Reproduction Technology And Rights:

Reproduction, Technology, and Rights James M. Humber, Robert F. Almeder, 1996-01-01 In *Reproduction Technology and Rights* philosophers and ethicists debate the central moral issues and problems raised by today's revolution in reproductive technology. Leading issues discussed include the ethics of paternal obligations to children, the place of in vitro fertilization in the allocation of health care resources, and the ethical implications of such new technologies as blastomere separation and cloning. Also considered are how parents and society should respond to knowledge gained from prenatal testing and whether or not the right to abort should relieve men of the duty to support unwanted children. *Reproduction Technology and Rights* illuminates the moral and ethical choices that our society faces because of advances in reproductive technology and helps to make those decisions better informed.

Assisted Reproductive Technology Charles P. Kindregan, Maureen McBrien, 2006 As more people turn to assisted reproduction, the legal issues surrounding it have become increasingly complex. Beyond representing patients or clinics, numerous legal problems are arising from the technology's application. Disputes in divorce are the most common, but this technology impacts the law in other areas including personal injury, insurance, criminal law, and estate planning. Drawing from multiple legal sources, this book presents complex information in a direct, balanced, and fair manner. It includes a glossary, sample forms, and checklists, and a bibliography.

Human Reproductive Technologies and the Law Great Britain. Parliament. House of Commons. Science and Technology Committee, 2005 Approximately 1% of births in the UK were conceived using IVF. At present, IVF and embryo research are controlled by the Human Fertilisation and Embryology Authority, which was formed by a 1990 Act. Since then, scientific progress has been rapid, and the Department of Health has announced a review of that Act. This extensive inquiry will inform that review. It covers regulation of assisted reproduction, problems with the HFE Act, the operation of the Act, provision of infertility services, review of the Act, legislative and regulatory models. It makes recommendations on issues such as choosing the sex of babies, the need for a separate review of abortion, the regulatory bodies required, and a legislative framework that balances the freedom of the individual with the interests of the state, so that any intervention has a sound ethical base.

The Regulation of Assisted Reproductive Technologies in Europe Erich

Griessler, Lenka Slepíčková, Heleen Weyers, Florian Winkler, Nicolle Zeegers, 2022-05-12 This book explores the social ethical and legal implications of assisted reproductive technologies ART Providing a comparative analysis of several European countries the authors evaluate the varied approaches to the application of ART throughout Europe From a global perspective countries take very different approaches to the regulation of ART Countries apply restrictions to the access criteria for these treatments and or direct restrictions to the practice of the techniques themselves To understand these varied approaches to ART practice and regulation it is necessary to understand the societal and political background from which they emerged This book therefore consists of case studies from eight European countries which provide insights into the status and development of the regulation of ART in the last 40 years The country cases from all over Europe and the three comparative chapters provide insights into the diversity of current ART regulation across the continent as well as into similarities differences and trends in this regulatory area This book will be of interest to practitioners of ART who are interested in understanding the differences in regulation of ART in Europe as well as long term trends in this respect Given the ethical and legal implications the book explores it will also be of interest to students or researchers in the fields of social sciences humanities and law

New Reproductive Technologies and Disembodiment Carla Lam, 2016-04-22 With attention to the ways in which new reproductive technologies facilitate the gradual disembodiment of reproduction this book reveals the paradox of women s reproductive experience in patriarchal cultures as being both and often simultaneously empowering and disempowering A rich exploration of birth appropriation in the West New Reproductive Technologies and Disembodiment investigates the assimilation of women s embodied power into patriarchal systems of symbolism culture and politics through the inversion of women s and men s reproductive roles Contending that new reproductive technologies represent another world historical moment both in their forging of novel social relations and material processes of reproduction and their manner of disembodiment women in unprecedented ways a disembodiment

evident in recent visual and literary popular and academic texts this volume locates the roots of this disembodiment in western political discourse A call to feminist political theory to re remember the material dimensions of bodies and their philosophical significance New Reproductive Technologies and Disembodiment will appeal to scholars of sociology gender studies political and social theory and the study of science technology and health

Reproductive Technology and Surrogacy Salvör Nordal,Hrafn Ásgeirsson,2015 During the past few years reproductive technology and surrogacy have emerged in a number of European countries as issues of debate There has been a steady increase in the use of reproductive technology in the Nordic countries as well as an increase in the use of cross border medical treatment in order to achieve pregnancy At the same time a number of ethical issues have been raised concerning the rights of the participants including the children In the fall of 2013 the Nordic Committee on Bioethics organised a conference in Reykjavik that focused on the current situation in the Nordic countries and on the global aspects of reproductive technology and surrogacy including the market that is emerging in this field This conference summary highlights the main ethical issues facing researchers policymakers and practitioners who deal with these issues

Issues in Reproductive Technology Helen B. Holmes,1994-08 A remarkable collection of scholarly essays philosophical discussions and ethical arguments concerning reproductive choices Choice It seems as if every week there is a new case involving reproductive technologies that raises provocative often painful questions What policies should be followed by centers that preserve human embryos Are such innovations as Norplant improvements over established methods of contraception Should RU 486 be available in the U S Is prenatal diagnosis an ethically acceptable step to limiting the number of disabled people These are just some of the vital questions explored in this timely work which offers incisive analysis of the plethora of issues raised by advances in reproductive medicine The book s major section cover abortion contraception cryopreservation of gametes and embryos surrogate motherhood and psychosocial issues of in vitro fertilization In each section introductory essays by recognized authorities such as Elizabeth Bartholet and Andrea L Bonnicksen are followed by critical articles by professionals in such fields as women s health medicine biology sociology politics and philosophy In assessing a technology the authors present well argued analyses of problems created by that technology including views from advocates and practitioners that raise attendant ethical and practical issues

Women's Right to Reproductive Self-Determination from the Perspective of Civil Law Weijun Jiang,2022-08-12 This book explores the issue of abortion and women s rights in contemporary China With a vast population China s government has pursued controversial policies such as the One Child Policy in the past Today a rapidly urbanizing society is aging quickly and the policies are loosening but what are the implications for Chinese women and how do policies compare to those in the West In this groundbreaking book Dr Jiang elucidates the Chinese legal and social history of abortion for the first time in English This book will be of interest to lawyers NGO researchers feminists and academics

Regulating Assisted Reproductive Technologies Amel Alghrani,2018-11-22 Examines emerging assisted reproductive technologies that

will revolutionise the future of human reproduction and their regulation Alternative Reproductive Technologies United States. Congress. House.
