Repression And Dissociation:

Repression and Dissociation Jerome L. Singer, 1995-06 This book features contributions from twenty six leading experts that survey the theoretical historical methodological empirical and clinical aspects of repression and the repressive personality style from both psychoanalytic and cognitive psychological perspectives Rarely does a volume present contributions on a controversial topic from such distinguished clinicians and experimentalists There is something of interest in this volume for almost anyone involved in experimental cognitive psychology and psychiatry Carroll E Izard Contemporary Psychology The concept of repression is the cornerstone of psychoanalytic theory This is a delightful book unusually well written Recommended Choice Readable thorough wide ranging and consistently interesting A testament to the continuing power of psychodynamic ideas when faced with individual psychopathology Sue Llewelyn Psychologist Singer has brought together some of the best empirical research in the areas of unconscious mental activity and repression that is at once interdisciplinary and scholarly Howard D Lerner International Review of Psycho analysis A rich reference replete with summaries and citations covering a variety of topics related to the psychology of repression and dissociation A thoughtful detailed and eclectic discussion of the scientific and theoretical basis of repression and dissociation Steven Lazrove M D American Journal of Psychiatry Object Relations Therapy of Physical and Sexual Trauma Jill Savege Scharff, David E. Scharff, 2008 Rising above the polemics surrounding sexual and physical abuse David and Jill Savege Scharff bring a relational perspective to the integration of psychoanalytic and trauma theories in order to understand the effects of overwhelming physical and psychological trauma including sexual abuse injury and birth defect The Scharffs draw from their object relations therapy with individuals families and couples recovering from trauma and abundance of relevant clinical examples described in their characteristically personal and vivid style Their treatment approach influenced by Fairbairn Klein and Winnicott is respectful of the patient s experience They advise avoiding premature interpretations that impose their own reality on patients because this traumatizes them just as their abuser did In order to work well with these traumatized people the clinician must be able to tolerate ambiguity and sustain long term therapy for it takes the patience of waiting and wondering to recover deeply repressed memories explore them thoroughly and evaluate their meaning and importance for the patient The Scharffs demonstration of clinical processes helps therapists contain their own countertransference to trauma so as to be fully present with their clients and consistently able to confront abuse patterns in society The object relations approach not only deals with trauma s impact on the individual but views it in its cultural and interpersonal context as well Society alternately emphasizes and ignores trauma so that an encapsulated traumatic experience festers until the next eruption just as dissociative defenses segmentally protect and exaggerate traumatic experience in the individual case The Scharffs review Kramer s Mahlerian approach McDougall s insights into the silence of the psyche and the words of the soma and Anzieu s elaboration of the body ego They resuscitate Freud s seduction

hypothesis and the traumatic basis of the repetition compulsion They compare and contrast the concepts of re **Thought Suppression** Eric Rassin,2005-10-20 Is it possible to ban unwanted thoughts from consciousness According to the literature on thought suppression the answer is no In the 1980s Wegner and colleagues demonstrated that the average person cannot prevent a trivial thought like that of a polar bear from entering consciousness approximately seven times in a five minute period This experimental finding was followed by a substantial number of replications This book provides an up to date overview of the thought suppression literature First similarities and differences between suppression repression and dissociation are discussed Methodological issues are then considered Finally the clinical applications of the thought suppression literature are discussed Although there are numerous conditions to which the phenomenon of suppression can be applied obsession and traumatic recollection are the main applications In addition to offering an overview of the literature this book links the thought suppression paradigm to other research fields such as directed forgetting and repressive coping Furthermore it discusses the phenomenon of thought suppression in the light of broader theories such as the cognitive theory of obsession and the ego depletion hypothesis Clinical implications and directions for future research are offered

Introduction to Psychotherapy J. A. Hadfield,2015-08-11 First published in 1967 the original blurb reads This book is intended to give the intelligent lay reader a comprehensive view of the subject of psychotherapy the treatment of nervous disorders by mental means These disorders are of increasing importance on account of their wide spread nature and of the misery they produce It describes the development of psychotherapy as employed by the most primitive peoples and races through animal magnetism and hypnotism to the more modern analytical schools of Freud Jung and Adler It sets out in particular to give the positive contributions of these various systems although this does not preclude criticism of their weaknesses and more dubious theories Dr Hadfield has had the widest experience having treated psychoneurotic disorders for over fifty years including the war neuroses in the two world wars both in the Navy and in the Army and as Lecturer in the University of London in the subject for over forty years he has had the opportunity to systematize the knowledge thus obtained As a result of this experience he has come to conclusions as to the nature causes and treatment of such disorders differing somewhat from those of the established Schools and it is these findings which are given in the latter part of the book under the title Direct Reductive Analysis The book will be useful to all those teachers and parsons as well as medicals who have to deal with human beings and their aberrations and to them it is addressed **British Journal of Medical**

