Narcotic Culture A History Of Drugs In China:

Narcotic Culture Frank Dikötter, Lars Peter Laamann, Xun Zhou, 2004 China was turned into a nation of opium addicts by the pernicious forces of imperialist trade This study systematically questions this assertion on the basis of abundant archives from China Europe and the US showing that opium had few harmful effects on either health or longevity

Narcotic Culture Frank Dikötter, Lars Laamann, Zhou Xun, 2006-10 *The Oxford Handbook of Global Drug History* Paul Gootenberg, 2022 This landmark collection of essays by thirty five historians working on a global scale brings together the latest knowledge and perspectives about the long origins and transformations of today's illicit drugs such as cannabis heroin and cocaine

Opium's Orphans P. E. Caquet, 2022-07-06 Upending all we know about the war on drugs a history of the anti narcotics movement's origins evolution and questionable effectiveness *Opium's Orphans* is the first full history of drug prohibition and the war on drugs A no holds barred but balanced account it shows that drug suppression was born of historical accident not rational design The war on drugs did not originate in Europe or the United States and even less with President Nixon but in China Two Opium Wars followed by Western attempts to atone for them gave birth to an anti narcotics order that has come to span the globe But has the war on drugs succeeded As opioid deaths and cartel violence run rampant contestation becomes more vocal and marijuana is slated for legalization *Opium's Orphans* proposes that it is time to go back to the drawing board

Narcotic Culture Frank Dikötter, Xun Zhou, Lars Peter Laamann, 2002 **Histories of Drug Trafficking in Twentieth-Century Mexico** Wil G. Pansters, Benjamin T. Smith, 2024-11-15 This work brings together a new generation of drug historians and new historical sources to uncover the history of the drug trade and its regulations While the US and Mexican governments developed anti drug discourses and policies which criminalized both high profile traffickers and small time addicts these authorities also employed the criminals and cash connected to the drug trade to pursue more pressing political concerns The politics socioeconomic relations and criminal justice system of modern Mexico have been shaped by these public and covert policies as well as by subnational histories of drug production and trafficking The essays in this study explore this complicated narrative and provide insight into Mexico's history and the wider contemporary global drug trade

Chinese Stories of Drug Addiction Guy Ramsay, 2015-12-22 Addiction to illicit drugs is a pressing social concern across greater China where there are likely several million drug addicts at present This research breaks new ground by examining Chinese people's stories of drug addiction *Chinese Stories of Drug Addiction* systematically evaluates how drug addiction is represented and constructed in a series of contemporary life stories and filmic stories from mainland China Taiwan and Hong Kong These stories recount experiences leading up to and during drug addiction as well as experiences during drug rehabilitation and recovery Through analysis of these contemporary life stories and filmic stories the book presents a comprehensive picture of how Chinese people from both inside the experience of drug addiction and outside of it make sense of a social practice that is deemed to be highly transgressive in Chinese culture It employs a blended discourse

analytic and narrative analytic approach to show how salient cultural political and institutional discourses shape these Chinese stories and experiences Complementing existing humanities research which documents the historical narrative of drug addiction in China at the expense of the contemporary narrative the book also provides health and allied professionals with a rich insight into how Chinese people from different geographical locations and walks of life make sense of the experience of drug addiction Moving beyond historical narrative to examine contemporary stories Chinese Stories of Drug Addiction offers a valuable contribution to the fields of Chinese studies and personal health and wellbeing as well as being of practical use to health professionals

Drugs, Alcohol and Addiction in the Long Nineteenth Century Daniel Malleck, 2020-01-24 This collection captures key themes and issues in the broad history of addiction and vice in the Anglo American world Focusing on the long nineteenth century the volumes consider how scientific social and cultural experiences with drugs alcohol addiction gambling and prostitution varied around the world What might be considered vice or addiction could be interpreted in various ways through various lenses and such activities were interpreted differently depending upon the observer the medical practitioner the evangelical missionary the thrill seeking bon vivant and the concerned government commissioner to name but a few For example opium addiction in middle class households resulting from medical treatment was judged much differently than Chinese opium smoking by those in poverty or poor living conditions in North American work camps on the west coast or on the streets of Soho This collection will assemble key documents representing both the official and general view of these various activities providing readers with a cross section of interpretations and a solid grounding in the material that shaped policy change cultural interpretation and social action [Handbook of Christianity in China](#)

Gary Tiedemann, 2009-12-02 This second volume on Christianity in China covers the period from 1800 onwards up to the present divided into three main periods and dealing with the complexities of both Catholic and Protestant aspects Also in this volume the reader will be guided to and through the Chinese and Western primary and secondary sources by carefully selected major scholars in the field Produced with financial support from the Ricci Institute at the University of San Francisco Center for the Pacific Rim

