Next, said I, compare our nature in respect of education and its lack 514  
 to such an experience as this. Picture men dwelling in a sort of sub-  
 terranean cavern with a long entrance open to the light on its entire  
 width. Conceive them as having their legs and necks fettered from  
 childhood, so that they remain in the same spot, able to look forward  
 only, and prevented by the fetters from turning their heads. Picture b  
 further the light from a fire burning higher up and at a distance be-  
 hind them, and between the fire and the prisoners and above them a  
 road along which a low wall has been built, as the exhibitors of pup-  
 pet shows have partitions before the men themselves, above which  
 they show the puppets.

All that I see, he said.

See also, then, men carrying past the wall implements of all  
 kinds that rise above the wall, and human images and shapes of ani- c  
 mals as well, wrought in stone and wood and every material, some of 515  
 these bearers presumably speaking and others silent.

A strange image you speak of, he said, and strange prisoners.

Like to us, I said. For, to begin with, tell me do you think that  
 these men would have seen anything of themselves or of one another  
 except the shadows cast from the fire on the wall of the cave that  
 fronted them?

How could they, he said, if they were compelled to hold their b  
 heads unmoved through life?

And again, would not the same be true of the objects carried past  
 them?

Surely.

If then they were able to talk to one another, do you not think  
 that they would suppose that in naming the things that they saw they  
 were naming the passing objects?

Necessarily.

And if their prison had an echo from the wall opposite them,  
 when one of the passers-by uttered a sound, do you think that they

### **Old Testament Conceptual Metaphors and the Christology of Luke's Gospel** Gregory R. Lanier, 2018-08-23

Extensive scholarship has been devoted to Jesus depiction in the Gospels and how such depiction is influenced by the Old Testament Gregory R Lanier presents a newcase for the importance of conceptual metaphor arguing that the Gospel of Luke employs certain metaphors reflected in Israel s traditions such as horn of salvation dawn from on high mother bird gathering Jerusalem s children and crushing stone in order to portray the identity of Jesus as both an agent of salvation and more provocatively the one God of Israel Setting his argument at the intersection of three sub fields of New Testament scholarship early Christology the use of Israel s Scriptures in the New Testament and contemporary metaphor theory Lanier suggests ways to overcome the low high binary and perceive the Gospel s Christology as multi faceted Applying metaphor theory to the influence of the Old Testament metaphors on Luke s Christology Lanier adds methodological rigor to the tracing of such influences in cases where standard criteria for quotations and allusions echoes are stretched thin *Christian Grace and Pagan Virtue* J. Warren Smith, 2011-01-27 Warren Smith examines the neglected biblical liturgical and theological foundations of Ambrose s thought on ethics Earlier studies have found little that was distinctively Christian in Ambrose s image of the virtuous person Smith shows that although like the pagans he emphasized moderation courage justice and prudence for Ambrose these characteristics were shaped by the church s beliefs about God s salvific economy *Aristotle's Voice* Jasper Neel, 2013-11-14 In this book Jasper Neel s sure to be controversial resituating of Aristotle centers around three questions that have been constants in his twenty two years of teaching experience What does it mean to teach writing What should one know before teaching writing And if there is such a thing as research in the teaching of writing what is it Believing that all composition teachers are situated politically and socially both as part of the institution in which they teach and as beings with lived histories Neel examines his own life and the life of composition studies as a discipline in the context of Aristotle Neel first situates the Rhetoric as a political document he then situates the Rhetoric in the Aristotelian system and describes how professional discourse came to know itself through Aristotle s way of studying the world finally he examines the operation of the Rhetoric inside itself before arguing the need to turn to Aristotle s notion of sophistry as a way of negating his system By pointing out the connections among Aristotelian rhetoric the contemporary university and the contemporary writing teacher Neel shows that Aristotle s frightening social theories are as alive today as are Aristotelian notions of discourse Neel explains that by their very nature teachers must speak with a professional voice It is through showing how to hear one s professional voice that Neel explores the notion of professional discourse that originates with Aristotle In maintaining that one must pay a high price in order to speak through Aristotle s theory or to assume the role of professional he argues that no neutral ground exists either for pedagogy or for the analysis of pedagogy Neel concludes this discussion by proposing that Aristotelian sophistry is both an antidote to Aristotelian racism sexism and bigotry and a way of

allowing Aristotelian categories of discourse to remain useful Finally as an Aristotelian a teacher and a writer Neel responds both to Aristotle and to professionalism by rethinking the influence of the past and reviving the voice of Aristotelian sophistry

