Berk, 2012-12-06 tion addressed by this analysis centers on the reciprocal relation between 1 household domestic and market work efforts It should be obvious by now that this chapter is not concerned explicitly with the contributions of individual members to household or market activity nor does it examine the mechanisms by which work tasks or time is apportioned among them To reiterate households per se are the unit of analysis the division of labor within with respect to either household or market activities is ignored In this chapter one must pretend that the social relations within the household productive unit which critically shape both the nature of work and its allocation are hidden from view To return to the earlier metaphor households establish a total household pie made up of all the market and domestic chores that they will undertake and the time required for them Only after that pie is created can it be sliced and the pieces doled out to individual members 2 The household and market pie defined and described here can be roughly conceptualized as the total productive capacity of the household or as the result of a pooling of individual talents and resources Indeed were a measure of the time available for leisure incorporated into the measure of the pie the household's full income budget constraint i.e. the total productive potential of the household could be described      **Family Life in Black America** Robert Joseph

*Handbook of Parenting: Being and becoming a parent* Marc H. Bornstein,2002 Despite the fact that most people become parents and everyone who has ever lived has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree Striking permutations on the theme of parenting are emerging single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny

**Working in a 24/7 Economy** Harriet B. Presser, 2005-02-01 An economy that operates 24/7 as ours now does imposes extraordinary burdens on workers Two fifths of all employed Americans work mostly during evenings nights weekends or on rotating shifts outside the traditional 9 to 5 work day The pervasiveness of nonstandard work schedules has become a significant social phenomenon with important implications for the health and well being of workers and their families In *Working in a 24/7 Economy* Harriet Presser looks at the effects of nonstandard work schedules on family functioning and shows how these schedules disrupt marriages and force families to cobble together complex child care arrangements that should concern us all The number of hours Americans work has received ample attention but the issue of which hours or days Americans work has received much less scrutiny *Working in a 24/7 Economy* provides a comprehensive overview of who works nonstandard schedules and why Presser argues that the growth in women's employment technological change and other demographic changes over the past thirty years gave rise to the growing demand for late shift and weekend employment in the service sector She also demonstrates that most people who work these hours do so primarily because it is a job requirement rather than a choice based on personal considerations Presser shows that the consequences of working nonstandard schedules often differ for men and women since housework and child rearing remain assigned primarily to women even when both spouses are employed As with many other social problems the burden of these schedules disproportionately affects the working poor reflecting their lack of options in the workplace and adding to their disadvantage Presser also documents how such work arrangements have created a new rhythm of daily life within many American families including those with two earners and absent fathers With spouses often not at home together in the evenings or nights and parents often not at home with their children at such times the relatively new concept of home time has emerged as primary concern for families across the nation Employing a wealth of empirical data *Working in a 24/7 Economy* shows that nonstandard work schedules are both highly prevalent among American families and generate a level of complexity in family functioning that demands greater public attention Presser makes a convincing case for expanded research and meaningful policy initiatives to address this growing social phenomenon
