McCluskey, 2020-10-07 Are there legitimate arguments to prevent families from choosing the education that works best for their children Opponents of school choice have certainly offered many objections but for decades they have mainly repeated myths either because they did not know any better or perhaps to protect the government schooling monopoly In these pages 14 of the top scholars in education policy debunk a dozen of the most pernicious myths including school choice siphons money from public schools choice harms children left behind in public schools school choice has racist origins and choice only helps the rich get richer As the contributors demonstrate even arguments against school choice that seem to make powerful intuitive sense fall apart under scrutiny There are frankly no compelling arguments against funding students directly instead of public school systems School Choice Myths shatters the mythology standing in the way of education freedom