Encyclopedia of Drug Policy Mark A. R. Kleiman, James E. Hawdon, 2011-01-12 Request a free 30 day online trial to this title at www.sagepub.com/freetrial Spanning two volumes of approximately 450 entries in an A to Z format this encyclopedia explores the controversial drug war through the lens of varied disciplines A full spectrum of articles explains topics from Colombian cartels and Mexican kingpins to television reportage from just say no advertising to heroin production and from narco terrorism to more than 500 billion in U S government expenditures Key Themes Cases Conferences and Conventions Countries Affecting U S Drug Policy Drug Trade and Trafficking Laws and Policies Organizations and Agencies People Presidential Administrations Treatment and Addiction Types of Drugs *Drug smuggler nation* Stephen Snelders, 2021-02-09 Why did the international drug regulatory regime of the twentieth century fail to stop an explosive increase in trade and consumption of illegal drugs This study investigates the histories of smugglers and

criminal entrepreneurs in the Netherlands who succeeded in turning the country into the so called Colombia of Europe or the international drug supermarket Increasing state regulations and interventions led to the proliferation of a hydra of small anarchic groups and networks ideally suited to circumvent the enforcement of regulation Networks of smugglers and suppliers of heroin cocaine cannabis XTC and other drugs were organized without a strict formal hierarchy and based on personal relations and cultural affinities rather than on institutional arrangements These networks created a thriving underground industry of illegal synthetic drug laboratories and indoor cannabis cultivation in the Netherlands itself Their operations were made possible and developed because of the deep historical social and cultural embeddedness of criminal anarchy in Dutch society Using examples from the rich history of drug smuggling Drug smuggler nation investigates the deeper and hidden grounds of the illegal drug trade and its effects on our drug policies **Opium** Pierre-Arnaud Chouvy, 2010-03 Bitter brownish and sticky opium the sap of the opium poppy *Papaver somniferum* has been cultivated from the earliest of times *The Compelling Ideal* Jan Kiely, 2014-05-27 In this groundbreaking volume based on extensive research in Chinese archives and libraries Jan Kiely explores the pre Communist origins of the process of systematic thought reform or reformation *ganhua* that evolved into a key component of Mao Zedong's revolutionary restructuring of Chinese society Focusing on *ganhua* as it was employed in China's prison system Kiely's thought provoking work brings the history of this critical phenomenon to life through the stories of individuals who conceptualized implemented and experienced it and he details how these techniques were subsequently adapted for broader social and political use Early Encounters between East Asia and Europe Ralf Hertel, Michael Keevak, 2017-07-14 While inquiries into early encounters between East Asia and the West have traditionally focused on successful interactions this collection inquires into the many forms of failure experienced on all sides in the period before 1850 Countering a tendency in scholarship to overlook unsuccessful encounters it starts from the assumption that failures can prove highly illuminating and provide valuable insights into both the specific shapes and limitations of East Asian and Western imaginations of the Other as well as of the nature of East West interaction Interdisciplinary in outlook this collection brings together the perspectives of sinology Japanese and Korean studies historical studies literary studies art history religious studies and performance studies The subjects discussed are manifold and range from missionary accounts travel reports letters and trade documents to fictional texts as well as material objects such as tea chinaware or nautical instruments exchanged between East and West In order to avoid a Eurocentric perspective the collection balances approaches from the fields of English literature Spanish studies Neo Latin studies and art history with those of sinology Japanese studies and Korean studies It includes an introduction mapping out the field of failures in early modern encounters between East Asia and Europe as well as a theoretically minded essay on the lessons of failure and the ethics of cross cultural understanding **Making China Modern** Klaus Mühlhahn, 2019-01-14 Klaus Mühlhahn situates modern China in the nation's long dynamic tradition of overcoming adversity and weakness through creative adaptation a

