New International Dictionary, 1920 Bird Notes, 1910 *The Avicultural Magazine*, 1908 **Parrots of Australasia** Charles Barrett, 1949 *Nests and Eggs of Australian Birds* Archibald James Campbell, 1901 Thinking like a Parrot Alan B. Bond, Judy Diamond, 2019-07-02

From two experts on wild parrot cognition a close look at the intelligence social behavior and conservation of these widely threatened birds People form enduring emotional bonds with other animal species such as dogs cats and horses For the most part these are domesticated animals with one notable exception many people form close and supportive relationships with parrots even though these amusing and curious birds remain thoroughly wild creatures What enables this unique group of animals to form social bonds with people and what does this mean for their survival In *Thinking like a Parrot* Alan B Bond and Judy Diamond look beyond much of the standard work on captive parrots to the mischievous inquisitive and astonishingly vocal parrots of the wild Focusing on the psychology and ecology of wild parrots Bond and Diamond document their distinctive social behavior sophisticated cognition and extraordinary vocal abilities Also included are short vignettes field notes on the natural history and behavior of both rare and widely distributed species from the neotropical crimson fronted parakeet to New Zealand's flightless ground dwelling kakapo This composite approach makes clear that the behavior of captive parrots is grounded in the birds wild ecology and evolution revealing that parrots ability to bond with people is an evolutionary accident a by product of the intense sociality and flexible behavior that characterize their lives Despite their adaptability and intelligence however nearly all large parrot species are rare threatened or endangered To successfully manage and restore these wild populations Bond and Diamond argue we must develop a fuller understanding of their biology and the complex set of ecological and behavioral traits that has led to their vulnerability Spanning the global distribution of parrot species *Thinking like a Parrot* is rich with surprising insights into parrot intelligence flexibility and even in the face of threats resilience

Floral Biology attempts to show how floral biologists conduct their experiments and what techniques they employ in floral biology The techniques employed include those of physics chemistry physiology psychology genetics and ecology and so constitute a broad training in biology that may be useful and acceptable in other fields Organized into 11 chapters this book begins with a discussion on sex in flowers the biology of the floral parts agencies of pollination and the pollen nectar and

nectaries Some chapters follow on pollination by birds bats and insects The features of entomophilous flowers and isolating mechanisms in flowers are also described Some hints for students such as the tools required how to make them and a schedule of procedure for examining the floral biology of a species are given in the last chapter This book will attract workers who armed with the techniques and stimulated by the findings of the investigators can introduce the floral biology to other fields
