern anticolonial nationalists In this book Sanjay Krishnan demonstrates how ideas of the global took root in eighteenth and nineteenth century descriptions of Southeast Asia Krishnan turns to the works of Adam Smith Thomas De Quincey Abdullah bin Abdul Kadir and Joseph Conrad four authors who discuss the Malay Archipelago during the rise and consolidation of the British Empire These works offer some of the most explicit and sophisticated discussions of the world as a single interconnected entity inducting their readers into comprehensive and objective descriptions of the world The perspective organizing these authors conception of the global the frame or code through which the world came into view is indebted to the material and discursive possibilities set in motion by European conquest The global therefore is not just a peculiar mode of thematization it is aligned to a conception of historical development unique to European colonial capitalism Krishnan troubles this dominant perspective Drawing on the poststructuralist and postcolonial approaches of Jacques Derrida Michel Foucault and Gayatri Chakravorty Spivak and challenging the recent historiography of empire and economic histories of globalization he elaborates a bold new approach to
