## **Research As Social Change New Opportunities For Qualitative Research:**

**Research as Social Change** Michael Schratz, Rob Walker, 2005-07-08 Have you ever thought research is boring Research writes Umberto Eco should be fun It seems unlikely that Umberto Eco has read many of the standard social science or education research texts But social research does offer the possibility of involvement in projects that are informative sometimes revealing and fun to do This book shows us that teaching learning and research are essentially social and deeply personal activities and that fun needs to be an integral part of this This is not a conventional text although it is about ways in which research can be used by those in various areas of professional practice Its main concerns are with qualitative research action research and case study methods and it goes back to first principles arguing for research that is concerned with the nature of personal memories and of perception the use of drawings and photographs the emotional relationships implicit in any kind of research and the context of the contemporary workplace The authors develop new directions and new possibilities for research and find ways of bringing together theory and practice the personal and the social organisations and their clients It is an important resource for all who are interested in doing research but are sceptical or critical of most studies that are currently available

**Education for Sustainable Development** Roger Firth,Maggie Smith,2018-10-09 To integrate the principles values and practices of sustainable development into all aspects of education and learning was the overarching goal of the UN Decade of Education for Sustainable Development 2005 2014 This it was believed would save the planet encouraging behaviour changes to allow for the development of a more sustainable and just society for all Awareness of sustainable development has risen enormously in recent years challenging us as individuals and as families workplaces and communities both local and global to think about and act upon the major issue which we face The Decade reaffirmed the United Nations commitment to the crucial role of education and learning in the pursuit of sustainable development and the need for far reaching changes in the way education is often practised Of course the very idea that education should be for something whether sustainable development or anything else remains as questionable as ever Nevertheless the instigation of the Decade clearly recognised the need for intensified efforts to achieve sustainable development This book reflects on the role and impact of the Decade in

helping to reorient education towards sustainability and looks forward beyond the end of the Decade and its achievements to contemplate the way ahead giving special attention to case studies and the state of affairs in England The authors offer different perspectives on the effectiveness and value of particular initiatives and practices that are responses to the Decade This book was originally published as a special issue of The Curriculum Journal      **Bringing Memory Forward** Teresa Strong-Wilson, 2008 Bringing Memory Forward looks at the application of the method of currere to storied formation Research tells us that white teachers are among the most recalcitrant of learners when it comes to challenging their own memories and experiences of privilege and race This book examines how white teachers can recognize and critique their constructions of difference and asks what it is that white teachers are so attached to that makes such critique difficult The book goes on to discuss the processes that might be set in motion to bring these attachments into question in such a way that the learner namely the teacher does not feel alienated and paralyzed by her thoughtlessness but instead is moved to think and act Through elaborating a method called bringing memory forward that emerged from self study methodologies and a teacher action research project Teresa Strong Wilson draws attention to the significance of stories and critical engagement with stories in social justice education with teachers      **Personalizing Evaluation** Saville Kushner, 2000-05-02 A brilliant piece of work adroitly fitted to the present state of affairs in program evaluation devoted to a defensible and under attended proposition that we should understand programs through their recipients Robert Stake University of Illinois Urbana Champaign This book makes an important and unique contribution to evaluation Michael Quinn Patton The Union Institute Minneapolis Personalizing Evaluation challenges the mainstream approach to program evaluation by inverting the traditional relationship between program and person Saville Kushner shows how evaluation should document individual and group experience and use this as a lens through which to read social
