Shmmon Ahmad,Ms. Khushbu Kausar,2023-10-14 After many years of industrial experience in the Pharmaceutical Industry serving as a Quality Assurance Officer and Production Officer I felt compelled to share my insights Throughout my career in various manufacturing companies I witnessed a series of mishaps accidents injuries near misses fires and other incidents that underscored a critical issue It became evident that even seasoned safety professionals often lacked a comprehensive understanding of the techniques terminology procedures and systems essential for assessing measuring and applying the necessary tools to achieve the desired safety performance My journey eventually led me to the role of an educator at Glocal University Saharanpur where I taught Quality Assurance subjects In my opinion these subjects require continuous evaluation and updating to remain relevant in an ever evolving industrial landscape I firmly believe that certain topics hold paramount importance particularly for safety professionals and management personnel responsible for safety management within their organizations This book delves into topics such as management responsibility attitudinal problems behaviour safety thinking motivation for creating a safety culture and communication challenges These subjects are approached from a practical standpoint making them readily applicable to day to day safety administration While extensive information and literature exist on motivation and communication their specific applications in the realm of occupational safety and loss prevention are relatively scarce I aspire to offer this book as a valuable resource to safety professionals safety advisors and representatives and industry line managers to improving plant facility design training for operation and maintenance staff and the
