*Building the King's Highway* Bruce A. Castleman, 2005-04-01 The importance of the silver trade to the Spanish colonial effort is well documented as it opened up an exchange of goods with Europe and Asia Lesser known is the story of the roads on which this trade moved and the people responsible for building them Focusing on the camino real linking Mexico City and the port of Veracruz Bruce Castleman has written a social history of road construction laborers in late Bourbon Mexico He has drawn on employment and census records to study a major shift in methods used by the Spanish colonial regime to mobilize the supply of unskilled labor and concomitant changes in the identities those laborers asserted for themselves Through a close analysis of wages actually paid to named individuals from one week to the next Castleman opens a new window on Mexican history In the 1760s a free wage labor regime replaced a draft labor system and by examining records of road construction he traces both this transformation and its implications During this time free wage artisans saw their earnings reduced and they were pushed into the labor pool

and Castleman reveals how a shift occurred in the way that laborers identified themselves as the Spanish *casta* system of racial classification became increasingly fluid In his study Castleman introduces some of the principle players of eighteenth century Mexico from viceroys to tobacco planters to military engineers He then fleshes out the lives of working persons drawing on a complete set of construction records from the construction of the Puente de Escamela at Orizaba to forge a collective biography that considers their existences apart from the workplace By linking census and employment records he uncovers a host of social indicators such as marriage preference family structure and differences over time in how the *caste* system was used to classify people according to ancestry As Castleman shows roads did not so much link Mexico to the global economy as forge regional markets within New Spain and his work provides an astute analysis of struggles between the Bourbon colonial state the important consulados of Mexico City and Veracruz and more localized interests over road policy More important Building the King s Highway provides a valuable new perspective on people s lives as it advances our understanding of labor in late colonial Latin America

*Catherine of Aragon* Theresa Earenfight,2021-12-15 Catherine of Aragon is an elusive subject Despite her status as a Spanish infanta Princess of Wales and Queen of England few of her personal letters have survived and she is obscured in the contemporary royal histories In this evocative biography Theresa Earenfight presents an intimate and engaging portrait of Catherine told through the objects that she left behind A pair of shoes a painting a rosary a fur trimmed baby blanket each of these things took meaning from the ways Catherine experienced and perceived them Through an examination of the inventories listing the few possessions Catherine owned at her death Earenfight follows the arc of Catherine s life first as a coddled child in Castile then as a young adult alone in England after the death of her first husband a devoted wife and doting mother a patron of the arts and of universities and finally a dear friend to the women and men who stood by her after Henry VIII set her aside in favor of another woman Based on traces and fragments these portraits of Catherine are interpretations of a life lived five centuries ago Earenfight creates a compelling picture of a multifaceted intelligent woman and a queen of England Engagingly written this cultural and emotional biography of Catherine brings us closer to understanding her life from her own perspective
