The field of technical communication is concerned with how professionals communicate complex information with specialist and nonspecialist users¹ in order to solve practical problems, often using communication technologies, multi-modal documents, or complex documents. These professionals may be identified primarily by their roles as communicators, with varying job titles and responsibilities but with primary expertise in communication (see Brumberger and Lauer 2015); or by their roles in another professional area, such as engineering, computing, management, accounting, criminal justice, and healthcare (“workplace communication”). Although the roles and professional identities are rather distinct, the communication tasks and products with which they work are often shared. This overview will give some attention to both domains of technical communication.

Like all communicators, technical communicators make use of shared textual conventions applied in recognizably similar situations to accomplish their communication goals. Those shared conventions, or genres, simplify the technical communicator’s work by constraining the range of possibilities in a given communication situation, and they can encourage innovation by helping technical communicators understand the goals of a text and envision a range of ways to achieve those goals.

Technical communicators face special challenges:

- The subject matter of technical communication is specialized, difficult, or esoteric.

Research In Technical Communication

Research In Technical Communication:

Research in Technical Communication Laura J. Gurak, Mary M. Lay, 2002-12-30 The purpose of this cutting edge collection of essays is threefold first it presents the principles of data collection and interpretation or the methodological distinctions of a particular method appropriate to technical communication research Second it discusses the foundational principles of the methodologies given the primary discipline in which they were created and applied Finally it reflects upon the process of importing and employing these methodologies into the research field of technical communication and on how technical communication research has contributed to the development and application of these methodologies Written by many noted scholars in the field and presenting a wide range of research methods *Research in Technical Communication* combines theory and practice Both technical communicators and industry researchers who want to learn more about workplace research and methodologies will find it invaluable as will beginning and advanced scholars who will find much that is useful in its variety of subjects *Research in Technical Communication* Hughes/Hayhoe, *A Research Primer for Technical Communication* George F Hayhoe, Michael A. Hughes, George F. Hayhoe, 2009-03-04 This practical volume provides a thorough introduction to conducting and critically reading research in technical communication complete with exemplars of research articles for study Offering a solid grounding in the research underpinnings of the technical communication field this resource has been developed for use in master s level and upper division undergraduate research methods courses in technical and professional communication **Research in Technical Communication** Michael G. Moran, Debra Journet, 1985 This sourcebook demonstrates the vigorous work being done in the field of technical and scientific communication Collectively the essays offer researchers a basis from which to begin constructing the theoretical framework necessary for the study of technical communication The book begins with general concerns and progresses to particular applications The chapters comprising Part I outline larger theoretical perspectives from which to examine technical communication humanistic approaches to technical communication the history of technical communication communication theory and technical writing and the teaching of technical writing Part II examines the relationship of technical communication to traditional rhetorical concerns such as invention audience modes of organization and style Specific types of technical communication proposals reports and business correspondence among others are discussed in Part III The use of the computer oral presentations and specialized forms of technical communication are examined in Part IV The appendixes offer guides to textbooks and style manuals and an overview of the technical writing profession *Qualitative Research in Technical Communication* James Conklin, George F. Hayhoe, 2010-10-27 Addressing the explosive growth in qualitative research in recent years this volume represents the first anthology to bring together a representative sample from this growing body of work and comments on the reasons for the extraordinary interest in qualitative research Contributors to the volume bring forward reports of significant structured qualitative research into various aspects of technical communication

practice addressing the questions of what new insights researchers are generating about the working reality of today's technical communicators and how technical communicators are perceived and treated by managers and by colleagues from other disciplines. Including examples of qualitative methodologies including ethnography, case study, focus groups, action research, grounded theory, and interview research used by technical communicators to strengthen their practice, the result is a rich harmony of perspectives as diverse as the field of technical communication itself. This book will be of interest to students and academics seeking up-to-date information on current industry practices in technical communication as well as to practitioners in technical and professional communication. The book will also serve as a text in undergraduate seminars and courses at the master's level. *The State of Research in Technical Communication*, 2009

Transnational Research in Technical Communication Nancy Small, Bernadette Longo, 2022-07-01

Transnational Research in Technical Communication considers the complexities of intercultural projects from a compelling perspective: first-hand narrative reflections. Readers go behind the scenes as scholars share their experiences crossing a variety of borders in their efforts to engage in knowledge-making endeavors. Interwoven through each chapter are stories of how projects were designed, adapted, and sometimes even failed. The collection begins with an introduction situating it at the intersection of recent scholarship in storywork, intercultural research, and technical and professional communication's social justice turn. Each chapter concludes with discussion questions and recommendations for further reading. The closing chapter reveals a nascent ethic of transnational and intercultural research growing out of contributors' lessons learned and generous reflections. Anyone interested in or planning to undertake a transnational or intercultural project can benefit from these storied case studies, and as a result, this collection contributes to moving the field forward as it strives to promote more ethically aware and responsive research. **Research in Technical Communication** Dale-Marie Wilson, Aqueasha M.
