Grotzinger, 2012-08-31 On March 21 1990 Sam Nujoma was sworn in as the first president of independent Namibia This ceremony marked the end of a struggle that lasted more than two decades and a period of colonialism that lasted more than a century Finally after decades long wars over grazing in the 19th century genocidal colonial suppression by Germany at the beginning of the 20th century repressive apartheid racialism throughout the 20th century and a prolonged armed liberation struggle Namibians had the chance to choose their own leaders develop a democratic political process in a free society and to bring economic development and greater equity to their country The Historical Dictionary of Namibia covers the history of Namibia through a chronology an introductory essay appendixes and an extensive bibliography The dictionary section has several hundred cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent access point for students researchers and anyone wanting to know more about Namibia

**Understanding Namibia** Henning Melber, 2015-01-04 Since independence in 1990 Namibia has witnessed only one generation with no memory of colonialism the born frees who voted in the 2009 elections The anti colonial liberation movement SWAPO dominates the political scene effectively making Namibia a de facto one party state dominated by the first struggle generation While those in power declare their support for a free fair and just society the limits to liberation are such that emancipation from foreign rule has only been partially achieved Despite its natural resources Namibia is among the world's most unequal societies and indicators of wellbeing have not markedly improved for many among the former colonized majority despite a constitution enshrining human rights social equality and individual liberty This book analyses the transformation of Namibian society since Independence Melber explores the achievements and failures and contrasts the narrative of a post colonial patriotic history with the socio economic and political realities of the nation building project He also investigates whether notwithstanding the relative stability prevailing to date the negotiation of controlled change during Namibia's decolonization could have achieved more than simply a change of those in control

**The Department of Labor's ... Findings on the Worst Forms of Child Labor**, 2004

African Industrial Development and European Union Co-operation Francis Matambalya, 2014-08-27 Of the 54 African states only South Africa is categorised by the United Nations Industrial Development Organization UNIDO amongst industrialised countries The economic activities in Africa are still dominated by the production and trade of agricultural and mineral commodities This situation is in spite of the longstanding Africa European Union EU co operation which intends among other things to support Africa's industrialisation endeavours Imperatively a long road to substantive levels of industrialisation still lies ahead of most African countries This raises the

question as to what role the international community could and should play in the twenty first century to provide the support needed to expedite Africa's industrial transformation This book argues that to supplement the initiatives of each African country international partnerships of both a North South and South South nature will serve better purposes if they are leveraged to develop productive capacities in African economies In order to enable the African countries to leverage their traditional partnership with the EU for industrialisation a paradigm shift is obligatory A feasible model should emulate the Japanese led flying geese model and the Chinese led bamboo capitalism model

**Security and Democracy in Southern Africa** Gavin Cawthra, André Du Pisani, Abillah H. Omari, 2007 A study of the ambiguity of democratization and how it can generate violence Southern Africa has embarked on one of the world's most ambitious security co operation initiatives seeking to roll out the principles of the United Nations at regional levels This book examines the triangular relationship between democratization the character of democracy and its deficits and national security practices and perceptions of eleven southern African states Based on national studies conducted by African academics and security practitioners over three years it includes an examination of the way security is conceived and managed as well as a comparative analysis of regional security co operation in the developing world The study concludes that democratization is ambiguous and uncertain and can in some cases generate violent conflict Building a common security regime in southern Africa will require moving beyond regime solidarity In particular progress will mean building multinational institutions entrenching democratic practices drawing on civil society and integrating the southern African project with that of the African Union The authors conclude with a set of policy recommendations that aim to strengthen both states and civil society within the framework of an emerging common security system

The Department of Labor's 2002 Findings on the Worst Forms of Child Labor, 2003 „Little Research Value.“ Ellen Ndeshi Namhila, 2017-12-14 Ellen Ndeshi Namhila is intrigued by the question Why can the National Archives of Namibia respond to genealogical enquiries of Whites in a matter of minutes with finding estate records of deceased persons while similar requests from Blacks cannot be served Not satisfied with the sweeping statement that this is the result of colonialism and apartheid she follows the track of so called Native estates through legislation record creation and dispersal records management and administrative neglect authorised and unauthorised destruction transfer and appraisal selective processing and almost final amnesia Eventually she discovers over 11 000 forgotten surviving African estate records but also evidence for the destruction of many others And she demonstrates the potential of these records to interpret the lives of those who otherwise appear in history only as statistics records which were condemned to destruction by colonial archivists stating they had little research value and no functional value This study of memory against forgetting is a call to post colonial archives to re visit their holdings and the systemic colonial bias that continues to haunt them This is the revised version of Ellen Namhila
