Narcissism and Intimacy Marion Fried Solomon, 1989 Divided into two parts the first examines overall issues of narcissism in society families and individual lives part two focuses on repairing relationships that are damaged by issues of narcissistic vulnerability Annotation copyrighted by Book News Inc Portland OR **Narcissism and Intimacy** Marion F. Solomon, Marion Fried Solomon, 1992 In our culture we demand a great deal from our intimate relationships and we are often disappointed This book not only reveals the social and psychological factors that lead to marital unhappiness but also offers guidelines for change Solomon starts by uncovering certain pervasive narcissistic myths and exploring what it means to be intimate in a culture that values autonomy and self fulfillment above all She shows that experiences in early childhood can lead to narcissistic vulnerability in later relationships Case examples from her practice clarify how two individuals feeling states and defenses mesh in the marital system and how the attempt to defend against emotional injury creates barriers to intimacy The second part of the book focuses on treatment and on ways to change **Constructing Social Theory** David C. Bell, 2009 Constructing Social Theory discusses the nature of social theory and theoretical orientations Organized by forty three theoretical orientations in seven domains exchange power adaptation reinforcement social bond altruism functionalism and identity the text includes a tutorial on how to identify an appropriate theoretical orientation and create a theory given a particular research question Bell separates the theoretical orientation of causal logic from theory itself illuminating the mechanisms of scientific revolutions where new theoretical orientations are created and the procedures of normal science in which theories are developed using the logic of existing theoretical orientations **Virginia Satir** Barbara Jo Brothers, 1991 Virginia Satir an internationally renowned educator and master therapist and a pioneer in the field of family therapy altered the way therapists are taught and patients are treated This landmark volume focuses on the important contributions that she made to the therapy profession Written and edited by therapists who trained and worked closely with her Virginia Satir Foundational Ideas reflects her most basic ideas about the healing quality of respect for all people and the emphasis on the personal aspects of treatment rather than the technical It also addresses the necessity of emotional honesty between the therapist and the patient and illustrates these therapists impact on therapy as it is practiced today It is necessary reading for all professionals around the world who seek to better understand the therapy process and the keys to its success

The Dynamics of Connection David C. Bell, 2012-07-10 The Dynamics of Connection How Evolution and Biology Create Caregiving and Attachment describes the logic of giving love trust and nurturance Bowlby's theory of attachment provides an excellent starting point for an explanation of nurturance but there are some limitations in this theory especially its tendency to minimize the caregiving side of the relationship The book builds on and extends Bowlby's theory by examining the evolutionary evidence for both attachment and caregiving the origins of which can be seen in the earliest mammals It describes neurobiological research that has identified the brain circuits that underlie caregiving and attachment The book then describes a theory of relationships based on these neurobiological circuits and the resulting human desire to give and receive emotional contact warmth and support The theory details the emotional logic of this relationship process The proactive connection process caregiving characteristic of parents involves a growing capacity for both empathy and responsibility In the receptive process attachment trust grows from the experience of being cared for and nurtured These processes coexist alongside other motivations with which they interact The Dynamics of Connection introduces a view of the dyadic social psychology of connection that underlies both parent child and close adult relationships It provides a description and explanation of parental and adult nurturance It gives a long needed account of the origins of social norms of parenting While building on the foundation of attachment theory David Bell brings together new insights from both evolutionary theory and neurobiology to deepen our understanding of caregiving and attachment
