Gilkeson,2010-09-20 This book examines the intersection of cultural anthropology and American cultural nationalism from 1886 when Franz Boas left Germany for the United States until 1965 when the National Endowment for the Humanities was established Five chapters trace the development within academic anthropology of the concepts of culture social class national character value and civilization and their dissemination to non anthropologists As Americans came to think of culture anthropologically as a complex whole far broader and more inclusive than Matthew Arnold s the best which has been thought and said so too did they come to see American communities as stratified into social classes distinguished by their subcultures to attribute the making of the American character to socialization rather than birth to locate the distinctiveness of American culture in its unconscious canons of choice and to view American culture and civilization in a global perspective

An Anthropologist Looks at History A. L. Kroeber,2023-11-15 This title compiles influential essays by Alfred Kroeber written in the last decade of his life reflecting his deep exploration of human culture civilization and history through an anthropological lens Curated by Milton Singer and Theodora Kroeber this collection showcases Kroeber s unique perspective on the intersections of anthropology history and the humanities Rather than focusing solely on ethnology or linguistic analysis Kroeber broadens his scope to address questions about style civilization patterns and the historical continuity of cultures His view of anthropology as a young evolving science with ancient philosophical roots demonstrates his belief in the discipline s role in understanding human progress The volume aims to engage both historians and anthropologists by presenting Kroeber s reflections on culture and the human condition especially for a generation of scholars and students whose approach to anthropology is less historically oriented Kroeber s personal approach to his field developed over a lifetime of teaching and exploring anthropological themes such as Culture Growth emphasizes the evolving nature of culture as an aggregate that shapes civilizations and values By tracing Kroeber s intellectual journey the book underscores the importance of historical context in anthropology positioning it as a field capable of enriching broader humanistic inquiries

and advancing our understanding of civilization's aesthetic, ethical, and structural evolution. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1963.

A Roster of Civilizations and Culture, 1962 **Civilizations and World Systems** Stephen K. Sanderson, 1995. Leading figures in the fields of civilizational studies and sociology and political science join to compare and contrast their assumptions and conclusions about broad-scale social and historical change. Sorokin and Civilization Joseph B. Ford, 2018-04-17. Sorokin and Civilization is a festschrift to Pitirim Sorokin, one of the most famed figures of twentieth-century sociology and first president of the International Society for the Comparative Study of Civilizations (ISCSC). He was a giant of the twentieth-century stage in the larger world as well. He debated with Trotsky, exchanged ideas with Pavlov, and received a personal invitation to meet with President Masaryk of Czechoslovakia. His principled dissent from sociological orthodoxy frequently anticipated that of Charles Wright Mills, Alfred McClung Lee, and Alexander Solzhenitsyn. He was to paraphrase Joseph Ford, a scholar among statesmen and a statesman among scholars. The volume is divided into four parts: A Life Remembered; Sorokin as Gadfly; Sorokin's Methodology and Applying Sorokin's Theories; Contributors and chapters to this volume include Sorokin's Life and Work by Barry V. Johnston; The Sorokin-Merton Correspondence on Puritanism, Pietism, and Science by Robert K. Merton; Sorokin and American Sociology: The Dynamics of a Moral Career in Science by Lawrence T. Nichols; Sorokin as Dialectician by Robert C. Hanson; Applying Sorokin's Typology by Michel P. Richard; and Transitions, Revolutions, and Wars by William Eckhardt. Sorokin and Civilization will appeal to all those with an interest in cultural and historical processes and the life and theories of Sorokin. **Checklist of Civilizations and Culture** A. Kroeber, 2017-09-04. Checklist of Civilizations and Culture contains all known principal civilizations and cultures of the world with such definition as is possible of their area and time, their subdivisions, and periods, and a brief indication of their character. The terms civilization and culture are used inclusively as essential synonyms of varying emphasis. There is no special difference between how the two words are used. They denote somewhat distinguishable grades of degree of the same large-scale processes. Civilization currently carries an overtone of high development of a society; culture has become a customary term of universal denotation applicable alike to high or low products and heritages of societies. This component or segment of culture or civilization is denoted here as value culture by A. L. Kroeber. It includes all purely aesthetic and intellectual activity as well as an element in every religion and includes some part of morals, though morality is directed also to personal conduct and action. Every human society has its culture, complex or simple. The word culture should denote all possible ideals, but for the larger and richer cultures the term civilization may be more appropriate. Kroeber argues that the problem of recognizing the world's cultures is essentially one of natural history and involves dealing with all phenomena and then building up their patterns or classes step by step. This

classic volume is now available in paperback No better teacher of general anthropology can be imagined than A L Kroeber

Totems and Teachers Sydel Silverman, 2004 This classic volume edited by Sydel Silverman presents the insiders reflection of distinguished contemporary anthropologists on nine prominent figures who helped shape the discipline This is one of few books that traces the theoretical development of anthropology through the lives of the well known figures who have influenced its historical trajectory

The Boasians William Y. Adams, 2016-09-02 This book is a study in depth of the work of Franz Boas and twenty of his students at Columbia University in the early years of the twentieth century Collectively they laid the entire institutional as well as the intellectual foundations of American anthropology as it exists today The book begins with a discussion of the historical context of Boasian anthropology and an overview of its nature and limitations The work of Boas and his leading students is then discussed in detail including biographical data a review and critique of their research a review in detail of each of their major publications and an overall assessment of their contribution to anthropology as seen in their own time and today

