choices and that such a rationale requires an understanding of the connection between the practicalities of researching sport and the philosophical assumptions which underpin them By examining touchstone principles in research methodology such as the contested gold standard of voluntary informed consent in the natural sciences and the postmodern denial of truth in the social sciences McFee demonstrates that epistemology and ethics are inextricably linked Drawing on a wide range of examples from the laboratory to the sports field McFee explores the concepts of knowledge and truth in sports research and makes a powerful case for a philosophical deepening of our approach to method and methodology in sport This book is important reading for all advanced students and researchers working in sport exercise and related disciplines

Boys, Bodies, and Physical Education Göran Gerdin, 2017-01-12 Using visual ethnography this book explores the many forms of pleasures that boys derive in and through the spaces and their bodies in physical education Employing the works of Michel Foucault and Judith Butler Gerdin examines how pleasure is connected to identity schooling and power relations and demonstrates how discourses of sport fitness health and masculinity work together to produce a variety of pleasurable experiences At the same time the book provides a critique of such pleasurable experiences within physical education by illustrating how these pleasures can still for some boys quickly turn into displeasures and can be associated with exclusion humiliation bullying and homophobia Boys Bodies and Physical Education argues that pleasure can both be seen as an educational and productive practice in physical education but also a constraint that both engenders and privileges some boys over others as well as reproducing narrow and limited conceptions of masculinity and pleasures for all boys This book works to problematize these pleasures and their articulations with gender bodies and spaces
