Research Into Labour Market Behaviour:

Research Into Labour Market Behaviour Jean Vincens, Derek Robinson, 1974 **Female Labour Market Behaviour and Fertility** Jacques J. Siegers, Jenny de Jong-Gierveld, Evert van Imhoff, 2012-12-06 Since 1987 the investigation of the relationship between female labour market behaviour and fertility which forms part of the research programme of the Economic Institute Centre for Interdisciplinary Research on Labour Market and Distribution Issues CIAV of Utrecht University also became a part of the research programme of the Netherlands Interdisciplinary Demographic Institute NIDI Since then I have been entrusted with research on this topic In this context I acted on a suggestion made by Frans Willekens to organize an international workshop with the help of other members of the NIDI staff and with the administrative and organizational support of the NIDI This resulted in the workshop Female Labour Market Behaviour and Fertility Preferences Restrictions Behaviour held at the Netherlands Interdisciplinary Demographic Institute in The Hague April 20 22 1989 under the auspices of the European Association for Population Studies EAPS In this workshop demographers econometricians economists psychologists and socio logists discussed the paths to a truly interdisciplinary approach to the relationship between female labour market behaviour and fertility Such an interdisciplinary approach requires a common theoretical framework The rational choice framework was considered to be best suited to this purpose As a consequence the workshop was not only structured by what was studied but also by how it was studied This volume consists of the papers presented at the above mentioned workshop as revised by the authors in collaboration with the editors **Labour Markets Under Different Employment Conditions** D. I. Mackay, D. Boddy, J. Brack, J. A. Diack, N. Jones, 2024-09-18 Originally published in 1971 this wide ranging study illuminates many crucial wage and employment issues by examining the operation of local labour markets and by testing labour market theory against the observed behaviour of employers and employees in different labour market environments It is based on an empirical investigation of engineering plants both in major conurbations and in smaller labour market areas There is an emphasis on measurement and quantification which provides a fund of information on such subjects as wage structures labour turnover recruitment and mobility internal labour markets manpower forecasting apprentice training and redundancy The authors outline the weaknesses of applying economic theory to labour market behaviour **Handbook of Research Methods in Behavioural Economics** Morris Altman, 2023-03-02 This comprehensive Handbook addresses a wide variety of methodological approaches adopted and developed by behavioural economists exploring the implications of such innovations for analysis and policy Homeownership and the Labour Market in Europe Casper van Ewijk, Michiel van Leuvensteijn, 2009-03-12 Increasing labour market flexibility is at the top of the European agenda A new and challenging view is that lack of mobility in the labour market may arise from rigidities in the housing market This book brings together top European economists to analyse the interaction between housing and labour markets and provides clear policy messages Women in the Labour Market in Changing Economies Brígida García, Richard

Anker, Antonella Pinnelli, 2003-05-15 This book examines a central issue in understanding recent changes in demographic patterns and the labour market the increased participation of women in the workforce and how the nature of this participation has developed In the context of such economic and labour phenomena as globalization increasing flexibility in work patterns intermittent and part time employment and in many countries high underemployment or unemployment the role of women workers has transformed dramatically This book explores a number of demographic issues associated with these developments such as migration in the developed world and transition economies family formation and dissolution the autonomy of women migrants household composition the evolution of gender systems and contraceptive behaviour both as factors that determine the labour market conditions for women and their income levels and as demographic outcomes The studies cover a wide range of situations from societies with a strong patriarchal ideology and residential female seclusion to industrialized countries with policies designed to assist women manage both a work and a family role and makes use of extensive data sets collected at country level The Editors have sought to maintain an interdisciplinary outlook in the book and to draw policy implications from the various socio economic situations examined *Studies of Urban Labour Market Behaviour in Developing Areas* Subbiah Kannappan, 1977 **Adapting Public Policy to a Labour Market in Transition** France St-Hilaire, 2000 After two decades of rapid technological and structural change and an overall record of poor economic performance Canadians need to take stock of the ongoing transformation of the labour market and its implications for public policy The fundamental changes to the nature of work itself suggest that labour and social policies established decades ago may no longer be adequate or appropriate Moreover the continuing perception of increased instability and worsening employment outcomes and the growing concern over increased earnings inequality and labour market polarisation have raised serious questions about the role of government not only in addressing the consequences of economic adjustment but also in facilitating or worse hampering this process In *Adapting Public Policy to a Labour Market in Transition* leading labour market specialists examine specific areas of public policy that have generated considerable attention and debate in recent years They provide new evidence on issues of utmost concern to the well being of Canadians and a solid assessment of the challenges and avenues for policy reform **Employment, the Small Firm and the Labour Market** John

Atkinson, David J. Storey, 2016-07-15 This volume provides a rigorous examination of key issues relating to employment in small businesses These include an analysis of the true extent of job creation provided by small firms the relative quality of jobs in small firms the growth of self employment during the 1980s and the way in which the small firm interacts with its local labour markets These issues are examined in an international context with comparative examples from the USA the UK and Europe *Labour Market Reform in China* Xin Meng, 2000-05-11 *Labour Market Reform in China* documents and analyses institutional changes in the Chinese labour market over the last twenty five years and argues that further reform is necessary if China is to sustain its high growth rates The book first assesses the problems associated with the pre reform

labour arrangements It offers an in depth analysis of the urban labour market and its impact on individual wage determination ownership structure labour compensation and labour demand and of social security reform In its main chapters the book investigates the impact of rural economic reform on rural labour market Detailed consideration is given to the rural agricultural labour market labour arrangement in the rural non agricultural sector and the wage gap between the rural agricultural and non agricultural sectors Finally the book examines the phenomenon of rural urban migration its impact on rural and urban economic growth and models its effect on urban employment unemployment and earnings
