Rescaling International Political Economy Subnational States And The Regulation Of The Global Political Economy:

Rescaling International Political Economy Darel E. Paul, 2005 The dramatic and ongoing reconfigurations of sociospatial relations throughout the world today a process broadly referred to as globalization are typically explained through accounts wholly dominated by agents and structures operating at national and global scales However as *Rescaling International Political Economy* demonstrates localities and subnational states function as crucial sites of the struggle over the nature and direction of the global political economy In this path breaking study Darel E Paul engages the fields of international political economy geography and international relations to execute a comparative study of three North American subnational states and spaces from the 1970s to the present Examining these case studies through his own innovative theoretical framework Paul highlights class conflict as well as the alliances across scales that serve as the local social foundations of transnational liberalism *Rescaling International Political Economy* widens the terrain of contemporary political struggle and raises its stakes by demonstrating how urban space and subnational states have become critical battle grounds over the nature of twenty first century global capitalism

Rescaling International Political Economy Darel E. Paul, 2024-11-01 A major trend in recent years in political and economic geography has been the increasingly sophisticated use of the concept of scale *Rescaling International Political Economy* sits squarely in geographical debates regarding scale and globalization but Darel Paul does it within the framework of international political economy In particular he argues for the importance of subnational states and localities in creating globalization and focuses on regions in North America Alongside his arguments about scalar transformations Paul looks at how the processes serve transnational capital and how they work to construct the transnational capitalist class which currently rules the globe His regulationist approach which stresses how the centrality of state institutions in managing the global economy will revolutionize how we think about globalization

Geography, History, and the American Political Economy John Heppen, 2009-08-16 This collection takes on the call issued by reviewers of *The American Way* for a critical application of Carville Earle's framework to more geographical examples of political and economic shifts in America's past The essays illustrate changes in U S settlement development and political structure through the lens of the restructuring of the American economy and society over approximately fifty year cycles of crisis and recovery They demonstrate the extension of America's sphere of influence outside of the United States as a larger scalar shift and they underscore the utility of geography in answering very local questions concerning questions of poorly documented settlement histories Focusing on the geographic responses to periodic cycles of crisis and recovery and the more general underlying intertwining of geography and history *Geography History and the American Political Economy* is an incisive demonstration of how the constant restructuring of American politics and economy occurs within spatial and historical constructs

Regional Sub-State Diplomacy Today, 2010-03-10 Regional sub

state diplomacy has come of age No longer limited to federal states in Europe today sub state entities across the world engage in international relations and conduct a foreign policy parallel to complementary to or sometimes in conflict with their central governmental counterparts Since the late 1990s the spectrum of diplomatic instruments and the strategies that accompany them have become more diverse and complex Regional Sub State Diplomacy Today offers detailed and recent data on the nature width and complexity of regions engaging in international relations It includes cases from all over the world Next to comparative empirical studies Regional Sub State Diplomacy Today also offers original theoretical perspectives on the multi faceted dimensions of regional sub state diplomacy It is ideal for both students and practitioners of sub state diplomacy

Paradiplomacy Rodrigo Tavares,2016 Orthodox international relations theory considers foreign affairs to be the exclusive purview of national governments Yet as Rodrigo Tavares demonstrates the vast majority of leading sub states and cities are currently practicing foreign affairs both bilaterally and multilaterally Subnational governments in Asia the Americas Europe and Africa are changing traditional notions of sovereignty diplomacy and foreign policy as they carry out diplomatic endeavors and establish transnational networks around areas such as education healthcare climate change waste management or transportation In fact subnational activity and activism in the international arena is growing at a rate that far exceeds that carried out by the traditional representatives of sovereign states Paradiplomacy is the definitive first practitioner s guide to foreign policy at the subnational level In this seminal work Tavares draws from a unique pool of best practices and case studies from all over the world to provide a comprehensive and critical overview of the conceptual juridical operational organizational governmental and diplomatic parameters of paradiplomacy

Globalization and Sovereignty John Agnew,2017-12-15 This provocative and important text offers a new way of thinking about sovereignty both past and present Distinguished geographer John Agnew boldly challenges the widely popular story that state sovereignty is in worldwide eclipse in the face of the overwhelming processes of globalization He argues that this perception relies on ideas about sovereignty and globalization that are both overstated and misleading Agnew contends that sovereignty state control and authority over space is not necessarily neatly contained in state by state territories nor has it ever been so Yet the dominant image of globalization is the replacement of a territorialized world by one of networks and flows that know no borders other than those that define the Earth itself In challenging this image Agnew first traces the ways in which it has become commonplace He then develops a new way of thinking about the geography of effective sovereignty and the various geographical forms in which sovereignty actually operates in the world offering an exciting intellectual framework that breaks with the either or thinking of state sovereignty versus globalization

