Routing Borders Between Territories, Discourses and Practices H.Van Houtum,Eiki Berg,2018-10-24 This title was first published in 2003 This multi disciplinary reading focuses on the latent meaningful and contextual strategies that are often implied and included in bordering processes It demonstrates that the border as a concept is not so much an object but rather an ongoing process The book also consciously and provocatively balances the modernist trap of universalism exclusive ordering and state centrism and the postmodernist trap of moral nihilism Leading specialists in their fields provide illustrative case studies from Europe and Asia making a major contribution to border studies

Routing Borders Between Territories, Discourses and Practices H.Van Houtum,2017 This title was first published in 2003 This multi disciplinary reading focuses on the latent meaningful and contextual strategies that are often implied and included in bordering processes It demonstrates that the border as a concept is not so much an object but rather an ongoing process The book also consciously and provocatively balances the modernist trap of universalism exclusive ordering and state centrism and the postmodernist trap of moral nihilism Leading specialists in their fields provide illustrative case studies from Europe and Asia making a major contribution to border studies Provided by publisher

EU Enlargement, Region Building and Shifting Borders of Inclusion and Exclusion James Wesley Scott,2016-04-22 The 2004 entry of 10 Central and Eastern European countries along with Malta and Cyprus into the EU has caused a huge shift in the EU s external boundaries The socio economic and political transformations that this shift has caused not only suggest new regional development opportunities but also many potential problems and tensions While the EU insists that enlargement will not signify new divisions processes of inclusion and exclusion and the imposition of visa restrictions on non EU citizens could pose obstacles to co operation conjuring fears of an emerging fortress Europe that effectively divides the continent Illustrated with case studies from Central and Eastern European border areas this book examines capacities for region building across national borders in within the context of EU enlargement synthesizing the various insights provided by local information and suggesting ways forward for the future development of the EU s Wider Europe strategy

European Union Communities of Practice Maren Hofius,2022-12-22 This book provides a practice based analysis of European Union EU diplomacy and community building Unlike studies focusing on how EU community building proceeds centrally in Brussels this book turns to EU diplomacy in its bordering state of Ukraine At a time when the EU s internal cohesion is being put to the test this book provides novel insights into how feelings of belonging are produced amongst its members in the absence of a homogenous we Transcending the traditional dichotomy between macro structures and micro processes of interaction the book demonstrates that the EU s large scale community depends for its existence on practical instantiations of community building in distinct communities of practice Using the case of an EU diplomatic community of practice in Kyiv Ukraine takes these questions to the EU s margins highlighting that the boundaries of community are key sites in which community materialises The in depth

case study identifies diplomats boundary work as the constitutive rule that makes the local community of practice cohere and create feelings of belonging to the large scale polity of the EU This book will be of interest to researchers of European studies as well as to those working on global cooperation and international relations more broadly The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY 4.0 license

European Borderlands Elisabeth Boesen, Gregor Schnuer, 2016-11-10 The expectations of European planners for the gradual disappearance of national borders and the corresponding prognoses of social scientists have turned out to be over optimistic Borders have not disappeared not even in a unified and predominantly peaceful Europe but rather they have changed become more varied and in a certain sense mobile taking on an important role in the everyday lives of more people than ever before Furthermore it is now widely accepted that borders do not just hinder communication and the formation of relationships but also channel and prefigure them in a positive way Presenting a number of studies of everyday life in European borderlands this book addresses the multifarious and complex ways in which borders function as both barriers and bridges Focusing on established Western European borderlands with the exception of three contrasting cases the book attempts a turn from conflict to harmony in the study of borderlands and thus examines the more mundane manifestations of border life and the complex often unconscious motives of everyday cross border practices The collection of chapters demonstrates that even in the case of open political borders the border remains an enduring factor that is not adequately described as either a problematic barrier or a desirable bridge The studies look at bordering processes not only approaching them from different disciplinary angles sociology anthropology geography history political science and literary studies but also choosing different scales and making comparisons that range from different borders of one country to the reactions and attitudes of different individuals in a single borderland village

