Daily Life of U.S. Soldiers Christopher R. Mortenson,Paul J. Springer,2019-06-14 This

ground breaking work explores the lives of average soldiers from the American Revolution through the 21st century conflicts in Afghanistan and Iraq What was life really like for U S soldiers during America s wars Were they conscripted or did they volunteer What did they eat wear believe think and do for fun Most important how did they deal with the rigors of combat and coming home This comprehensive book will answer all of those questions and much more with separate chapters on the American Revolution the War of 1812 the Mexican American War the Civil War the Indian Wars the Spanish American War World War I World War II in Europe World War II in the Pacific the Cold War the Korean War the Vietnam War the Persian Gulf War the Afghanistan War and War on Terror and the Iraq War Each chapter includes such topical sections as Conscription and Volunteers Training Religion Pop Culture Weaponry Combat Special Forces Prisoners of War Homefront and Veteran Issues This work also examines the role of minorities and women in each conflict as well as delves into the disciplinary problems in the military including alcoholism drugs crimes and desertion Selected primary sources bibliographies and timelines complement the topical sections of each chapter **Armoured Warfare** Alaric

Searle,2017-02-09 This book charts the history of armoured warfare from the first use of the tank in 1916 right through to the 21st century adopting military political and global perspectives Alaric Searle explores the origins of the tank the part it played in the First World War and its contribution to the outcome of the war He considers its role as a tool of propaganda the military controversies of the interwar period and the employment of armoured forces in all the major theatres in the Second World War Since the First World War major and medium sized powers have invested heavily in armoured forces Searle looks at the conduct of mechanised warfare in Korea Indo China and Vietnam and during conflicts such as the Arab Israeli Wars and the Gulf Wars Armoured Warfare adopts a global perspective providing the most comprehensive survey of the history of the subject currently available With a detailed bibliography of both primary and secondary sources it is an ideal companion for those studying armoured warfare modern military history and war studies US Battle Tanks 1946-2025 Steven J.

Zaloga,2024-11-07 A comprehensive and detailed illustrated examination of the development and combat performance of US battle tanks from the end of World War II through to the present day In this the second of two highly illustrated volumes telling the full history of the design development and operational use of US Army and US Marine Corps battle tanks Steven J Zaloga takes the story from the end of World War II through the US Soviet rivalry of the Cold War period right up to the latest developments in American armored technology US Battle Tanks 1946 2025 draws and expands on material published

in Osprey's New Vanguard and Duel series to explain how the US Army attempted to come to grips with the challenges of the nuclear battlefield and examines the introduction of new tank designs such as the famous Patton tank series as well as short lived attempts to develop more radical tanks such as the T95. It covers the overly ambitious and failed MBT 70 tank program and the more austere M1 Abrams that followed a tank that proved to be the best US tank design of the post World War II period and one that is still in service today. Published in association with the AUSA Book Program offering quality books about US Army heritage military theory and policy and security in the modern world. *Tanks at the Iron Curtain 1960-75* Steven J. Zaloga, 2022-07-21. A new analysis of the technology and tanks that faced off against each other on opposite sides of the Iron Curtain during the very height of the Cold War. From the 1960s onwards there was a generational shift in tank design and warfare with the advent of CBR chemical biological radiological protection and a move away from HEAT ammunition to APFSDS. This shift confronted the growing threat of guided anti tank missiles and saw the introduction of composite armor. Soviet heavy tanks and tank destroyer assault guns became obsolete giving way to the technological might of the T 62 and T 64 while NATO forces employed the Chieftain AMX 30 Leopard I and M60 plus the initial attempt at a common US German tank the MBT 70. Using detailed illustrations and contemporary photographs this companion volume to NVG 301 *Tanks at the Iron Curtain 1946-60* focuses on key battle tanks and their technology to give a comprehensive overall picture of how tanks developed during modern times. **Tanks at the Iron Curtain 1946-60** Steven J. Zaloga, 2021-11-25. A study of the Soviet and NATO armored forces that faced each other off in Central Europe in the early Cold War and how their technology tactics and doctrine were all rapidly developed. For 45 years the most disputed point in the World was the dividing line between East and West in Europe here the use and development of tanks was key. In this fully illustrated study author Steve Zaloga describes how Soviet and NATO tanks were deployed in the early years of the Cold War and how a generation of tanks such as the Soviet T 44 T 54 and IS 3 British Centurion US Army M26 M46 Pershing all developed during World War II saw extensive service after the war had ended. Initial post war generation tanks including the Soviet T 54A T 10 heavy tank British late model Centurions Conqueror US Army M41 M47 M48 and the French AMX 13 are examined in detail alongside the most important technical trends of the era the development of shaped charge anti tank projectiles the influence of anti tank missiles and the introduction of chemical nuclear protection and night fighting equipment. The book also considers the influence of post war doctrine and tactics on tank technology and the effect of regional conflicts such as the 1950 Korean War the war in Indo China and the 1956 Mid East War on tank warfare. **The Bradley and How It Got That Way** W. Blair Haworth, 1999-11-30. The mechanized infantry is one of the least studied components of the U S Army's combat arms and its most visible piece of equipment the Bradley Fighting Vehicle is one of the military's most controversial pieces of equipment. This study traces the idea of mechanized infantry from its roots in the early armored operations of World War I through its fruition in World War II to its drastic transformation in response to the threat of a nuclear biological and chemical

battlefield The U S Army s doctrinal migration from the idea of specialized armored infantry to that of more generalized mechanized infantry led to problematic consequences in training and equipping the force Haworth explores the origins conduct and outcome of the Bradley controversy along with its implications for Army institutional cultures force designs and doctrines Challenging traditional partisan views of the Bradley program Haworth goes to the roots of the issue The author details the mechanized infantry s problematic status in the Army s traditional division of roles and missions between its Infantry and Armored branches While new conditions demand new equipment old institutions and current commitments inevitably complicate matters thus traditional infantry considerations have driven the Bradley s requirements The raw capability of the vehicle and the fortitude and ingenuity of its users have to some extent compensated for the conflicting pressures in its design However the reluctance of the Army to see mechanized infantry as a specialty has led to the problem the vehicle has faced as this book clearly shows *Army* ,1982 *Armed Forces* ,1982 *Early US Armor* Steven J. Zaloga,2018-02-22 The first American armoured cars began to emerge around the turn of the century seeing their first military use in 1916 during the Punitive Expedition against Pancho Villa When the United States entered World War I the American Expeditionary Forces used some armoured cars in France and American armoured cars were used by the French Army The inter war years saw considerable innovation and experimentation in armoured car design Of the 1930s scout car designs the M3A1 scout car was good enough to be produced in very large numbers in World War II and was widely exported to many other armies via Lend Lease It also served as the basis for the late M2 and M3 armoured half tracks In this study using detailed full colour plates and rigorous analysis US armour expert Steven J Zaloga chronicles the development of the US armoured car in the years leading up to World War II *Air University Review* ,1983 **The Army Quarterly and Defence Journal** ,1984 **Quarterly Review of Military Literature** ,1982 **Armored Forces** Robert M. Citino,1994-10-21 This volume analyzes the development of tanks and traces their history from the British attack at Cambrai in 1917 during World War I through the AirLand Battle of Operation Desert Storm in 1991 This text gives a short history of the rise and development of armored warfare in the 20th century an assessment of the significant literature on tank doctrine and an evaluation of the role of prominent commanders theoreticians and tacticians A chronology of important dates and pictures depicting major changes in tanks across the years enrich this teaching tool and reference guide for teachers and students of military history history buffs and professional soldiers
