**Research Design in the Behavioral Sciences** Francis J. Kelly, Donald L. Beggs, Keith McNeil, Tony Eichelberger, Judy Lyon, 2011-11-01 This new study on the development and construction of multi variable statistical models presents the multiple regression analysis approach for the behavioral sciences It is designed to construct statistical models which will reflect the investigator's original research question rather than limiting it The authors have aimed their views to a computer program so that the simple elegance of the generalized analysis of variance is not obscured and so that the investigator can circumvent the anachronistic desk calculator
