Garden Exhibition showcased the latest in timesaving appliances modern furniture and cutting edge building techniques meant to represent the future and ideals of Southern California living Model and tract home exhibitions like those at Leimert Park inspired a new generation of homebuyers Designed to house the masses multi family developments like the Zigzag Moderne style Val d Amour were benchmarks for their time Join author Ruth Wallach on a tour of the varied Modernist styles that give Los Angeles its distinct residential landscape By-Right, By-Design Liz Falletta,2019-06-26 Housing is an essential but complex product so complex that professionals involved in its production namely architects real estate developers and urban planners have difficulty agreeing on good housing outcomes Less than optimal solutions that have resulted from a too narrow focus on one discipline over others are familiar high design that is costly to build that makes little contribution to the public realm highly profitable but seemingly identical cookie cutter dwellings with no sense of place and well planned neighborhoods full of generically designed unmarketable product types Differing roles languages and criteria for success shape these perspectives which in turn influence attitudes about housing regulation Real estate developers for example prefer projects that can be built as of right or by right meaning that they can be approved quickly because they meet all current planning zoning and building code requirements Design focused projects heretofore by design by contrast often require time to challenge existing regulatory codes pursuing discretionary modifications meant to maximize design innovation and development potential Meanwhile urban planners work to establish and mediate the threshold between by right and by design processes by setting housing standards and determining appropriate housing policy But just what is the right line between by right and by design By Right By Design provides a historical perspective conceptual frameworks and practical strategies that cross and connect the diverse professions involved in housing production The heart of the book is a set of six cross disciplinary comparative case studies each examining a significant Los Angeles housing design precedent approved by variance and its associated development type approved as of right Each comparison tells a different story about the often hidden relationships among the three primary disciplines shaping the built environment some of which uphold and others of which transgress conventional disciplinary stereotypes *Architects Who Built Southern California* Antonio Gonzalez,2019-03-11 In the early 1900s the population of Southern California exploded and the cities grew at such a rapid pace that builders could hardly keep up Among those who settled in the area were ten architects looking to make their marks on the world Claud Beelman a man who never received a college degree would go on to design the Elks Lodge in Los Angeles Albert C Martin architect of Grauman s Million Dollar Theater founded a company that is still going strong more than one hundred years later and Julia Morgan the first woman architect licensed in California was hired by William Randolph Hearst to design the Examiner Building Join author Antonio Gonzalez as he tells the stories of the people behind some of Southern California s most iconic buildings *Freestyle, the New Architecture and Interior Design from Los Angeles* Tim Street-Porter,1986 More than just a stunning book on radical design this is also an affectionate yet serious look at what s