Wolf, 2001-01-03 This collection of twenty eight essays by renowned anthropologist Eric R Wolf is a legacy of some of his most original work with an insightful foreword by Aram Yengoyan Of the essays six have never been published and two have not appeared in English until now Shortly before his death Wolf prepared introductions to each section and individual pieces as well as an intellectual autobiography that introduces the collection as a whole Sydel Silverman who completed the editing of the book says in her preface He wanted this selection of his writings over the past half century to serve as part of the history of how anthropology brought the study of complex societies and world systems into its purview

Theory and History in International Relations Donald J. Puchala, 2013-01-11 Theory and History in International Relations is an eloquent plea to scholars of global politics to turn away from the manufacture of data and return to a systematic study of history as a basis for theory While the modest use of empiricism will always be important Puchala rejects the logical positivism of the so called scientific revolution in the field in favor of a more complex even intuitive vision of global politics He addresses the potential uses of history in studying some of the major debates of our time the Cold War as a struggle between empires the collision of civilizations cultural encounters and colonies in the ancient world and liberal approaches to the understanding of history and ethical contributions to the dialogue over theory

Invisible Genealogies Regna Darnell, 2001-01-01 Invisible Genealogies is a landmark reinterpretation of the history of anthropology in North America During the past two decades theorizing by many American anthropologists has called for an experimental moment grounded in explicit self reflexive scholarship and experimentation with alternate forms of presentation Such postmodern anthropology has effectively downplayed connections with past luminaries in the field whose scholarship is perceived to be uncomfortably colonialist and nonreflexive Ironically as the American Anthropological Association nears its one hundredth anniversary and interest in the history of the discipline is at an all time high that history has been effectively presented as removed from and irrelevant to the new generation Invisible

Genealogies offers an alternative compelling vision of the development of anthropology in North America one that emphasizes continuity rather than discontinuity from legendary founder Franz Boas to the present Regna Darnell identifies key interpretive assumptions and practices that have persisted sometimes in modified form since the groundbreaking work of A L Kroeber Boas Ruth Benedict Edward Sapir Elsie Clews Parsons Paul Radin Benjamin Lee Whorf and A Irving Hallowell during the founding decades of anthropology Also highlighted are the Americanist roots of postmodern anthropology and the work of innovative recent scholars like Claude Lévi Strauss and Clifford Geertz

Continuities in Cultural Evolution Margaret Mead, 2017-07-12 Margaret Mead once said I have spent most of my life studying the lives of other peoples faraway peoples so that Americans might better understand themselves Continuities in Cultural Evolution is evidence of this devotion All of Mead's efforts were intended to help others learn about themselves and work toward a more humane and socially responsible society Scientist writer explorer and teacher Mead brought the serious work of anthropology into the public consciousness This volume began as the Terry Lectures given at Yale in 1957 and was

not published until 1964 after extensive reworking The time she spent on revision is evidence of the importance Mead attached to the subject the need to develop a truly evolutionary vision of human culture and society This was desirable in her eyes both in order to reinforce the historical dimension in our ideas about human culture and to preserve the relevance of historical and cultural diversity to social economic and political action Given the present state of academic and public discourse alike this volume speaks to us in a language we badly need to recover Alfred Kroeber Theodora Kroeber, 2023-11-15 The Handbook of the Indians of California written by Alfred Kroeber between 1916 and 1917 is the defining work by which he is widely recognized Known beyond academic circles the Handbook remains a primary reference for many on California s Indigenous cultures Kroeber embraced this association with his work considering it the first fruits of his career and a testament to his early fieldwork His later explorations into broader theoretical concepts were deeply rooted in these experiences with the living cultures of Native Americans which began on his early field trips to Wyoming and Oklahoma and ultimately California where he made his lifelong home Kroeber s westward journey marked a turning point setting him apart from his East Coast roots Arriving in California in 1900 he immersed himself in fieldwork traversing the state to study Native American communities in rural areas Known as the serious young anthropologist with his black beard and pockets full of tools and treats he quickly became a respected figure among the Indigenous tribes he worked with particularly the Yurok of northern California s Klamath River and the Mohave of the Colorado River His interest lay in California s landscapes the rivers bays and coastline which paralleled the natural surroundings of the Indigenous cultures he studied reflecting his deep connection to the Pacific and its waterways Despite the powerful draw of the West Kroeber s formative years were shaped in New York amidst the waterways surrounding Manhattan He grew up in a close knit family with friendships that spanned his life despite geographic separation This early foundation influenced his work and perspective anchoring him in both his professional discipline and personal relationships His early life on the East Coast contrasts with his later dedication to California s Indigenous cultures highlighting the unique dual influence of these landscapes on his approach to anthropology and his lifelong commitment to understanding and documenting the rich cultural heritage of Native American communities This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1970 *Theoretical Anthropology* David Bidney, *Theoretical Anthropology* is a major contribution to the historical and critical study of the assumptions underlying the development of modern cultural anthropology In the new introduction Martin Bidney discusses the present state of anthropology and contrasts it with the scene surveyed in *Theoretical Anthropology* He discusses the relevance of David Bidney s work to our present concerns Also included in this work is the second edition s introductory essay by David Bidney

written fifteen years after the first edition of Theoretical Anthropology Here the author examines his original aims in writing this book Theoretical Anthropology has helped to create among anthropologists the present climate of theoretical self awareness and broad humanistic concerns It has become a standard reference work for anthropologists as well as sociologists
