Alternative Real Estate Research Ling

Hin Li,2014-09-15 This book aims to provide insight into the soft side of real estate research and the interesting results and implications of the real estate research outside the traditional realm of investment financial aspects The book also attempts to answer what constitutes the so called soft side of real estate research if we shift our focus from the usual financial returns and investment analysis It also attempts to address whether there is such thing as an alternative real estate research paradigm The book also argues that research in real estate should not only be limited to land and property market performance analyses as this may greatly impair the potential research implications of various real estate studies The book argues that such analyses take on a very myopic view of real estate research This book will interest many who wish to learn more about the alternative aspect of real estate research which is more than just about investment analysis **Research for Business Decisions** Eli Peace Cox,1974-01-01 *The Effective Use of Market Research* Robin Birn,2004 Part of the new Market Research in Practice series published in association with the Market Research Society , MANAGERIAL ECONOMICS Dr. Saroj Kumar,Vipin Singh,2024-11-01 Buy E Book of MANAGERIAL ECONOMICS For MBA 1st Semester of AKTU Dr A P J Abdul Kalam Technical University UP Data-Driven Decision Making for Long-Term Business Success Singh, Sonia,Rajest, S. Suman,Hadoussa, Slim,Obaid, Ahmed J.,Regin, R.,2023-12-21 In today s academic environment the challenge of ensuring lasting commercial and economic success for organizations has become more daunting than ever before The relentless surge in data driven decision making based on innovative technologies such as blockchain IoT and AI has created a digital frontier filled with complexity Maintaining a healthy firm that can continually provide innovative products and services to the public while fueling economic growth has become a formidable puzzle Moreover this digital transformation has ushered in new risks from pervasive cybersecurity threats to the ethical challenges surrounding artificial intelligence In this evolving landscape academic scholars face the pressing challenge of deciphering the path to long term organizational prosperity in an era dominated by data Data Driven Decision Making for Long Term Business Success serves as guidance and insights amidst this academic challenge It is the definitive solution for scholars seeking to uncover the complexities of data driven decision making and its profound impact on organizational success Each meticulously curated chapter delves into a specific facet of this transformative journey from the implications of modern technologies and pricing optimization to the ethics underpinning data driven strategies and the metaverse s influence on decision making **Survey Research in the Social Sciences** Charles Y. Glock,John Bennett,1967-12-31 Survey research was for a long time thought of primarily as a sociological tool It is relatively recently that this research method has been adopted by other social sciences and related professional disciplines The amount and quality of its use however vary considerably from field to field This volume describes the elementary logic of survey design and analysis and provides for each discipline an evaluation of how survey research has been used and conceivably may be used to deal with the central problems of each field *Escalation in Decision-Making* Ms Julia Hodgson,Professor Helga Drummond,2012-08-28 When a venture seems to be faltering do you

persist and hope that things will get better or do you cut your losses This may be one of the most important decisions business or project owners may ever have to make Persistence involves the risk of throwing good money or resources after bad but owners may feel they have too much invested to quit now Escalation in Decision Making reveals why social scientists believe that owners may not respond rationally to such predicaments Instead of exiting when the odds are clearly stacked against them they re invest and end up compounding their losses a phenomenon known as escalation of commitment The authors Helga Drummond and Julia Hodgson also introduce the concept of entrapment a variation whereby decision makers passively drift towards insolvency as the cost of changing direction becomes too high So what drives escalation why do some owners quit whilst others persist until the bailiffs arrive what can we learn from owners mistakes what makes newcomers believe they can succeed where others are conspicuously failing These questions of behavioural economics are answered using a narrative that analyses decisions made by market traders facing economic extinction Many highly successful entrepreneurs started their careers in markets it was once an almost guaranteed route to prosperity now market traders are struggling to survive Although the market traders featured are small entrepreneurs the ubiquitous phenomenon of escalation at the heart of these stories is widely relevant to practitioners such as project managers in large organizations and to those responsible for managing risk in many situations Rich in case studies involving real business decisions and dilemmas Escalation in Decision Making provides an accessible introduction to the application of theory against a background of growing interest in behavioural economics now being researched and taught in universities and increasingly attracting the attention of business practitioners