[The Routledge Research Companion to Border Studies](#) Doris Wastl-Walter, 2016-04-01 Throughout history the functions and roles of borders have been continuously changing They can only be understood in their context shaped as they are by history politics and power as well as cultural and social issues Borders are therefore complex spatial and social phenomena which are not static or invariable but which are instead highly dynamic This comprehensive volume brings together a multidisciplinary team of leading scholars to provide an authoritative state of the art review of all aspects of borders and border research It is truly global in scope and besides embracing the more traditional strands of the field including geopolitics migration and territorial identities it also takes in recently emerging topics such as the role of borders in a seemingly borderless world creating neighbourhoods and border enforcement in the post 9/11 era

[Brexit Geographies](#) Mark Boyle, Ronan Paddison, Peter Shirlow, 2020-06-29 This comprehensive volume explores the political social economic and geographical implications of Brexit within the context of an already divided UK state It demonstrates how support for Brexit not only sharpened differences within England and between the separate nations comprising the UK state but also reflected how austerity politics against which the referendum

was conducted impacted differently with north and south urban and rural becoming embroiled in the Leave vote This book explores how as the process of negotiating the secession of the UK from the EU was to demonstrate the seemingly intractable problem of the Irish border and the need to maintain a soft border provided a continuing obstacle to a smooth transition The authors in this book also explore various other profound questions that have been raised by Brexit questions of citizenship of belonging of the probable impacts of Brexit for key economic sectors including agriculture and its meaning for gender politics The book also brings to the forefront how the UK was geographically imagined a new lexicon of left behind places citizens of somewhere and citizens of nowhere conjuring up new imaginations of the spaces and places making up the UK This book draws out the wider implications of Brexit for a refashioned geography It was originally published as a special issue of the journal *Space and Polity* *Cross-Border Governance in the European Union* Barbara Hooper, Olivier

Kramsch, 2004-08-02 This volume attempts to draw debates on governance at both of these levels into spaces of cross border regionalism in Europe today Embodying both supra national and sub national dynamics of contemporary forms of governance cross border regions or euregions enable observation of the fitful progress and contradictions of the multilevel polity that is contemporary Europe Including case studies from throughout the EU as exemplars of specific border regimes the volume identifies the practical and theoretical importance of governing in Europe's new cross border territories as part of a newly reinvigorated regional question In Europe's euregions it is argued issues of democracy identity sovereignty citizenship and scale must be rethought when a border runs through it This book utilises a diversity of perspectives and a range of selected case studies to examine modes of governance emerging across the nation state borders of Europe It will interest students and researchers of European Union borders *The EU-Ukraine Association Agreement and Its Impacts on Cross-Border Cooperation* Martin Lačný, 2021-08-03

The implementation of the Association Agreement AA including the Deep and Comprehensive Free Trade Area DCFTA between the EU and Ukraine has brought about a qualitatively new situation in the development of border regions and regional societies on both sides of the Schengen border This volume's comparative study of the impacts of the AA and the DCFTA on borderlands in Ukraine Poland Slovakia Hungary and Romania will contribute to the identification of new opportunities for cross border cooperation and policy considerations for its further development

Myanmar's Mountain and Maritime Borderscapes Su-Ann Oh, 2016-08-16 This edited volume adds to the literature on Myanmar and its borders by drawing attention to the significance of geography history politics and society in the construction of the border regions and the country First it alerts us to the fact that the border regions are situated in the mountainous and maritime domains of the country highlighting the commonalities that arise from shared geography Second the book foregrounds socio spatio practices e economic intimate spiritual virtuale of border and boundary making in their local context This demonstrates how state defined notions of territory borders and identity are enacted or challenged Third despite sharing common features Myanmar's borderscapes also possess unique configurations of ethnic political and

economic attributes producing social formations and figured worlds that are more cohesive or militant in some border areas than in others Understanding and comparing these social practices and their corresponding life worlds allows us to re-examine the connections from the borderlands back to the hinterland and to consider the value of border and boundary studies in problematizing and conceptualizing recent changes in Myanmar
