Routes To Child Language Evolutionary And Developmental Precursors:

Routes to Child Language Joanna Blake, 2000-07-03 A remarkable case study based on a detailed comparison of non human primates and human infants brings together key abilities that provide the foundation for language This link makes the case for phylogenetic continuity across species and ontogenetic continuity from infancy to childhood Examined here are the fundamental aspects of language acquisition such as vocalizations mapping of meaning on to sound use of gestures to communicate and to symbolize tool use object concept and memory This volume goes a step further to analyse the similarities and differences across species and how these influence the evolution of language The author provides evidence linking abilities associated with language acquisition and describes fascinating hypotheses about the origins of language

Child Language Barbara C. Lust, 2006-09-21 The remarkable way in which young children acquire language has long fascinated linguists and developmental psychologists alike Language is a skill that we have essentially mastered by the age of three and with incredible ease and speed despite the complexity of the task This accessible textbook introduces the field of child language acquisition exploring language development from birth Setting out the key theoretical debates it considers questions such as what characteristics of the human mind make it possible to acquire language how far acquisition is biologically programmed and how far it is influenced by our environment what makes second language learning in adulthood different from first language acquisition and whether the specific stages in language development are universal across languages Clear and comprehensive it is set to become a key text for all courses in child language acquisition within linguistics developmental psychology and cognitive science

Outside-In □ Inside-Out Costantino Maeder, Olga Fischer, William J. Herlofsky, 2005-02-28 This fourth volume of the Iconicity series is like its predecessors devoted to the study of iconicity in language and literature in all its forms Many of the papers turn the notion of iconicity inside out some suggesting that less is more others focus on the cognitive factors inside the brain that are important for the iconic phenomena that are produced in the outside world In addition this volume includes a paper related to iconicity in music and its interaction with language Other papers range from the theoretical issues involved in the evolution of language to those that offer many inside out claims such as claiming that nouns are derived from pronouns and as such should more properly be called pro pronouns Also this volume includes perhaps the first English language analysis of the iconic aspects of sound symbolism in a prayer from the Koran This is a truly interdisciplinary collection that should turn some of the notions of iconicity in language and literature outside in and inside out

The Development of Language Geoff Williams, Annabelle Lukin, 2006-03-22 This book presents a unique range of interdisciplinary work on questions of language development and evolution It makes visible the significant contribution which meaning oriented linguistics is making to debates about the origins of language from the perspective of language evolution in the species as well as language development in the child As well as linguistics in the systemic functional or Hallidayan tradition the book offers contributions from primatology psychiatry

sociology and education **The Evolution of Thought** Anne E. Russon, David R. Begun, 2007-07-23 Research on the evolution of higher intelligence rarely combines data from fields as diverse as paleontology and psychology In this volume we seek to do just that synthesizing the approaches of hominoid cognition psychology language studies ecology evolution paleoecology and systematics toward an understanding of great ape intelligence Leading scholars from all these fields have been asked to evaluate the manner in which each of their topics of research inform our understanding of the evolution of intelligence in great apes and humans The ideas thus assembled represent a comprehensive survey of the various causes and consequences of cognitive evolution in great apes The Evolution of Thought will therefore be an essential reference for graduate students and researchers in evolutionary psychology paleoanthropology and primatology **The Routledge Handbook of Systemic Functional Linguistics** Tom Bartlett, Gerard O'Grady, 2017-01-12 The Routledge Handbook of Systemic Functional Linguistics brings together internationally renowned scholars of systemic functional linguistics SFL to provide a space for critical examination of the key tenets underpinning SFL theory Uniquely it includes description of the three main strands within contemporary SFL scholarship Halliday's Introduction to Functional Grammar Martin's discourse semantics and Fawcett's Cardiff Grammar In five sections and thirty eight interdisciplinary chapters this is the first handbook to cover the whole architecture of SFL theory comprising the ontology and epistemology of SFL SFL as a clause grammar lexicogrammar below the clause and SFL's approach to constituency SFL's vibrant theory of language above the clause and SFL as a theory of praxis with real world applications With a wide range of language examples a comprehensive editors introduction and a section on further reading The Routledge Handbook of Systemic Functional Linguistics is an essential resource for all those studying and researching SFL or functional grammar **Toddler and Parent Interaction** Anna Filipi, 2009-12-17 This book provides a microanalysis of the interactions between four children and their parents starting when the children were aged 9 to 13 months and ending when they were 18 months old It tracks development as an issue for and of interaction In so doing it uncovers the details of the organisation of the sequence structure of the interactions and exposes the workings of language and social development as they unfold in everyday activities The study begins with a description of pre verbal children's sequences of action and then tracks those sequences as linguistic ability increases The analysis reveals a developing richness and complexity of the sequence structure and exposes a gap in Child Language studies that focus on the children's and their carers actions in isolation from their sequential environment By focusing on the initiating actions of both child and parent and the response to those actions and by capturing the details of how both verbal and nonverbal actions are organised in the larger sequences of talk a more complete picture emerges of how adept the young child is at co creating meaning in highly organised ways well before words start to surface The study also uncovers pursuit of a response and orientation to insufficiency and adequacy of response as defining characteristics of these early interactions **Developments in Primate Gesture Research** Simone Pika, Katja Liebal, 2012 The book is a themed

mutually referenced collection of articles from a very high powered set of authors based on the workshop on Current developments in non human primate gesture research which was held in July 2010 at the European University Viadrina Frankfurt Oder Germany The motivation for this book following on from the motivation for the workshop series was to present the state of the art in non human primate gesture research with a special emphasis on its history interdisciplinary perspectives developments and future directions This book provides for the first time in a single volume the most recent work on comparative gestural signaling by many of the major scholars in the field such as W D Hopkins D Leavens T Racine J van Hooff and S Wilcox in alphabetical order **Gestural Communication in Nonhuman and Human Primates** Katja Liebal, Cornelia Müller, Simone Pika, 2007 The aim of this volume is to bring together the research in gestural communication in both nonhuman and human primates and to explore the potential of a comparative approach and its contribution to the question of an evolutionary scenario in which gestures play a significant role Modelling Paralanguage Using Systemic Functional Semiotics Thu Ngo, Susan Hood, J. R. Martin, Clare Painter, Bradley A. Smith, Michele Zappavigna, 2021-12-02 Winner of the ASFLA Australian Systemic Functional Linguistics Association M A K Halliday Prize 2023 This book is the first comprehensive account of body language as paralanguage informed by Systemic Functional Semiotics SFS It brings together the collaborative work of internationally renowned academics and emerging scholars to offer a fresh linguistic perspective on gesture body orientation body movement facial expression and voice quality resources that support all spoken language The authors create a framework for distinguishing non semiotic behaviour from paralanguage and provide a comprehensive modelling of paralanguage in each of the three metafunctions of meaning ideational interpersonal and textual Illustrations of the application of this new model for multimodal discourse analysis draw on a range of contexts from social media vlogs to animated children s narratives to face to face teaching Modelling Paralanguage Using Systemic Functional Semiotics offers an innovative way for dealing with culture specific and context specific paralanguage
