Michael Jaffé, Peter Paul Rubens

Rubens And Italy:

Rubens and Italy Michael Jaffé, 1977 **Rubens Drawing on Italy** Jeremy Wood, Djanogly Art Gallery, 2002 Peter Paul Rubens was one of the most inventive and prolific artists in the history of western art After his early training in Antwerp Rubens spent formative periods in Italy between 1600 and 1608 This book explores the ways in which Rubens studied copied and adapted the work of artists such as Michelangelo Raphael and Titian A large group of drawings by Italian artists many of which were owned by Rubens and extensively transformed by him are illustrated These works show how Rubens's dialogue with Italian art went far beyond mere imitation and how his copies and adaptations attracted the attention of scholars and collectors from his lifetime onwards The intriguing book has been written by one of the foremost Rubens scholars Jeremy Wood lecturer in the history of art at the University of Nottingham 21 colour 78 b w illustrations *Rubens in Italy: Rediscovered Works* Michael Jaffé, 1958 *Rubens and Italy* Michael Jaffé, Peter Paul Rubens, 1977

Seventeenth-century Art & Architecture Ann Sutherland Harris, 2005 Encompassing the socio political cultural background of the period this title takes a look at the careers of the Old Masters and many lesser known artists The book covers artistic developments across six countries and examines in detail many of the artworks on display **Rubens in Italy** Melissa Hines, 1998 The Challenge of Emulation in Art and Architecture David Mayernik, 2016-04-01 Emulation is a challenging middle ground between imitation and invention The idea of rivaling by means of imitation as old as the Aeneid and as modern as Michelangelo fit neither the pessimistic deference of the neoclassicists nor the revolutionary spirit of the Romantics Emulation thus disappeared along with the Renaissance humanist tradition but it is slowly being recovered in the scholarship of Roman art It remains to recover emulation for the Renaissance itself and to revivify it for modern practice Mayernik argues that it was the absence of a coherent understanding of emulation that fostered the fissuring of artistic production in the later eighteenth century into those devoted to copying the past and those interested in continual novelty a situation solidified over the course of the nineteenth century and mostly taken for granted today This book is a unique contribution to our understanding of the historical phenomenon of emulation and perhaps more importantly a timely argument for its value to contemporary practice Re-Reading Leonardo Claire Farago, 2017-07-05 For nearly three centuries Leonardo da Vinci's work was known primarily through the abridged version of his Treatise on Painting first published in Paris in 1651 and soon translated into all the major European languages Here for the first time is a study that examines the historical reception of this vastly influential text This collection charts the varied interpretations of Leonardo's ideas in French Italian Spanish English German Dutch Flemish Greek and Polish speaking environments where the Trattato was an important resource for the academic instruction of artists one of the key sources drawn upon by art theorists and widely read by a diverse network of artists architects biographers natural philosophers translators astronomers publishers engineers theologians aristocrats lawyers politicians entrepreneurs and collectors The cross cultural approach employed

here demonstrates that Leonardo's Treatise on Painting is an ideal case study through which to chart the institutionalization of art in Europe and beyond for 400 years. The volume includes original essays by scholars studying a wide variety of national and institutional settings. The coherence of the volume is established by the shared subject matter and interpretative aim to understand how Leonardo's ideas were used. With its focus on the active reception of an important text overlooked in studies of the artist's solitary genius, the collection takes Leonardo studies to a new level of historical inquiry. Leonardo da Vinci's most significant contribution to Western art was his interpretation of painting as a science grounded in geometry and direct observation of nature. One of the most important questions to emerge from this study is what enabled the same text to produce so many different styles of painting.

Rubens Jeremy Wood, 2010. This book is divided into three parts. The first volume is focused on the copies and adaptations that Rubens made from the work of Raphael and three younger artists: Giulio Romano, Polidoro da Caravaggio, and Perino del Vaga, who worked with him in Rome before moving to art centres elsewhere.
