Royal Navy Aircraft Serials And Units 1911 TO 1919:

The Royal Navy's Air Service in the Great War David Hobbs, 2017-09-30 In a few short years after 1914 the Royal Navy practically invented naval air warfare not only producing the first effective aircraft carriers but also pioneering most of the techniques and tactics that made naval air power a reality By 1918 the RN was so far ahead of other navies that a US Navy observer sent to study the British use of aircraft at sea concluded that any discussion of the subject must first consider their methods Indeed by the time the war ended the RN was training for a carrier borne attack by torpedo bombers on the German fleet in its bases over two decades before the first successful employment of this tactic against the Italians at Taranto Following two previously well received histories of British naval aviation David Hobbs here turns his attention to the operational and technical achievements of the Royal Naval Air Service both at sea and ashore from 1914 to 1918 Detailed explanations of operations the technology that underpinned them and the people who carried them out bring into sharp focus a revolutionary period of development that changed naval warfare forever Controversially the RNAS was subsumed into the newly created Royal Air Force in 1918 so as the centenary of its extinction approaches this book is a timely reminder of its true significance

The Development of British Naval Aviation, 1914-1918 Alexander Howlett, 2021-06-08 The Royal Naval Air Service RNAS revolutionized warfare at sea on land and in the air This little known naval aviation organization introduced and operationalized aircraft carrier strike aerial anti submarine warfare strategic bombing and the air defence of the British Isles more than 20 years before the outbreak of the Second World War Traditionally marginalized in a literature dominated by the Royal Flying Corps and the Royal Air Force the RNAS and its innovative practitioners nevertheless shaped the fundamentals of air power and contributed significantly to the Allied victory in the First World War The Development of British Naval Aviation utilizes archival documents and newly published research to resurrect the legacy of the RNAS and demonstrate its central role in Britain's war effort

Royal Navy Aircraft Serials and Units 1911 to 1919 Ray Sturtivant, Gordon Page, 1992 **Aircraft of the Royal Navy** David Hobbs, 2024-11-30 This is a comprehensive study of every aircraft type ordered for the Royal Navy since 1908 It includes fixed and rotary wing aircraft rigid and non rigid airships unmanned aircraft and pilotless target aircraft together with many designs that were ordered but not built so that the importance placed on them by the Naval Staff or their potential technological impact on carrier design and operations can be explained Every type even unsuccessful single prototypes is described the majority are illustrated by photographs many of which come from the author's own collection and the fifty most significant aircraft have detailed drawings The Australian and Canadian Fleet Air Arms operated RN aircraft types for many years after their formation and these are included together with other types they have operated subsequently to give a more complete overview The book describes over 400 different types of aircraft built by over 100 different manufacturers to offer the most detailed coverage of RN aircraft ever produced Research for the book took over forty years and reference material included Admiralty Archives and

an array of material in the public domain including manufacturers data individual aircraft pilot s notes and a wealth of published sources David Hobbs is uniquely well placed to write this book having served in the RN for thirty three years and retired with the rank of Commander He flew both fixed and rotary wing aircraft and his log book contains 2300 flying hours with 807 day and night deck landings He served in seven British aircraft carriers and spent four years within RN Director General Aircraft Department where he was closely involved with Sea Harrier carrier trials and introduced new visual landing aids for night recoveries and liaised with the USN on carrier operating techniques This is his eleventh book for Seaforth Publishing

A Century of Carrier Aviation David Hobbs,2009-03-19 It is now almost exactly a hundred years since a heavier than air craft first took off and landed on a warship and from the very beginning flying at sea made unique demands on men and machines As warplanes grew larger faster and heavier air operations from ships were only possible at all through constant development in technology techniques and tactics This book charts the progress and growing effectiveness of naval air power concentrating on the advances and inventions most of them British that allowed shipborne aircraft to match their land based counterparts and looking at their contribution to 20th century warfare Written by a retired Fleet Air Arm pilot and an award winning historian of naval flying this is a masterly overview of the history of aviation in the world s navies down to the present day Heavily illustrated from the author s comprehensive collection of photographs the book will be essential reading to anyone with an interest in navies or air power

The Royal Navy Since 1815 Eric Grove,2017-03-11 This book fills an important gap in the literature on the history of the modern Royal Navy Eric Grove provides the only up to date single authored short history of the service over the last two hundred years synthesizing the new work and latest research on the subject which has radically transformed our understanding of the story of British naval development Grove offers a concise and authoritative account of Royal Navy policy structure technical development and operations from the end of the Napoleonic Wars to the close of the eventful twentieth century Ideal for both specialist and general readers this essential introduction explains how the Royal Navy maintained its pre eminent position in the nineteenth century and how it coped with the more difficult problems of the twentieth in times of peace and war