Psychology ,1921 Assessing and Treating Emotionally Inexpressive Men Ronald F. Levant,Shana Pryor,2024-07-30 What if your new client a man in his early 40s cannot answer basic questions in your initial assessment interview You were aware that many men do not like to talk about their feelings but this client seems kind of frozen You think he might be alexithymic but you do not know how to assess for that or even more importantly how to treat it Assessing and Treating Emotionally Inexpressive Men has answers Chapters explain why some men are emotionally inexpressive because of their childhood

socialization and the book provides both scales for assessing alexithymia in men and treatment manuals for helping these men become more emotionally self aware in individual and group therapy The book also offers case studies that explains how to integrate the authors approach with any model of psychotherapy Clinicians will come away from this book with a clear sense for how to treat alexithymia in the early sessions of psychotherapy and thereby improve treatment uptake and outcomes *Against Freud* Todd Dufresne,2007 *Against Freud* is a highly accessible informative and entertaining examination of Freud s controversial ideas and legacy by the world s most knowledgeable critics of psychoanalysis

Proceedings of the Society for Psychical Research Society for Psychical Research (Great Britain),1921 List of members in v 1 19 21 24 **The Fundamentals of Human Motivation** Leonard Thompson Troland,1928 *Diseases of the Nervous System* Smith Ely Jelliffe,William Alanson White,1919 *The Dissociative Mind* Elizabeth F. Howell,2013-05-13 Drawing on the pioneering work of Janet Freud Sullivan and Fairbairn and making extensive use of recent literature Elizabeth Howell develops a comprehensive model of the dissociative mind Dissociation for her suffuses everyday life it is a relationally structured survival strategy that arises out of the mind s need to allow interaction with frightening but still urgently needed others For therapists dissociated self states are among the everyday fare of clinical work and gain expression in dreams projective identifications and enactments Pathological dissociation on the other hand results when the psyche is overwhelmed by trauma and signals the collapse of relationality and an addictive clinging to dissociative solutions Howell examines the relationship of segregated models of attachment disorganized attachment mentalization and defensive exclusion to dissociative processes in general and to particular kinds of dissociative solutions Enactments are reframed as unconscious procedural ways of being with others that often result in segregated systems of attachment Clinical phenomena associated with splitting are assigned to a model of attachment based dissociation in which alternating dissociated self states develop along an axis of relational trauma Later chapters of the book examine dissociation in relation to pathological narcissism the creation and reproduction of gender and psychopathy Elegant in conception thoughtful in tone broad and deep in clinical applications Howell takes the reader from neurophysiology to attachment theory to the clinical remediation of trauma states to the reality of evil It provides a masterful overview of a literature that extends forward to the writings of Bromberg Stern Ryle and others The capstone of contemporary understandings of dissociation in relation to development and psychopathology *The Dissociative Mind* will be an adventure and an education for its many clinical readers *Psychological Therapy* Klaus Grawe,2004-06-01 The original edition of Klaus Grawe s book exploring the basis and need for a more generally valid concept of psychotherapy fueled a lively debate among psychotherapists and psychologists in German speaking areas Now available in English this book will help spread the concepts and the debate among a wider audience The book is written in dialog form A practicing therapist a research psychologist and a therapy researcher take part in three dialogs each of which builds on the results of the previous dialog The first dialog explores how therapeutic change takes

place while the second looks at how the mechanisms of action of psychotherapy can be understood in terms of basic psychological concepts Finally in the third dialog a psychological theory of psychotherapy is developed The practical implications of this are clearly shown in the form of case examples as well as guidance on indications and treatment planning The dialog ends with suggestions as to how therapy training and provision of psychotherapy could be improved on the basis of the model of psychotherapy that has been developed

The Journal of Neurology and Psychopathology ,1927
The Neurotic Personality Ronald Grey Gordon,1927
On Memory Doron Mendels,2007 The book consists of 16 case studies on issues relating to memory the majority of which stem from a conference in April 2005 at the Institute of Advanced Studies at the Hebrew University of Jerusalem Public memory is tackled from a variety of angles and various disciplines ranging across the humanities the social sciences and the exact sciences First and foremost the reader will obtain a comprehensive overview of the results of scholarship published in recent years about public memory Second the book provides a profound insight into how public memory works within societies of different nature and at different junctures of their histories The volume begins by offering a glimpse into individual memory and then goes on to discuss religious societies ethnic groups secular groups institutions and larger segments of society ultimately reaching the nation state The authors each in his or her own discipline have addressed the complexities involved in the creation of public memory the media that promote and preserve it within groups and societies and finally the nature of memory and how it behaves during changing circumstances and changing regimes
Psychoanalysis and the Time of Life Jan Campbell,2007-03-12 Is psychoanalysis a narrative of self knowledge or a movement of lived time and the body Psychoanalysis and the Time of Life examines the relationship between therapy and the time of life presenting an original and thought provoking re reading of psychoanalysis in relation to questions of lived time Jan Campbell investigates the early work of Freud Janet Breuer and Ferenczi linking their ideas to the philosophy of Bergson The link between psychoanalysis and the question of time connects these early debates with current issues that are central to our global society Questions considered include is the unconscious based on representation or affect is the Oedipal Complex hysterical how is therapy related to the time of our life what is the role of hypnosis in relation to psychoanalytic theory and transference Freud conceptualised the unconscious as timeless space but what would it mean to think of the unconscious as the very essence of psychic bodily time This book draws on the fields of traditional psychoanalysis philosophy neuroscience and trauma studies providing a valuable new perspective on familiar concepts such as identity and consciousness It will be of interest to students across the humanities and social sciences and practicing psychoanalysts and psychoanalytic psychotherapists
