Westfahl explains Clarke's science fiction offered original perspectives on subjects like new inventions space travel humanity's destiny alien encounters the undersea world and religion While not inclined to mysticism Clarke necessarily employed mystical language to describe the fantastic achievements of advanced aliens and future humans Westfahl also contradicts the common perception that Clarke's characters were bland and underdeveloped arguing that these reticent solitary individuals who avoid conventional relationships represent his most significant prediction of the future as they embody the increasingly common lifestyle of people in the twenty first century