British Naval Aviation Dr Tim Benbow,2013-07-28 In 1909 the British Admiralty placed an order for a rigid airship marking the beginning of the Royal Navy s involvement with airpower This collection charts the Navy s involvement with aviation over the following century and the ways in which its rapid expansion and evolution radically altered the nature of maritime power and naval strategy Drawing on much new historical research the collection takes a broadly chronological approach which allows a scholarly examination of key themes from across the history of British naval aviation The subjects tackled include long standing controversies over the control of naval air power crucial turning points within British defence policy and strategy the role of naval aviation in limited war and discussion of campaigns such the contribution of the Fleet Air Arm in the Mediterranean and Pacific theatres of the Second World War that have hitherto received relatively little attention The collection concludes with a discussion of

recent debates surrounding the Royal Navy's acquisition of a new generation of carriers setting the arguments within an historical context. Taken as a whole, the volume offers fascinating insights into the development of a key aspect of naval power as well as shedding new light on one of the most important aspects of Britain's defence policy and military history. By simultaneously addressing historical and current political debates, it is sure to find a ready audience and stimulate further discussion.

Genesis of the Grand Fleet Christopher Buckey, 2021-05-15

Genesis of the Grand Fleet: The Admiralty, Germany and the Home Fleet 1896-1914 tells the story of the prewar predecessor to the Royal Navy's war-winning Grand Fleet, the Home Fleet. Established in early 1907 by First Sea Lord Sir John Fisher, the Home Fleet combined an active core of powerful armored warships with a unification of the various reserve divisions of warships previously under the control of the three Royal Navy home port commands. Fisher boasted that the new Home Fleet would be able to counter the growing German Hochseeflotte. While these boasts were accurate, they were not the sole motivation behind the Home Fleet's establishment. The Liberal Party's landslide victory in the 1906 General Election made fiscal economy on the part of the Admiralty even more important than before, and this significantly influenced the Home Fleet's creation. Subsequently, the Home Fleet suffered a sustained campaign of criticism by the commander in chief of the Channel Fleet, Lord Charles Beresford. This campaign ruined many careers, including Beresford's, and resulted in the assimilation of the Channel Fleet into the Home Fleet in 1909. From 1910 onward, the Home Fleet steadily evolved and became the most important single command in the Royal Navy, and the Home Fleet's successive commanders in chief had influence on strategic policy rivaled only by the Board of Admiralty. The last prewar commander of the Home Fleet, Admiral Sir George Callaghan, achieved this influence by impressing the civilian head of the Admiralty, Winston Churchill. A driven reformer, Churchill's influence was almost as important as Fisher's. Against this backdrop of political drama, *Genesis of the Grand Fleet: The Admiralty, Germany and the Home Fleet 1896-1914* explains how Britain maintained its maritime preeminence in the early twentieth century. As Christopher Buckey describes, the fleet sustained Britain and her allies' path to victory in World War I.

Italian and Austro-Hungarian Military Aviation On the Italian Front In World War One, *The British Hawkins Class Cruisers* Aidan Dodson, 2025-02-04

During the First World War, rumors of heavily armed German raiders led to the building of the first modern heavy cruisers by the Royal Navy. Named for famous Elizabethan seamen, they were very different from the lumbering armored cruisers of the previous generation and were enlarged developments of the highly successful light cruisers that had been built since the mid-1910s. As such, they provided the prototypes for the Washington Treaty cruisers that dominated naval construction during the 1920s, with two of them also pioneering the use of the catapult for launching aircraft from cruisers. Completed too late to actively participate in the First World War, they would go on to have mixed fortunes: spending much of their careers as flagships but also being sadly attracted to rocky reefs in two cases with fatal results. One, *Cavendish*, later *Vindictive*, fulfilled a remarkable array of functions during her career laid down as a cruiser.

completing as an aircraft carrier then reverting to a cruiser to be further transformed into a dedicated cadet training ship and finally a repair ship Meanwhile Effingham underwent the most comprehensive rebuilding of any British cruiser of her era Disarmed and nearly scrapped as a result of the London Naval Treaty all the survivors nevertheless returned to serve during the Second World War in a range of roles two gaining battle honors albeit in one case fatally during the Norwegian campaign and Hawkins and Frobisher spending long years as deep sea escorts in the South Atlantic and Indian Oceans before being brought back to bombard the beaches of Normandy The story of the Hawkins class therefore weaves strands that include the technical development of the cruiser in the UK and abroad the early use of aircraft at sea international naval diplomacy and treaty-making between the wars the evolution of the cadet training regime in the Royal Navy the way in which the vital southern and eastern trade routes were kept open and the contribution of naval forces to the success of the invasion of Europe With its detailed descriptions and analysis of the ships and their development and the narratives of their careers all tied together with a wide ranging collection of photographs and line drawings this new history of a distinguished Royal Navy cruiser class will delight naval historians and enthusiasts ship modelers and all those who care to read about the exploits of the imperial navy in peace and war
