Lost Fields:

Structure of Typical American Oil Fields American Association of Petroleum Geologists, 1929 **Geology and Technology of the California Oil Fields** Ralph Arnold, Valentin R. Garfias, 1914 **ePro** Brian Tiplady, 2016-05-13 Patient self reported data has become increasingly important in today's clinical trials. Trials in some disease indications rely upon patient recorded diary data as the primary endpoint to demonstrate drug efficacy including for example indications such as insomnia, migraine and pain. In addition, improvements in quality of life measured using patient questionnaires can now be included as claims on drug labelling. Traditionally, these data have been collected using paper questionnaires and diaries issued to subjects. Regulators and the industry have become increasingly aware of the limitations of recording patient reported outcomes data on paper, including data quality and integrity issues. As a result, there is a growing interest in collection of patient reported outcomes data using electronic means. ePRO Solutions include handheld PDAs, Interactive Voice Response (IVR) systems and other site based hardware such as touchscreen PCs. Recently, there has been much open debate with the regulators around the use of ePRO in clinical drug submissions. US and European agencies have approved new drugs that have included ePRO data in the submission dossier, but there are many questions around the adoption of the technology that concern the community. These include: How should instruments developed on paper be adapted for electronic use and what degree of validation should be done between paper and electronic forms? How can researchers ensure they are complying with regulatory requirements including the PRO guidance published by FDA in 2009 when using ePRO solutions? Can fewer patients be exposed in a clinical trial as a result of improved data quality obtained using electronic diaries? What type of solution should be used for certain patient populations and protocols and how can ePRO solutions be designed optimally to increase patient acceptability and compliance? Bill Byrom and Brian Tiplady's ePro addresses all these issues, reviews the new FDA guidance and provides a very contemporary view on this important subject.

Writing Apache Modules with Perl and C Lincoln Stein, Doug MacEachern, 1999. Apache is the most popular web server on the Internet because it is free, reliable, and extensible. The availability of the source code and the modular design of Apache makes it possible to extend web server functionality through the Apache API. For the most part, however, the Apache API has only been available to C programmers and requires rebuilding the Apache server from source. mod_perl, the popular Apache module used primarily for enhanced CGI performance, changed all that by making the Apache API available to Perl programmers. With mod_perl, it becomes simple to develop Apache modules with Perl and install them without having to rebuild the web server. Writing

Apache Modules with Perl and C shows how to extend web server capabilities regardless of whether the programming language is Perl or C The book explains the design of Apache mod_perl and the Apache API It then demonstrates how to use them to perform for tasks like the following Rewriting CGI scripts as Apache modules to vastly improve performance Server side filtering of HTML documents to embed special markup or code much like SSI Enhancing server log functionality Converting file formats on the fly Implementing dynamic navigation bars Incorporating database access into CGI scripts Customizing access control and authorization to block robots or to use an external database for passwords The authors are Lincoln Stein and Doug MacEachern Lincoln is the successful author of How to Set Up and Maintain a World Wide web Site and the developer of the widely used Perl CGI pm module Doug is a consultant and the creator of the innovative mod_perl Apache module

Country Women Cope with Hard Times Melissa A. Walker, 2012-10-15 Rare glimpses into the hardscrabble lives of rural Southern women and a model for oral history practice It was hard times French Carpenter Clark recalls a sentiment unanimously echoed by the sixteen other women who talk about their lives in *Country Women Cope with Hard Times* Born between 1890 and 1940 in eastern Tennessee and western South Carolina these women grew up on farms in labor camps and in remote towns during an era when the region's agricultural system changed dramatically As daughters and wives they milked cows raised livestock planted and harvested crops worked in textile mills sold butter and eggs preserved food made cloth sewed clothes and practiced remarkable resourcefulness Their recollections paint a vivid picture of rural life in the first half of the twentieth century for a class of women underrepresented in historical accounts Through her edited interviews with these women Melissa Walker provides firsthand descriptions of the influence of modernization on ordinary people struggling through the agricultural depression of the 1920s and 1930s and its aftermath Their oral histories make plain the challenges such women faced and the self sacrificing ways they found to confront hardship While the women detail the difficulties of their existence the drought years early freezes low crop prices and tenant farming they also recall the good times and the neighborly assistance of well developed mutual aid networks of which women were the primary participants

Under The Blade Thomas Lyson, 2018-05-04 *Under the Blade* The Conversion of Agricultural Landscapes examines the patterns causes and consequences of current land use decisions in the United States particularly the conversion of farmland to housing roads and other development Changes in land use are the result of complex interactions among law economics landscape characteristics social and political forces ethics and aesthetics By examining farmland loss

from each of these perspectives and then integrating the results into policy recommendations Under the Blade makes an important contribution to the ongoing debate on the optimal use of a finite resource land In 1998 the last farm in Des Plaines Illinois was subdivided Seven acres along the Niobrara River in north central Nebraska sold for USD5700 per acre twenty times the price for agricultural use Waukesha County Wisconsin although still largely in agriculture has been almost entirely zoned for small lot subdivisions Nationwide the cumulative effect of thousands of individual land use decisions is an orgiastic devouring of the countryside that consumes at least 1 4 million acres of rural land each year and fragments a much larger area The effects on landscape functions include loss of agricultural production water pollution increases in local runoff and flooding loss of habitat and biodiversity and the loss of natural beauty In exchange we get malls retail strips and an ugly sprawl that degrades people and community How have we come to this and more importantly how might we find a better sustainable approach to the use of land Land use decisions are the result of complex interactions among law economics landscape characteristics population growth social and political forces ethics and aesthetics Under the Blade The Conversion of Agricultural Landscapes examines the loss of farmland and other rural lands from each of these perspectives and shows how interactions among different factors greatly complicate sustainable land management Included throughout the seven main chapters of the book are descriptions of some of the tools and strategies that can be used to preserve farmland and guide development The application of these tools is illustrated by 22 case studies of towns and regions throughout the United States each with a somewhat different challenge response and degree of success or failure Dietrich Bonhoeffer a Protestant theologian hanged by the Nazis in 1945 stated that the ultimate test of a moral society is the kind of world that it leaves to its children Our current choices in the use of the land are among the most important factors shaping that future world and Under the Blade demonstrates that the quality of that future is far from certain
