## **Reproducing Families:**

**Reproducing Families** David Levine, 1987-08-27 A review of the course of English population history from 1066 to the 1980s with a particular focus on English family forms Reproducing Citizens: family, state and civil society Sasha Roseneil, Isabel Crowhurst, Ana Cristina Santos, Mariya Stoilova, 2017-10-02 Whilst the politics of reproduction have been at the heart of feminist struggles for over a century and a half their analysis has not yet come to occupy a central place in the interdisciplinary study of citizenship This volume takes up the challenge posed by Bryan Turner when he noted the absence of any systematic thinking about familial relations reproduction and citizenship 2008 and offers the first major global collection of work exploring this nexus of practices and political contestations The book brings together citizenship scholars from across Europe the Americas and Australia to develop feminist and queer analyses of the relationship between citizenship and reproduction and to explore the ways in which citizenship is reproduced Extending the foundational work of feminist political theorists and sociologists who have interrogated the public private dichotomy on which traditional civic republican and liberal understandings of citizenship rest the contributors examine the biological sexual and technological realities of natality and the social realities of the intimate intergenerational material and affective labour that are generative of citizens and that serve to reproduce membership of and belonging to states nations societies and thus of citizenship itself This book was published as a special issue of Citizenship Studies **Social Reproduction** Antonella Picchio, 1992-10-22

This book focuses on the relationship between the process of producing commodities and the process of social reproduction of the labouring population and seeks to restore that problematic relationship to the central place it had in the analysis of Smith Ricardo and Marx **Human Reproductive Decisions** R. I. M. Dunbar, 1995-04-12 Reproductive biologists evolutionary biologists demographers and social scientists all have a common interest in the business of human reproduction Their perspectives however are very different and have traditionally prevented them from having much to do with each other The conference on which this book is based brought together contributors from each of these disciplines in an attempt to explore the common ground that they share and so generate a better understanding of the factors that influence human fertility **Oil Palm Breeding** Aik Chin Soh, Sean Mayes, Jeremy A. Roberts, 2017-08-14

The oil palm is a remarkable crop producing around 40% of the world's vegetable oil from around 6% of the land devoted to oil crops Conventional breeding has clearly been the major focus of genetic improvement in this crop A mix of improved agronomy and management coupled with breeding selection have quadrupled the oil yield of the crop since breeding began in earnest in the 1920s However as for all perennial crops with long breeding cycles oil palm faces immense challenges in the coming years with increased pressure from population growth climate change and the need to develop environmentally sustainable oil palm plantations In Oil Palm Breeding Genetics and Genomics world leading organizations and individuals who have been at the forefront of developments in this crop provide their insights and experiences of oil palm research while examining the different

challenges that face the future of the oil palm The editors have all been involved in research and breeding of oil palm for many years and use their knowledge of the crop and their disciplinary expertise to provide context and to introduce the different research topics covered     Reproduction, Sexuality, and the Family Karen J. Maschke,1997 This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare s A Comedy of Errors Miola s edited work also features a comprehensive critical history coupled with a full bibliography and photographs of major productions of the play from around the world In the collection there are five previously unpublished essays The topics covered in these new essays are women in the play the play s debt to contemporary theater its critical and performance histories in Germany and Japan the metrical variety of the play and the distinctly modern perspective on the play as containing dark and disturbing elements To compliment these new essays the collection features significant scholarship and commentary on The Comedy of Errors that is published in obscure and difficulty accessible journals newspapers and other sources This collection brings together these essays for the first time     American Families Stephanie Coontz,2013-01-11 In the past forty years American families have become more racially and ethnically diverse than ever before Different family forms and living arrangements have also multiplied with single parent families cohabiting couples with children divorced couples with children stepfamilies and newly visible same sex families During the same period socioeconomic inequality among families has risen to levels not seen since the 1920s This second edition of American Families offers several benefits clear conceptual focus new attention to the historical origins of contemporary family diversity well chosen essays by leading names from across the curriculum explores the interactions between race ethnicity class gender and sexuality in shaping family life cCompletely updated and expanded bibliography of related sources new companion website with student and instructor resources to enhance learning Leading off with a comprehensive and teachable introduction to the topic this completely updated revised and expanded second edition of Stephanie Coontz s classic collection American Families remains the best resource available on family diversity in America For additional information and classroom resources please visit the American Families companion website at [www.routledge.com/textbooks/9780415958219](http://www.routledge.com/textbooks/9780415958219)     **De Gruyter Handbook of Business Families** Michael Carney,Marleen Dieleman,2023-01-30 The management field increasingly recognizes that most firms in the world are family firms and that these entities operate differently from the non family firms on which most of our current management theories are based The De Gruyter Handbook of Business Families brings together work from leading academics who explore emerging research themes relevant to business families particularly drawing in new insights from adjacent disciplines that can advance the family business field The handbook challenges the traditional notion of the single firm single family that has characterized most early research on family business Recognizing that families may simultaneously own or control multiple businesses as well as substantial wealth beyond these firms in the form of financial and non financial assets this handbook focuses on business families rather than the narrower construct of family business

