Lord Were Just Trying To Save Your Water:

Show Thyself a Man Mixon, Gregory, 2016-07-25 In *Show Thyself a Man* Gregory Mixon explores the ways African Americans in postbellum Georgia used the militia as a vehicle to secure full citizenship respect and a more stable place in society. As citizen soldiers, black men were empowered to get involved in politics, secure their own financial independence, and publicly commemorate black freedom with celebrations such as Emancipation Day. White Georgians, however, used the militia as a different symbol of freedom to ensure the postwar white right to rule. This book is a forty-year history of black militia service in Georgia and the determined disbandment process that whites undertook to destroy it, connecting this chapter of the post-emancipation South to the larger history of militia participation by African descendant people through the Western hemisphere and Latin America.

Southern Waters Craig E. Colten, 2014-10-13 Water has dominated images of the South throughout history, from Hernando de Soto's 1541 crossing of the Mississippi to tragic scenes of flooding throughout the Gulf South after Hurricane Katrina. But these images tell only half the story, as urban industrial and population growth create unprecedented demands on water in the South; the problems of pollution and water shortages grow ever more urgent. In *Southern Waters: The Limits to Abundance*, Craig E. Colten addresses how the South, in an environment fraught with uncertainty, can navigate the twin risks of too much water and not enough. From the arrival of the first European settlers, the South's inhabitants have pursued a course of maximum exploitation and control of the area's plentiful waters, investing widely in wetland drainage and massive flood control projects. Disputes over southern waterways go back nearly as far: obstruction of fish migration by mill dams prompted new policies to protect aquatic life as early as the colonial era. Colten argues that such conflicts, which have heightened dramatically since the explosive urbanization of the mid-twentieth century, will only become more frequent and intense, making the shift toward sustainable use a national imperative. In tracing the evolving uses and abuses of southern waters, Colten offers crucial insights into the complex historical geography of water throughout the region. A masterful analysis of the ways in which past generations harnessed and consumed water, *Southern Waters* also stands as a guide to adapting our water usage to cope with the looming shortage of this once-abundant resource.

Alabama Rivers, A Celebration and Challenge William G. Deutsch, 2019-06-18 *ALABAMA RIVERS: A CELEBRATION AND CHALLENGE* invites you to travel down rivers and through time to encounter the rich human history and natural wonders that have defined Alabama. Along the way, you will celebrate an array of magnificent rivers filled with unique plants and animals shaped over the ages by a remarkably diverse geology. You will appreciate how rivers have served people from the first Paleo-Indian settlements to the present. The Seedtime, the Work, and the Harvest Jeffrey L. Littlejohn, Reginald K. Ellis, Peter B. Levy, 2019-10-07 This volume s contributors expand the chronology and geography of the black freedom struggle beyond the traditional emphasis on the Jim Crow South and the years between 1954 and 1968 Beginning as far back as the nineteenth century and analyzing case studies from southern northern and border states the essays in *The Seedtime the Work and the Harvest* incorporate communities and topics not usually linked to the African American civil rights movement The collection opens with a biographical sketch of Thomas DeSaille Tucker an educational pioneer who served as the first president of Florida State Normal and Industrial School for Colored Students It then highlights the work of black women including

Bostonian publisher Josephine St Pierre Ruffin who defied local governments during the Progressive Era by disseminating medical information and providing access to medical professionals Next the collection explores the life and work of Norfolk civil rights attorney James F Gay who helped to democratize the political establishment in Virginia s largest city but became a victim of his own success The collection then moves to York Pennsylvania to examine a 1969 riot that went mostly unnoticed until the town s mayor was charged more than thirty years later with the riot related murder of Lillie Belle Allen Also featured is an essay examining the Student Nonviolent Coordinating Committee s Food for Freedom campaign that aimed to complement voter registration work in Mississippi by providing everyday sustenance to African Americans Addressing more recent issues this volume considers the politics of public memory in Baltimore Maryland a city divided by racial riots in 1968 and in 2015 It then examines the Black Lives Matter movement that gained international attention for its response to Michael Brown s death at the hands of police in Ferguson Missouri as well as the Sandra Bland Movement inspired by the arrest of Bland and her subsequent death in the Waller County jail in rural Texas These chapters connect the activism of today shaped in so many ways by social media student activism and grassroots organization to a deeply historical wide ranging fight for equality

Southern Water, Southern Power Christopher J. Manganiello, 2015-04-06 Why has the American South a place with abundant rainfall become embroiled in intrastate wars over water Why did unpredictable flooding come to characterize southern waterways and how did a region that seemed so rich in this all important resource become derailed by drought and the regional squabbling that has tormented the arid American West To answer these questions policy expert and historian Christopher Manganiello moves beyond the well known accounts of flooding in the Mississippi Valley and irrigation in the West to reveal the contested history of southern water From the New South to the Sun Belt eras private corporations public utilities and political actors made a region defining trade off The South would have cheap energy but it would be accompanied by persistent water insecurity Manganiello s compelling environmental history recounts stories of the people and institutions that shaped this exchange and reveals how the use of water and power in the South has been challenged by competition customers constituents and above all nature itself
