of low life in the capital and Mary Shelley created in *Frankenstein* one of the enduring myths of scientific advance. The Companion revitalizes canonical Romantic figures in the context of the historical events, political and linguistic debates, commercial pressures and plebeian subcultures of their day as well as bringing back into historical focus individuals and events whose impact has often been muffled or forgotten. With over 100 integrated illustrations, bibliographies accompanying all the major essays and an index to Part 1, this is the most comprehensive volume of its kind, offering a unique breadth of information to scholars and students of eighteenth and nineteenth century British culture, literature and history.

Nature in Ireland, John Wilson Foster, Helena C. G. Chesney, 1998. How has Irish nature been studied? How has it been expressed in literature and popular culture? How has it influenced and been influenced by political, economic and social change? These long neglected questions are pursued in *Nature in Ireland*, a pioneering collection of original essays by leading naturalists, science writers and cultural historians who bring us from the geological prehistory of Ireland to the environmental threats of the late twentieth century.
