different ages giving parents and teachers the power to maximize the media's benefits and minimize its harm. There are many opinions about media violence and children but not all are supported by science. In this book the top experts gather the latest results from 50 years of scientific study as the basis for a comprehensive in depth examination of the complex issues surrounding the effects of media violence of different types. Each chapter focuses on a particular issue of concern including hot topics such as brain development, cyber bullying, video games and verbal aggression. Articles take into account factors such as economic differences based on the ages of children and differences between types of media violence. This book provides the information parents and those who work with families need to make the best choices. It includes chapters specifically relevant to the types of bullying schools have the most trouble identifying and controlling. Most importantly the writing is both intelligent and accessible so that parents, educators, pediatricians and policymakers can understand and apply the findings presented.

Television Violence P. T. Kelly, 1999. If one culprit is suspected above all others for encouraging society to become more violent and unfeeling it is television. This medium which has become so pervasive in the last 50 years seems to play an enormous role in the lives of the vast majority of people. But who controls the content which exerts such an enormous influence and to an extent controls the people? What are they doing now and what will they be doing tomorrow? Is violence essential to sell toothpaste and hamburgers? What are our children becoming and what will their children be like? Will every child carry a gun or other weapon just waiting for someone to trigger their violent nature and ignite their preprogrammed anger?

Stop Teaching Our Kids to Kill Lt. Col. Dave Grossman, Gloria DeGaetano, 2009-11-04 There is perhaps no bigger or more important issue in America at present than youth violence Columbine Sandy Hook Aurora We know them all too well and for all the wrong reasons kids some as young as eleven years old taking up arms and with deadly frightening accuracy murdering anyone in their paths What is going on According to the authors of Stop Teaching Our Kids to Kill there is blame to be laid right at the feet of the makers of violent video games called murder trainers by one expert the TV networks and the Hollywood movie studios the people responsible for the fact that children witness literally thousands of violent images a day Authors Lt Col Dave Grossman and Gloria DeGaetano offer incontrovertible evidence much of it based on recent major scientific studies and empirical research that movies TV and video games are not just conditioning children to be violent and unaware of the

consequences of that violence but are teaching the very mechanics of killing Their book is a much needed call to action for every parent teacher and citizen to help our children and stop the wave of killing and violence gripping America s youth And most important it is a blueprint for us all on how that can be achieved In Paducah Kentucky Michael Carneal a fourteen year old boy who stole a gun from a neighbor s house brought it to school and fired eight shots at a student prayer group as they were breaking up Prior to this event he had never shot a real gun before Of the eight shots he fired he had eight hits on eight different kids Five were head shots the other three upper torso The result was three dead one paralyzed for life The FBI says that the average experienced qualified law enforcement officer in the average shootout at an average range of seven yards hits with less than one bullet in five How does a child acquire such killing ability What would lead him to go out and commit such a horrific act
