Rothstein On Reference With Some Help From Friends:

Rothstein on Reference- with Some Help from Friends Samuel Rothstein, 1989 Now library professionals can enjoy the convenience of having 16 of Sam Rothstein's most memorable papers spanning over three decades all in one lively book. Samuel Rothstein, practitioner, teacher, and scholar, has influenced the thinking and practice of more reference librarians who are currently practicing than has any other single individual. In his honor, the editors of *Rothstein on Reference* not only feature Rothstein's seminal writing but they have also included essays written by Rothstein's colleagues including Charles Curran, Robert Hauptman, Marilyn Domas White, and Mary Biggs that explore important issues confronting reference librarians today. Reference librarians and library historians will gain insights into the development of reference service in American libraries, the evaluation of reference services, the training and education of reference librarians, and much more. Both beginners and experts in the reference field will find much here for inspiration and enlightenment. **Access Services:**

Gillian M. McCombs, 2021-04-29 This book takes a close look at the recent changing emphasis from collections to access and from document description to document delivery. As the automation of library processes has moved from technical services to reference services, the roles of the professionals working in those capacities have changed dramatically. Library administrators who are looking to redeploy resources will gain helpful insights from the experiences of librarians who have already redirected their organizations. This helpful volume will be of tremendous assistance in redefining the traditional roles of reference and technical librarians. *Access Services* offers new insights into the movement from bibliographic access to information access that is reshaping reference services today. Informative discussions on topics such as cross training, experiments, revised organizational structures, the new role of the bibliographic utilities, library school education for the redefined professional, and changes in cataloging codes reveal what impact this trend has for librarians, services, and patrons.

Library Services for Career Planning, Job Searching, and Employment Opportunities Byron Anderson, 1992 Here is a valuable book filled with new ways to strengthen and utilize library career planning services and job searching sources to better serve library patrons and career planners. *Library Services for Career Planning, Job Searching, and Employment Opportunities* is the only resource available on the library's role in helping job searchers and career planners. An increase in the need for career and job information caused by a volatile labor market and current economic trends has created a need for both librarians and job counselors to help patrons take full advantage of library sources and services. Taking a broad approach from career counseling theory to recommendations of major sources of career and job information, this much-needed book covers subjects such as cooperative programs between librarians, career planning professionals, and job search counselors, and the evaluation of career-related materials. This one-of-a-kind volume emphasizes the constant demand for career and job information regardless of economic conditions. Librarians will learn how to act as intermediaries to help patrons locate career and employment sources dispersed throughout the collection, demonstrate their proper use, and guide

them to additional useful sources Specific chapters explain how to expand career and job services with only a few new low cost resources by networking with other community resources and developing a strong core collection of the best resources available Other groundbreaking topics analyzed include employment and labor market trends for the 1990s unemployment services in libraries evaluation criteria for career resources essential career planning and employment materials specialized collections for relocation literature and employment of persons with disabilities This book is necessary reading for librarians who maintain career resources in their collections career planning and job counselors who need to learn how to take better advantage of library services and adult education professionals involved in vocational education **The Reference**
