

Improving fisheries sustainability

State agencies often have less resources than federal agencies, and data limitations represent a critical challenge to fisheries management in the United States

Fisheries Management Index (FMI)

We applied the FMI as a tool to track and evaluate non-federal fisheries management performance, which can help managers prioritize fisheries for management attention

Prioritization → attention → solutions

Management prioritization and partnerships with fishing communities can boost resources and management capabilities, improve data collection, close critical information gaps, and ultimately produce healthier fisheries

60%

of fisheries surveyed are not actively managed

80%

of fisheries surveyed have unknown health status