The contributions in this handbook explore the relatively neglected dynamics between individuals with family ties that shape the interaction between family and business business families with multiple businesses how business families adopt formal rules and processes around their joint activities and the institutionalization of wealth and business families in society The De Gruyter Handbook of Business Families fills a gap in the family business research literature and is an essential reference work for researchers and graduate level students in the area of business families

**Limited Livelihoods** Sonya O. Rose, 2003-09-02 Integrating analytical tools from feminist theory cultural studies and sociology to illuminate detailed historical evidence Sonya Rose argues that gender was a central organizing principle of the nineteenth century industrial transformation in England She elaborates a cultural theory of gender that suggests why it is an inherent aspect of all social and economic relations Analysing employer strategies and state policies and the role of work in family life she demonstrates that neither industrial transformation nor class relations can be understood when reduced to gender neutral and abstract forces

**The Family and Family Relationships, 1500-1900** Rosemary O'Day, 1994-10-26 While historians have written with ease about the state and the church the family has so far defied historical analysis As the primary cell of human social organisation upon which both state and church depend it is of crucial

**Surrogacy and the Reproduction of Normative Family on TV** Lulu Le Vay,2019-05-23 This book examines the proliferation of surrogacy storylines on TV exploring themes of infertility motherhood parenting and family It investigates how despite reproductive technologies ability to flex contours of family the shows narratives work to uphold the white heterosexual genetically reproduced family as the ideal In dialogue with responses from a range of female viewers both mothers and non mothers the book scrutinises the construction of family ideology on television with studies including Coronation Street 1960 present Giuliana is homosexuality only acceptable when it echoes heterosexual norms Are female characters only fulfilled when they are genetic mothers Does heterosexual romance override technology in the cure for infertility While the answers to these questions may suggest that television still conforms to heteronormative narratives this book importantly demonstrates that audiences desire alternative happy endings that show infertile female characters more positively and recognise alternative kinship formations as meaningful

**Conceiving Cuba** Elise Andaya,2014-05-30 After Cuba s 1959 revolution the Castro government sought to instill a new social order Hoping to achieve a new and egalitarian society the state invested in policies designed to promote the well being of women and children Yet once the Soviet Union fell and Cuba s economic troubles worsened these programs began to collapse with serious results for Cuban families Conceiving Cuba offers an intimate look at how with the island s political and economic future in question reproduction has become the subject of heated public debates and agonizing private decisions Drawing from several years of first hand observations and interviews anthropologist Elise Andaya takes us inside Cuba s households and medical systems Along the way she introduces us to the women who wrestle with the difficult question of whether they can afford a child as well as the doctors who with only meager resources at their disposal struggle to balance the needs of their patients with the mandates of the state Andaya s groundbreaking research considers not only how socialist policies have profoundly affected the ways Cuban families imagine the future but also how the current crisis in reproduction has deeply influenced ordinary Cubans views on socialism and the future of the revolution Casting a sympathetic eye upon a troubled state Conceiving Cuba gives new life to the notion that the personal is always political

**Reproduction and Biopolitics** Silvia De Zordo,Milena Marchesi,2016-02-05 The central theme of this volume is the notion of irrational reproduction the ways in which women s and couples reproductive choices and practices are deemed irrational or irresponsible because they result in the wrong number of children In a global context of declining fertility population policies have shifted to a neoliberal register which despite local differences includes both the deepening of

economic and social inequalities and the intensification of rights discourses applied to the unborn Inspired by Foucault's theories on biopolitics and biopower and by a long tradition of feminist anthropological studies on reproduction the ethnographically based papers collected in this volume address the following crucial questions How does the notion of irrational reproduction emerge and play out in diverse socio political contexts and what forms of subjectivities and resistance does it generate How does the threat of too few or too many children itself constructed through expert knowledge of statistics and political concerns over the size of different ethnic populations or classes justify and support different biopolitical projects And how do the increasing privatization of healthcare and the dismantling of welfare states affect reproductive practices and decisions on the ground in the global North and South This book was originally published as a special issue of *Anthropology and Medicine*
