Self And Identity Perspectives Across The Lifespan:

Self and Identity Terry Honess, Krysia M. Yardley, 2003-08-16 This volume reflects the renewal of interest in Self and Identity among social scientists. It adopts an interdisciplinary approach to explore different perspectives across the lifespan from the neonate to the elderly adult. Self-Perspectives across the Life Span Richard P. Lipka, Thomas M.

Brinthaup, 1992-07-01 When and how is the self acquired and what characterizes its development and change over the life span? What are the implications of using different methodologies to study the self with different age groups? This book addresses these and related questions. The authors offer research on early and middle childhood, late childhood and adolescence, and adulthood and old age. Among the issues considered are the relationship between cognitive complexity and self evaluation in childhood, the pivotal socio-emotional tasks that confront the adolescent, and effects of situational and structural factors on the self-esteem of adolescents and adults, and age and gender differences in the ideal and undesired selves of young and older adults. These contributions illustrate the different theoretical and methodological issues that are associated with differing stages of the life span and provide a summary of the current knowledge base of the self across the life span. Unlike previous books on study of the self, this one provides a systematic analysis of the theoretical and methodological issues and a selection of several alternative methodologies for studying the self across the life span.

Advances in Psychology Research Alexandra Columbus, 2005 Advances in Psychology Research presents original research results on the leading edge of psychology. Each chapter has been carefully selected in an attempt to present substantial advances across a broad spectrum. Understanding Early Adolescent Self and Identity Thomas M. Brinthaup, Richard P.

Lipka, 2012-02-01 What are the major self and identity concerns for early adolescents? What are the applications and interventions that can address those concerns, helping to ease the transition into later adolescence and adulthood? Providing a broad and interdisciplinary approach to studying the self, the contributors emphasize the practical implications of their work for understanding early adolescent self and identity and for designing interventions that facilitate development and adjustment. The book consists of four major sections in which contributors address conceptual issues, school transitions, peer and behavioral problems, and intervention programs. Self and Identity Yoshihisa Kashima, Margaret Foddy, Michael

Platow, 2002-04-01 This edited volume outlines the latest meta-theoretical and theoretical contexts of self research. Self and Identity examines theoretical accounts of human experience within the contemporary socio-cultural milieu and attempts to answer the question of what it means to be human. It provides a clear structure within which to conceptualize contemporary empirical research on self and identity in terms of personal, social, and symbolic aspects. In so doing, it identifies the symbolic aspect as an emerging area of contemporary significance. Featuring contributions from a distinguished group of scholars and therapists, the book is organized into four parts. The editors provide section introductions to demonstrate how each chapter relates to the book's overall theme, as well as how the chapter authors responded to the editors' charge to go beyond the

social cognitive theory of the self Part I describes the current meta theoretical context of self research the editors interpretation of the social cognitive approach to the self and an emerging alternative theory the Connectionist Approach Part II highlights personal perspectives on selfhood Part III focuses on social perspectives and Part IV reviews symbolic processes The concluding chapter reviews the book s major themes with overlapping themes and intellectual disputes The book is intended for graduate students and researchers in social and personality psychology interested in self and identity and self research It may also be used as a supplemental text in advanced level courses on self and identity

Gender, Work, and Harness Racing Elizabeth Anne Larsen, 2014-11-19 While gender equality has progressed in many sports since the second wave of the feminist movement in terms of women s inclusion participation and success harness horse racing has been recalcitrant to change *Gender Work and Harness Racing* Fast Horses and Strong Women in Southwestern Pennsylvania investigates the stories of women involved in harness racing to expose how they use the uniqueness of their situation to work for positive change With stirring accounts of the strong women who are surviving and sometimes succeeding in harness horse racing Elizabeth Anne Larsen s analysis provides insight for studies of gender and work occupational sex segregation and women s studies

Self and Identity--psychosocial Perspectives Krysia M. Yardley-Matwiejczuk, Krysia Yardley, Terry Honess, 1987 This study of self is a growing concern within psychology and related disciplines particularly in social and clinical psychology psychiatry and personality studies

Identity and Health David Kelleher, Gerard Leavey, 2004-07-31 Experiences of health and illness are fundamental to how we understand ourselves and the postmodern obsession with body image has made health even more significant in identity formation The study of subjective experiences of health and illness can also provide a challenge to traditional objective medical knowledge and given current healthcare interest in user involvement can highlight the need for change in health service provision This book explores the interplay between identity and health private and public mind and body Drawing on new material and using and exploring innovative biographical and narrative methods it covers a broad range of identities in relation to health and illness including race religion ethnicity disability age body image sexuality and gender *Identity and Health* will be of great interest to academics researchers and students of sociology medical anthropology health and psychology

The School Years John Coleman, 2012-12-06 *The School Years* provides a challenging and lively collection of essays on key issues affecting young people in the school setting It is an essential book for all those concerned with adolescence and education Since the first edition in 1979 major social changes such as unemployment AIDS issues of race and gender and increasing divorce rates have had a direct impact on education and young people With these dramatic changes in mind the contributors take an entirely new and up to date approach to current controversial issues such as the relationship of home and school gender roles morality delinquency and peer groups Contributors include John Coleman Trust for the Study of Adolescence T Honess School of Psychology University of Wales Peter Kutnick Department of Education University of Sussex Sally Archer Trenton State College USA Philida Salmon

Institute of Education University of London Maurice Chazan David P Farrington Institute of Criminology Cambridge **The Development of Social Cognition** Suzanne Hala, 2013-11-12 The Development of Social Cognition presents a lively up to date examination of both the classical issues and contemporary understanding of theory and research in social cognitive development The initial chapters highlight one of the central theoretical tensions in the field which is whether the development of understanding people is fundamentally different from understanding things Subsequent chapters are devoted to development across specific areas of social cognition from infancy through to adolescence The text ends with a comprehensive examination of the development of moral aspects of social cognition
