The Forensic Psychologist's Report Writing Guide Sarah Brown, Erica Bowen, David Prescott, 2017-05-08 The Forensic Psychologist's Reporting Writing Guide is the first book to provide both student trainees and practitioners with best practice guidance for one of the core skills of their role. Written and edited by an international range of experts from the UK, North America and Australasia, it provides clear advice on a range of assessments from psychometric tests to personality functioning and includes real life examples to illustrate key points. Uniquely, the book also offers guidance on the range of different client groups that forensic psychologists work with across both civil and legal contexts, including juveniles, female clients, couples and those with cognitive impairments. From core principles to writing style to key issues, each chapter also includes a checklist of advice and further reading. Comprehensive and practical, The Forensic Psychologist's Reporting Writing Guide is a user-friendly companion to this critical and often overlooked skill and will be essential reading for both neophyte and experienced forensic psychologists alike.

Writing and Reading Mental Health Records J. Frederick Reynolds, David C. Mair, Pamela C. Fischer, 2013-12-02 This revised and updated second edition is a rhetorical analysis of written communication in the mental health community. As such, it contributes to the growing body of research being done in rhetoric and composition studies on the nature of writing and reading in highly specialized professional discourse communities. Many compelling questions answered in this volume include: What ideological biases are reflected in the language the nurse/rhetorician uses to talk to and talk about the patient? How does language figure into the process of constructing meaning in this context? What social interactions with the patient, with other nurses, with physicians influence the nurse's attempt to construct meaning in this context? How do the readers of assessment construct their own meanings of the assessment? Based on an ongoing collaboration between composition studies specialists and mental health practitioners, this book presents research of value not only to writing scholars and teachers but also to professional clinicians, their teachers, and those who read mental health records in order to make critically important decisions. It can also be valuable as a model for other scholars to follow when conducting similar long-range studies of other writing-intensive professions.
