Republic of Tunisia, 1995 Tunisia's Economic Development Mustapha K. Nabli, Jeffrey B. Nugent, 2022-09-16 This book identifies the differences in growth and development and the various factors lying behind them across both Middle East and North African MENA and East Asian countries over the 1960 2020 period It considers a very wide range of factors compares initial situations institutions and government policies the dynamic responses to changing circumstances and discusses the inability of the governments of the MENA region to achieve not only political reform but also the kinds of economic reform that would allow their citizens to prosper in an increasingly globalized world The book focuses on Tunisia Since its independence in 1956 until 2010 Tunisia had considerable success relative to many other MENA countries but was somewhat less successful relative to East Asian countries Since 2010 however while transitioning away from autocracy to democracy it has been in rather serious economic decline The book highlights how both the factors identified as enabling Tunisia's initial success and those leading to its subsequent decline can provide many useful insights for improving the management of economic development across the whole MENA region and perhaps also to developing countries throughout the world

Lawmaking under Pressure Giovanni Mantilla, 2020-12-15 In *Lawmaking under Pressure* Giovanni Mantilla analyzes the origins and development of the international humanitarian treaty rules that now exist to regulate internal armed conflict Until well into the twentieth century states allowed atrocious violence as an acceptable product of internal conflict Why have states created international laws to control internal armed conflict Why did states compromise their national security by accepting these international humanitarian constraints Why did they create these rules at improbable moments as European empires cracked freedom fighters emerged and fears of communist rebellion spread Mantilla explores the global politics and diplomatic dynamics that led to the creation of such laws in 1949 and in the 1970s By the 1949 Diplomatic Conference that revised the Geneva Conventions most countries supported legislation committing states and rebels to humane principles of wartime behavior and to the avoidance of abhorrent atrocities including torture and the murder of non combatants However for decades states had long refused to codify similar regulations concerning violence within their own borders Diplomatic conferences in Geneva twice channeled humanitarian attitudes alongside Cold War and decolonization politics even compelling reluctant European empires Britain and France to accept them *Lawmaking under Pressure* documents the tense politics behind the making of humanitarian laws that have become touchstones of the contemporary international normative order Mantilla not only explains the pressures that resulted in constraints on national

sovereignty but also uncovers the fascinating international politics of shame status and hypocrisy that helped to produce the humanitarian rules now governing internal conflict Treaties in Force United States.
