The Psychopolitics of Food Mihalís Mentinis, 2016-06-10 The Psychopolitics of Food probes into the contemporary foodscape examining culinary practices and food habits and in particular the ways in which they conflate with neoliberal political economy It suggests that generic alimentary and culinary practices constitute technologies of the self and the body and argues that the contemporary preoccupation with food takes the form of rites of passage that express and mark the transition from a specific stage of neoliberal development to another vis à vis a re configuration of the alimentary and sexual regimes Even though these rites of passage are taking place on the borders of cultural bi polarities their function nevertheless is precisely to define these borders as sites of a neoliberal transitional demand that is to produce a cultural bifurcation between eating orders and eating dis orders by promoting and naturalising certain social logics while

simultaneously rendering others as abject and anachronistic The book is a worthwhile read for researchers and advanced scholars in the areas of food studies critical psychology anthropology and sociology **Positive Psychoanalysis** Mark Leffert, 2017-01-20 Psychoanalysis and Psychotherapy have in one way or another focused on the amelioration of the negative This has only done half the job the other half being to actively bring Positive Experience into patients lives Positive Psychoanalysis moves away from this traditional focus on negative experience and problems and instead looks at what makes for a positive life experience bringing a new clinical piece to what psychoanalysts do Positive Psychoanalysis and the interdisciplinary theory and research behind it The envelope of functions entailed in Positive Psychoanalysis is an area of Being described as Subjective Well Being This book identifies three particular areas of function encompassed by SWB Personal Meaning Aesthetics and Desire Mark Leffert looks at the importance of these factors in our positive experiences in everyday life and how they are manifested in clinical psychoanalytic work These domains of Being form the basis of chapters each comprising an interdisciplinary discussion integrating many strands of research and argument Leffert discusses how the areas interact with each other and how they come to bear on the care healing and cure that are the usual subjects of psychoanalytic treatment He also explores how they can be represented in contemporary psychoanalytic theory This novel work discusses and integrates research findings phenomenology and psychoanalytic thought that have not yet been considered together It seeks to inform readers about these subjects and demonstrates with clinical examples how to incorporate them into their clinical work with the negative helping patients not just to heal the negative but also move into essential positive aspects of living a sense of personal meaning aesthetic competence and becoming a desiring being that experiences Subjective Well Being Drawing on ideas from across neuroscience philosophy and social and culture studies this book sets out a new agenda for covering the positive in psychoanalysis Positive Psychoanalysis will appeal to psychoanalysts and psychotherapists neuroscientists and philosophers as well as academics across these fields and in psychiatry comparative literature and literature and the mind **Autobiographical Jews** Michael Stanislawski, 2012-09-20

Autobiographical Jews examines the nature of autobiographical writing by Jews from antiquity to the present and the ways in which such writings can legitimately be used as sources for Jewish history Drawing on current literary theory which questions the very nature of autobiographical writing and its relationship to what we normally designate as the truth and to a lesser extent the new cognitive neurosciences Michael Stanislawski analyzes a number of crucial and complex autobiographical texts written by Jews through the ages Stanislawski considers The Life by first century historian Josephus compares the early modern autobiographies of Asher of Reichshofen Book of Memories and Glikl of Hameln Memoirs analyzes the radically different autobiographies of two Russian Jewish writers the Hebrew Enlightenment author Moshe Leib Lilienblum and the famous Russian poet Osip Mandelstam and looks at two autobiographies written out of utter despair in the midst and in the wake of World War II Stefan Zweig s The World of Yesterday and Sarah Kofman s Rue Ordener Rue

Labat These writers attempts to portray their private and public struggles anxieties successes and failures are expressions of a basic drive for selfhood which is both timeless and time bound universal and culturally specific The challenge is to attempt to unravel the conscious from the unconscious distortions in these texts and to regard them as artifacts of individuals quests to make sense of their lives first and foremost for themselves and then if possible for their readers **Creative Arts**

and community context Individual chapters address both clinical methods and a variety of clinical problems including work with very young children and their parents severe deprivation and family breakdown developmental delay and the more serious psychological illnesses of childhood Assessment in Child Psychotherapy is a significant contribution to all mental health professionals who need to be able to identify the precise nature of a child adolescent or family s problems and to offer the most appropriate help Such a book is long overdue It spans a range of thinking about how best to reach those whose emotional and behavioural difficulties pose challenging questions as to the most suitable forms of treatment *Therapeutic Practice in Schools Volume Two The Contemporary Adolescent* Lyn French,Reva Klein,2014-07-17 In common with *Therapeutic Practice in Schools Working with the Child Within* Routledge 2012 this second volume serves as a practical handbook for school based counsellors psychotherapists arts therapists and play therapists working with young people Written in accessible language it is eminently applicable to the practice of both qualified and trainee therapists *Therapeutic Practice in Schools The Contemporary Adolescent* begins with an overview of key psychoanalytic ideas informing our understanding of adolescence before moving on to focus on life circumstances and issues which commonly bring young people to the therapist s consulting room in the school Dedicated chapters on key themes including identity relationships sex and sexuality anger issues self harm bereavement and bullying aim to deepen our understanding of the adolescent experience while also providing the therapist with invaluable insights into what one might say in the here and now of the session Chapter authors all with considerable experience in the field discuss approaches to sustaining the therapeutic relationship in the face of ambivalence or defiant resistance as well as thinking about the impact of social media on all aspects of adolescent development The advantages and limitations of working with adolescents in the educational setting where school staff will have their own reasons for referring students for therapy while the young people themselves might come with a very different agenda are also covered It is widely acknowledged that engaging troubled or troublesome adolescents in therapy can make an enormous difference to their lives This book ensures that both trainee and qualified therapists are supported in the often daunting yet ever stimulating and enlivening task of working with young people in the school setting Entering an Online Support Group on Eating Disorders Wyke Stommel,2009 Online support groups are considered highly valuable in addition to traditional health care services but we know very little about how people actually join such a group This book offers a microanalysis of an online support group on eating disorders specifically the communication through textual messages between newcomers and regular members and members nicknames The study uses an ethnomethodological and conversation analytical approach to show that members of online support groups treat the group as a community in which their illness identity is highly relevant It appears that members invoke community norms regarding legitimacy for newcomers Newcomers are expected to admit that they are ill but this is a very difficult step for those who have not yet fully adopted the sick role Parsons 1951 In the field of eating disorders it is particularly difficult for people that

tend to promote the glamorization of eating disorders The insecurity and anxiety that newcomers display as they enter the online group could probably be relieved when a special entry subforum would be installed in which they can take time and space to actually recognize that they are ill