**The Wisdom of Our Ancestors** Graham James McAleer,Alexander S. Rosenthal-Pubul,2023-12-01 In *The Wisdom of Our Ancestors* the authors mount a powerful defense of Western civilization sketching a fresh vision of conservatism in the present age In this book Graham McAleer and Alexander Rosenthal Pubul offer a renewed vision of conservatism for the twenty first century Taking their inspiration from the late Roger Scruton the authors begin with a simple question What after all is the meaning of conservatism In reply they make a case for a political orientation that they call conservative humanism which threads a middle way between liberal universalism and its ideological alternatives This vision of conservatism is rooted in the humanist tradition that is classical humanism Christian humanism and secular humanism which the authors take to be the hallmark of Western civilizational identity At its core conservative humanism attempts to reconcile universal moral values rooted in natural law with local particularist loyalties In articulating this position the authors show that the West contra various contemporary critics does in fact have a great deal of wisdom to offer The authors begin with an overview of the conservative thought world situating their proposal relative to two major poles liberalism and nationalism They move on to show that conservatism must fundamentally take the form of a defense of humanism the master idea of our civilization The ensuing chapters articulate various aspects of conservative humanism including its metaphysical institutional legal philosophical and economic dimensions Largely rooted in the Anglo Continental conservative tradition the work offers fresh perspectives for North American conservatism

**Milton's Visual Imagination** Stephen B. Dobranski,2015-10-14 *Milton's Visual Imagination* contends that Milton enriches his biblical source text with acute and sometimes astonishing visual details

**The Theatre of Imagining** Ulla Kallenbach,2018-07-13 This book is the first comprehensive analysis of the fascinating and strikingly diverse history of imagination in the context of theatre and drama Key questions that the book explores are How do spectators engage with the drama in performance and how does the historical context influence the dramaturgy of imagination In addition to offering a study of the cultural history and theory of imagination in a European context including its philosophical physiological cultural and political implications the book examines the cultural enactment of imagination in the drama text and offers practical strategies for analyzing the aesthetic practice of imagination in drama texts It covers the early modern to the late modernist period and includes three in depth case studies William Shakespeare's *Macbeth* c 1606 Henrik Ibsen's *A Doll's House* 1879 and Eugène Ionesco's *The Killer* 1957

**Diagonal Advance** Anthony D. Baker,2013-01-25 Reveals how the divorce of divine perfection from human perfection undergirds the divorce of theology and philosophy This work shows how these discourses were originally joined by the Church Fathers to how they were separated in the Middle Ages and modern Anglicanism to how they can be rejoined

**The Relationship of Philosophy to Religion** Today Paolo Diego Bubbio,Philip Andrew Quadrio,2011-01-18 *The Relationship of Philosophy to Religion Today* is a collection

of texts authored by philosophers with an interest in contemporary philosophy of religion its merits and its limitations The collection has been stimulated by such questions as What ought philosophy of religion be and How ought philosophy relate to religion today In pursuing such questions the editors have asked the contributors to offer their insights and reflections on issues that they see as important to contemporary philosophy of religion with the goal of producing a collection of texts offering the reader a variety of perspectives without privileging any particular philosophical religious or irreligious orientation The book covers such themes as the relationship between religion and modernity faith in keeping with reason contemplation the merits and limitations of the atheism and the relationship between philosophy religion and politics

The Inhumanity of Right Christos Yannaras, 2022-01-01 Christos Yannaras pioneering critique of the concept of the right of the individual is presented in English for the first time This central aspect of political theory since Hegel's Philosophy of Right summarizes the philosophical and cultural identity of the paradigm of modernity but the philosophical assumptions underlying the concept of right have not hitherto been subject to scrutiny Yannaras shows that the starting point of the concept of right is a phenomenalist naturalism which presupposes an abstract concept of the human subject as a fundamentally undifferentiated natural individual The question is also explored of how the priority accorded to this concept of right is related to the contemporary crisis of the modern politico social paradigm while a new preface from the translator underlines the continued significance of Yannaras proposal for Anglophone readers Against the modern concept of right with its illusion of objectivity The Inhumanity of Right sketches out the basic lines of a political theory that prioritizes new social needs that reflect the relational character of the human person

