Hirschmann,2009-01-10 This book reconsiders the dominant Western understandings of freedom through the lens of women s real life experiences of domestic violence welfare and Islamic veiling Nancy Hirschmann argues that the typical approach to freedom found in political philosophy severely reduces the concept s complexity which is more fully revealed by taking such practical issues into account Hirschmann begins by arguing that the dominant Western understanding of freedom does not provide a conceptual vocabulary for accurately characterizing women s experiences Often free choice is assumed when women are in fact coerced as when a battered woman who stays with her abuser out of fear or economic necessity is said to

make this choice because it must not be so bad and coercion is assumed when free choices are made such as when Westerners assume that all veiled women are oppressed even though many Islamic women view veiling as an important symbol of cultural identity Understanding the contexts in which choices arise and are made is central to understanding that freedom is socially constructed through systems of power such as patriarchy capitalism and race privilege Social norms practices and language set the conditions within which choices are made determine what options are available and shape our individual subjectivity desires and self understandings Attending to the ways in which contexts construct us as subjects of liberty Hirschmann argues provides a firmer empirical and theoretical footing for understanding what freedom means and entails politically intellectually and socially

Califia Women Clark A. Pomerleau, 2013-12-01 Launched in 1975 the Califia Community organized activist educational camps and other programs in southern California until its dissolution in 1987 An alternative to

mainstream academia's attempts to tie feminism to university courses. Califia blended aspects of feminism that spanned the labels second wave and radical, attracting women from a range of gender expressions, sexual orientations, class backgrounds, and races or ethnicities. Califia Women captures the history of the organization through oral history interviews, archives, and other forms of primary research. The result is a lens for re-reading trends in feminist and social justice activism of the time period, contextualized against a growing conservative backlash. Throughout each chapter, readers learn about the triumphs and frictions feminists encountered as they attempted to build on the achievements of the postwar Civil Rights movement. With its backdrop of southern California, the book emphasizes a region that has often been overlooked in studies of East Coast or San Francisco Bay area activism. Califia Women also counters the notions that radical and lesbian feminists were unwilling to address intersectional identities generally and that they withdrew from political activism after 1975. Instead, the Califia Community shows evidence that these and other feminists intentionally created an educational forum that embraced oppositional consciousness and sought to serve a variety of women, including radical Christian reformers, Wiccans, scholars of color, and GLBT activists.

The authors draw upon clinical examples and research from the IPV programs in their own organization, as well as external research, to provide a comprehensive overview. Chapters span topics that include definitions of IPV, its history, relevant issues within the LGBTQ community, the unique facets of LGBTQ IPV, and its assessment and diagnosis. Case examples indicate how an assessment should be carried out and how to develop appropriate and effective interventions and treatment plans. This book will empower clinicians to assess for and treat LGBTQ IPV whenever and wherever they encounter