legacy of crisis and recovery that is apparent today in China's triumphs but also in its most worrisome trends. M. Hahn's panoramic survey rewrites the history of modern China for a new generation. *China's Provinces and Populations* Eric Croddy, 2022-11-23 This manual provides an overview of China's administrative geography history and populations of all 31 provinces as well as Hong Kong Macao and Taiwan. It focuses primarily on how the provinces came to be how they were named as well as their people and populations throughout history. In addition to extensive use of bilingual names Chinese English for specificity this resource is unique in the datasets contained therein 1 Up to date residential populations of mainland China using the latest decennial 2020 census and 2 political administrative registered household hukou data based on official numbers provided by People's Republic of China PRC Ministry of Public Security showing trends from 2012 2020. Each internally consistent but differing in their methodologies whereby the Census decennial data provide a snapshot of how many people live in a given location and the permanent hukou registered household data track each individual based on their hometown household urban rural status and nationality. This book addresses this chasm which among other issues points to the phenomenon of China's floating populations where millions of Chinese spend much if not all of their time living working and studying outside their home provinces. By showing how the Chinese have been populated and their organization throughout history this manual is the go to place for professionals practitioners and academics working and interested in China's provinces and populations. Cannabis Nation James H. Mills, 2013 Based on extensive archival research and interviews with key figures this text provides a comprehensive history of the consumption and control of cannabis in the UK.

Ritual and Music of North China Stephen Jones, 2016-12-05 This second volume of Stephen Jones' work on ritual and musical life in north China again with accompanying downloadable resources gives an impression of music making in daily life in the poor mountainous region of Shaanbei northwest China. It conveys some of the diverse musical activities there around 2000 from the barrage of pop music blaring from speakers in the bustling county towns to the life cycle and calendrical ceremonies of poor mountain villages. Based on the practice of grass roots music making in daily life not merely on official images the main theme is the painful maintenance of ritual and its music under Maoism its revival with the market reforms of the 1980s and its modification under the assaults of TV pop music and migration since the 1990s. The text is in four parts. Part One gives background to the area and music making in society. Parts Two and Three discuss the lives of bards and shawm bands respectively describing modifications in their ceremonial activities through the twentieth century. Part Four acclimatizes us to the modern world with glimpses of various types of musical life in Yulin city the regional capital illustrating the contrast with the surrounding countryside. The 44 minute downloadable resources with its informative commentary is intended both to illuminate the text and to stand on its own. It shows bards performing at a temple fair and to bless a family in distress and shawm bands performing at a wedding at funerals and a shop opening including their pop repertory with the big band. Also featuring as part of these events are opera troupes geomancers and performing beggars by

contrast the film shows a glimpse of the official image of Shaanbei culture as presented by a state ensemble in the regional capital The publication will appeal to ethnomusicologists anthropologists and all those interested in modern Chinese history and society *Development of Modern Chinese Foreign Policy Thought* Ivica Bakota,Zvonimir Stopić,Mato

Njavro,2024-11-15 This book presents a comprehensive exploration of China s foreign policy evolution from the early twentieth century to the contemporary era The intricate interplay between the People s Republic of China the Chinese Communist Party CCP and the global stage is meticulously traced offering a nuanced understanding of China s dynamic engagement with the world With a detailed analysis spanning eight chapters the book delves into the contextual factors that influenced CCP s initial foreign policy ideas prior to the establishment of the People s Republic It systematically unravels the gradual development of these ideas during the Cold War era and unveils the fundamental and adaptive trajectories that have shaped China s foreign policy landscape over the past three decades Utilizing primary sources and academic texts the book incorporates both Chinese and global perspectives to shed new light on the evolution of Chinese foreign policy thought making it an invaluable contribution to the study of China s global interactions The authors uniquely bridge the gap between different stages of China s foreign policy development across a centennial timeframe offering an organic perspective on its growth and their comprehensive analysis of China s foreign policy toolset adds a distinctive dimension to existing knowledge By steering clear of preconceived notions the book delivers a well rounded analysis of China s foreign policy evolution

Military Force and Elite Power in the Formation of Modern China Edward A. McCord,2014-01-21 The China we know today emerged at the end of a long period of internal rebellions civil wars foreign invasions and revolutionary insurrections that stretched across the nineteenth century to the mid point of the twentieth This book explores one important consequence of this situation the increased role of military force in the determination of elite social political and economic power and presents fascinating case studies of the warlords militia leaders and military officers who benefited from this Examining the intersection of military force and elite power in the formative years of modern Chinese history this book highlights just how important military force was to elite power in nineteenth and early twentieth century China in a context of frequent warfare and political turmoil It shows that the way in which military empowerment unfolded and who exactly was empowered depended heavily on shifting military and political conditions and each case confirms the extent to which military force emerged as a consistently significant determinant of elite power across this period Indeed the transformative effect of military force on social and political structures of power revealed by these studies sheds distinctive light on the prevalence and wide ranging impact of military conflicts in this period In turn these studies also provide a particular perspective on the fluid boundaries of as well as the constraints on elite power in Chinese society in a time of intense social and political change This book makes an important contribution to our understanding of the rise of modern China and provides a keen insight into impact of war on the country as such it will be welcomed by students and scholars interested in Chinese history Asian history

and military history more broadly