Contemporary Perspectives on the History of Philosophy Peter A. French, Theodore Edward Uehling, Howard K. Wettstein, 1983 Contemporary Perspectives on the History of Philosophy was first published in 1983 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions The authors of the 27 papers in Volume 8 Midwest Studies in Philosophy have established reputations as historians of philosophy but their vantage point here is from contemporary perspectives they use contemporary analytic skills to examine problems and issues considered by past philosophers The papers arranged in historical order fall into six groups ancient philosophy the Pythagoreans Plato and Aristotle the seventeenth century

rationalists Descartes Leibniz and Spinoza the empiricists Locke Berkeley and Hume Kant the nineteenth century Hegel Schopenhauer and Mill and in conclusion an essay on Wittgenstein's Tractatus and two broad retrospective papers entitled Old Analyses of the Physical World and new Philosophies of Language and Moral Crisis and the History of Ethics *Hagia Sophia and the Byzantine Aesthetic Experience* Nadine Schibille, 2016-04-22 Paramount in the shaping of early Byzantine identity was the construction of the church of Hagia Sophia in Constantinople 532-537 CE This book examines the edifice from the perspective of aesthetics to define the concept of beauty and the meaning of art in early Byzantium Byzantine aesthetic thought is re-evaluated against late antique Neoplatonism and the writings of Pseudo Dionysius that offer fundamental paradigms for the late antique attitude towards art and beauty These metaphysical concepts of aesthetics are ultimately grounded in experiences of sensation and perception and reflect the ways in which the world and reality were perceived and grasped signifying the cultural identity of early Byzantium There are different types of aesthetic data those present in the aesthetic object and those found in aesthetic responses to the object This study looks at the aesthetic data embodied in the sixth century architectural structure and interior decoration of Hagia Sophia as well as in literary responses ekphrasis to the building The purpose of the Byzantine ekphrasis was to convey by verbal means the same effects that the artefact itself would have caused A literary analysis of these rhetorical descriptions recaptures the Byzantine perception and expectations and at the same time reveals the cognitive processes triggered by the Great Church The central aesthetic feature that emerges from sixth century ekphraseis of Hagia Sophia is that of light Light is described as the decisive element in the experience of the sacred space and light is simultaneously associated with the notion of wisdom It is argued that the concepts of light and wisdom are interwoven programmatic elements that underlie the unique architecture and non-figurative decoration of Hagia Sophia A similar concern for the phenomenon of light and its epistemological dimension is reflected in other contemporary monuments testifying to the pervasiveness of these aesthetic values in early Byzantium

**Humanism and Artificial Intelligence** Rosa Fioravante, Antonino Vaccaro, 2025-04-04 This book contributes to the debate on humanism in AI by providing a so far lacking comprehensive account of the significant challenges posed by AI to organizations from a humanistic perspective It does so in two ways by discussing ethical challenges of AI using humanistic assumptions normative implications and underpinning theoretical stances and by focusing on those challenges that can be considered well suited to be tackled from a humanistic perspective as they are more urgent for humanistic led organizations as well as those willing to become so This new perspective allows for new and important discussions making the book an important read for philosophers of technology and AI *Of Problematology* Michel Meyer, 1995-08-15 Michel Meyer offers a new beginning for philosophy rooted in a theory of questioning that he calls problematology Meyer argues that a new beginning is necessary in order to resituate philosophy science and linguistic analysis and he proposes a global view of rationality by returning to the nature of questioning itself For Meyer philosophy does not solve problems or give answers but

instead shows how propositions are related to a whole field of questions that give them meaning Reason is identified not with answers but with the question answer process Meyer pursues this new theory of reason and meaning in a critique of Western philosophy from Socrates Plato and Aristotle through Heidegger Wittgenstein and Foucault He provides a detailed analysis of Descartes notion of radical doubt and demonstrates its implications for the subsequent philosophical tradition that ignored the questioning process while pursuing an unshakable foundation for knowledge Meyer argues that recent work in rhetoric points toward a theory of radical questioning and claims that the methods of rhetoric and argumentation must be turned back on philosophy itself in order to recover the original significance of metaphysics as the science of ultimate questions

**Introduction to Metaphysics** Jean Grondin, 2012 This history of metaphysics respects both the analytic and Continental schools while also transcending the theoretical limitations of each The book provides an overview restoring the value of metaphysics to contemporary audiences