China's Financial Opening Yu Wai Vic Li,2018-03-13 The twenty first century has not only seen China become one of the world s largest trading nations but also its gradual integration into the global financial system Chinese sponsored project financing schemes such as the Belt and Road Initiative and the Asian Infrastructure Investment Bank and the expanding international footprint of the renminbi have raised

the specter of Beijing shaping established market rules and practices with its financial firepower These dramatic developments beyond the Great Wall of Money have overshadowed the equally remarkable opening of China's domestic capital markets These include initiatives that make cross border equity trade and investment easier attempts to internationalize exclusively domestic oriented equity markets and creation of the first offshore renminbi hub in Hong Kong paving the way for the big bang of renminbi use worldwide Li interrogates the domestic political dynamics underlying the dizzying switches between liberalization and restriction This book argues that the interplay between the pro opening coalitions and dissenting parties has been central to the policymaking process Financial opening has not only been driven by central bureaucratic actors but also by financial industry interests and the local authorities of financial centers acting in concert as coalitions The local and financial constituents have shaped policy agendas and priorities and defined and framed liberalizing initiatives in ways that appealed to bureaucratic entities They also sought wider political support by capitalizing on connections with top decision making elites To allay opposition and maintain political and technical consensus the coalition constituents have offered concessions to dissenting parties over implementation specifics This however has not always succeeded Dissenting parties who recognized adverse distributional and policy risk implications inherent in the opening initiatives might decline concessionary offers leading to policy tendencies other than opening As one of the very first political economy contributions to studies of China's financial opening from the 2000s this book will appeal to researchers of international political economy East Asia and China specialists and financial practitioners and policymakers wanting to make sense of the country's liberalizing logic

Leviathan Undone? Roger Keil, Rianne Mahon, 2010-01-01 Caught in the trap of the nation state and frozen in postwar bloc logic critical political economy has been found wanting when it comes to problematizing space and scale Globalization and the rise of world cities and regions have shaken the discipline's foundations and fostered new interest in the concept of scale Leviathan Undone brings together leading theorists and scholars from a variety of disciplines to develop a new language to understand the spatial restructuring that has accompanied globalization By treating scale as the core concept of our time these innovative groundbreaking essays bring a new sensibility to classical and contemporary concerns in Canadian and international political economy

Plural Diplomacies Noé Cornago, 2013-06-01 In Plural Diplomacies Normative Predicaments and Functional Imperatives Noé Cornago asserts the need to restore the long interrupted continuity between the relevance of diplomacy as *raison d'être* in a world which is much more than a world of States and its unique value as a way to mediate the many alienations experienced by individuals and social groups The book contends that an incursion beyond conventional understanding of diplomatic studies into fields of knowledge such as social studies of science psychology critical sociology of law or conceptual history offers expanded potential within the field by addressing the modern complexities of global life With particular attention to the semantics of diplomacy pluralization of diplomacy diplomacy within states commodity diplomacy and finally antidiplomacy Plural Diplomacies Normative

Predicaments and Functional Imperatives offers a new vision of diplomacy for the twenty first century *Globalizing Education Policy* Fazal Rizvi, Bob Lingard, 2009-12-04 Rizvi and Lingard's account of the global politics of education is thoughtful complex and compelling It is the first really comprehensive discussion and analysis of global trends in education policy their effects structural and individual and resistance to them In the enormous body of writing on globalisation this book stands out and will become a basic text in education policy courses around the world Stephen J Ball Karl Mannheim Professor of Sociology of Education Institute of Education University of London UK In what ways have the processes of globalization reshaped the educational policy terrain How might we analyse education policies located within this new terrain which is at once local national regional and global In *Globalizing Education Policy* the authors explore the key global drivers of policy change in education and suggest that these do not operate in the same way in all nation states They examine the transformative effects of globalization on the discursive terrain within which educational policies are developed and enacted arguing that this terrain is increasingly informed by a range of neo liberal precepts which have fundamentally changed the ways in which we think about educational governance They also suggest that whilst in some countries these precepts are resisted to some extent they have nonetheless become hegemonic and provide an overview of some critical issues in educational policy to which this hegemonic view of globalization has given rise including devolution and decentralization new forms of governance the balance between public and private funding of education access and equity and the education of girls curriculum particularly with respect to the teaching of English language and technology pedagogies and high stakes testing and the global trade in education These issues are explored within the context of major shifts in global processes and ideological discourses currently being experienced and negotiated by all countries The book also provides an approach to education policy analysis in an age of globalization and will be of interest to those studying globalization and education policy across the social sciences

Global Norms in the Twenty-First Century

Klaus-Gerd Giesen, Kees van der Pijl, 2009-03-26 Norms in the contemporary world system are no longer established exclusively through inter state agreement but increasingly are becoming truly global This is made possible by the rapid privatisation of law and the self regulation of the transnational private sector Other forces driving this epochal transformation are the overwhelming pre eminence of the United States the erosion of the role of the United Nations and the appearance of new actors such as subnational entities and NGO s They all contribute to the creation and ideological justification of new norms This collection brings together critical studies on this complex process Written by authors from eleven different countries both established scholars and young specialists the book challenges the often convenient rationalisations of regime theory the governance approach and post national or cosmopolitan democracy in order to explore the practical theoretical and ethical implications of the new world of global norms

The Politics of Economic Restructuring in India Loraine Kennedy, 2013-12-17 State re scaling is the central concept mobilized in this book to interpret the political processes that are producing new economic spaces in India In the quarter century since economic reforms were introduced the Indian economy has experienced strong growth accompanied by extensive sectoral and spatial restructuring This book argues that in this reformed institutional context where both state spaces and economic geographies are being rescaled subnational states play an increasingly critical role in coordinating socioeconomic activities The core thesis that the book defends is that the reform process has profoundly reconfigured the Indian state s rapport with its territory at all spatial scales and these processes of state spatial rescaling are crucial for comprehending emerging patterns of economic governance and growth It demonstrates that the outcomes of India s new policy regime are not only the product of impersonal market forces but that they are also the result of endogenous political strategies acting in conjunction with the territorial reorganisation of economic activities at various scales ranging from local to global Extensive empirical case material primarily from field based research is used to support these theoretical assertions Scholars of political economy political and economic geography industrial development development studies and Asian Studies will find this a stimulating and innovative contribution to the study of the political economy in the developing countries
