Staff,1997-07 **India's Economic Prospects** Thamby Mammen,1999 This book provides a macroeconomic analysis of the Indian economy It is a long run study that spans the period from 1950 51 to 1992 93 encompassing the various turning points in India s economic policy and development strategies The macroeconometric model used in the book integrates the monetary and real sectors of the economy In order to provide theoretical underpinnings for the model the book traces the development of macroeconomic theory including Keynesian structuralist and supply side economics The model explains the public sector s current and capital expenditures rather than treating them as exogenous variables A subrecursive system of prices is formulated in terms of unit cost based on the flow of factor income generated in the process of production monetary variable and agriculture supply factors The model analyzes and evaluates policy changes in India particularly since 1984 It is used to derive the appropriate mix of fiscal monetary and trade policies needed to generate significant economic growth in 1997 2000 in a non inflationary environment While fiscal and monetary discipline is vital in this regard public sector investment plays an important role in capital formation and economic growth **United States of Europe** Manoranjan Dutta,2011-12-06 Considers the post WWII transition of Europe from a diverse and disparate continent to the economically integrated European Union **Europe, East Asia and APEC** Peter Drysdale,David Vines,1998-05-21 This book is the first in a major new series examining Global Economic Institutions and contrasts regional economic integration in the Asia Pacific Region and in Europe In the Asia Pacific Region regionalism is developing by means of open regionalism which is different from the regionalism which has developed in Europe through the construction of a single European Market and Monetary Union within the European Union In the light of this contrast a number of important contemporary policy questions are considered **Encyclopedia of the Developing World** Thomas M. Asia's New Institutional Architecture Vinod K. Aggarwal,Min Gyo Koo,2008-02-04 Can regional and interregional mechanisms better institutionalize the creasing complexity of economic and security ties among states in Nor east Southeast and South Asia As the international state system und goes dramatic changes in both security and trade relations in the wake of the Cold War s end the Asian financial crisis and the attacks of Sept ber 11 2001 this question is now of critical importance to both academics and policymakers Still little research has been done to integrate the ana sis of both regional security and economic dynamics within a broader c text that will give us theoretically informed policy insights Indeed when we began our background research on the origin and e lution of Asia s institutional architecture in trade and security we found that many scholars had focused on individual subregions whether Nor east Southeast or South Asia In some cases scholars examined links tween Northeast and Southeast Asia and the literature often refers to these two subregions collectively as Asia artificially bracketing South Asia Of course we are aware that as products of culture economics history and politics the boundaries of geographic regions change over time Yet the rapid rise of India and its increasing links to East Asia especially those formed in the early 1990s suggest that it would be fruitful to examine both developments within each subregion as well as links across subregions