**The Genesis of Plato's Thought** Russell Tuttle, 2017-07-05 It is often said that to understand Plato we must understand his times Many readers who might accept without question this saying of historical criticism may still wonder why we should think it necessary to begin our enquiry as far back as Homer and beyond In the case of Plato there is an even greater need to pursue the argument back to the very beginnings of the historical period in which he lived and worked It is quite impossible to understand the genesis of Plato's ideas without understanding the profound change that Greek society underwent in the post Homeric period that preceded him This change in social structure created a mercantile progressive Greek society one which laid the foundations for all the subsequent history of Europe and the West The Genesis of Plato's Thought is particularly highly regarded because it departs vigorously from the traditional abstract static view of Plato's thought Winspear's volume on Plato's thought traces in a realistic fashion the deep reaching social and economic roots of Plato's concept of the state and society Winspear believes that nowhere can the social roots of philosophy be more sharply seen and more firmly apprehended than when one is dealing with the origins of Western philosophy among the Greeks His book contains the body of information which any reader should have if they wish to approach Plato as a historical figure To make the book useful to a wide circle of readers brief biographical identifications for the various important figures of Greek life are introduced in the text

*Philosophy in Dialogue* Gary Alan Scott, 2007-08-13 Traditional Plato scholarship in the English speaking world has assumed that Platonic dialogues are merely collections of arguments Inevitably the question arises If Plato wanted to present collections of arguments why did he write dialogues instead of treatises Concerned about this question some scholars have been experimenting with other more contextualized ways of reading the dialogues This anthology is among the first to present these new approaches as pursued by a variety of scholars As such it offers new perspectives on Plato as well as a suggestive view of Plato scholarship as something of a laboratory for historians of philosophy generally The essays gathered here each examine vital aspects of Plato's many methods considering his dialogues in relation to Thucydides and Homer narrative strategies and medical practice images and

metaphors They offer surprising new research into such much studied works as *The Republic* as well as revealing views of lesser known dialogues like the *Cratylus* and *Philebus* With reference to thinkers such as Heidegger Gadamer and Sartre the authors place the Platonic dialogues in an illuminating historical context Together their essays should reinvigorate the scholarly examination of the way Plato's dialogues work and should prompt a reconsideration of how the form of Plato's philosophical writing bears on the Platonic conception of philosophy *Heidegger, Work, and Being* Todd S. Mei, 2011-10-27

In a world of changing work patterns and the global displacement of working lifestyles the nature of human identity and work is put under great strain Modern conceptions of work have been restricted to issues of utility and necessity where aims and purposes of work are reducible to the satisfaction of immediate technical and economic needs Left unaddressed is the larger narrative context in which humans naturally seek to understand a human contribution to and responsibility for themselves others and being as a whole What role does human work play in the development of the world itself Is it merely a functional activity or does it have a metaphysical and ontological calling Heidegger *Work and Being* elucidates Heidegger's philosophy of work providing a novel interpretation of the Aristotelian understanding of work in relation to Heidegger's ontology and notion of thanking Todd S Mei employs Heidegger's hermeneutical approach to a critique and reconstruction of an understanding of work to show that work at its core is an activity centred on thanking and mutual recognition **From the Ancient Near East to Christian Byzantium** Mario Baghos, 2021-03-11 This book combines concepts from the history of religions with Byzantine studies in its assessments of kings symbols and cities in a diachronic and cross cultural analysis The work attests firstly that the symbolic art and architecture of ancient cities commissioned by their monarchs expressing their relationship with their gods show us that religiosity was inherent to such enterprises It also demonstrates that what transpired from the first cities in history to Byzantine Christendom is the gradual replacement of the pagan ruler cult which was inherent to city building in antiquity with the ruler becoming subordinate to Christ exemplified by representations of the latter as the Master of All Pantokrator Beginning in Mesopotamia the book continues with an analysis of city building by rulers in Egypt Greece and Rome before addressing Judaism specifically the city of Jerusalem and Christianity as shifting the emphasis away from pagan gods and rulers to monotheistic perceptions of God as elevated above worldly kings It concludes with an assessment of Christian Rome and Constantinople as typifying the evolution from the ancient and classical world to Christendom Eratosthenes and the Measurement of the Earth's Circumference (c.230 BC) Christopher A. Matthew, 2023-06-05 Eratosthenes and the Measurement of the Earth's Circumference c 230 BC is an innovative and thought provoking examination of one of the pivotal moments in the history of science This text analyses a debate that has been going on for more than 2 300 years over the accuracy of Eratosthenes experiment and calculations and puts to rest all prior theories that have come before This work engages with this long running debate by applying innovative and multi disciplinary methods such as linguistic analysis mathematical modelling satellite mapping archaeological investigation and

historical examination that creates the first ever combined exploration of this important event in the history of astronomy
