**NASA's First Space Shuttle Astronaut Selection** David J. Shayler, Colin Burgess, 2020-07-10 Unofficially they called themselves the TFNG or the Thirty Five New Guys Officially they were NASA's Group 8 astronauts selected in January 1978 to train for orbital missions aboard the Space Shuttle Prior to this time only pilots or scientists trained as pilots had been assigned to fly on America's spacecraft but with the advent of the innovative winged spacecraft the door was finally opened to non pilots including women and minorities In all 15 of those selected were categorised as Pilot Astronauts while the other 20 would train under the new designation of Mission Specialist Altogether the Group 8 astronauts would be launched on a total of 103 space missions some flying only once while others flew into orbit as many as five times Sadly four of their number would perish in the Challenger tragedy in January 1986 In their latest collaborative effort the authors bring to life the amazing story behind the selection of the first group of Space Shuttle astronauts examining their varied backgrounds and many accomplishments in a fresh and accessible way through deep research and revealing interviews Throughout its remarkable 30 year history as the workhorse of NASA's human spaceflight exploration twice halted through tragedy the Shuttle fleet performed with magnificence So too did these 35 men and women swept up in the dynamic thrust and ongoing development of America's Space Shuttle program This book on the Group 8 Astronauts the TFNGs is an excellent summation of the individuals first selected for the new Space Shuttle Program It provides insight into what it took to first get the Space Shuttle flying For any space enthusiast it is a must read Robert L Crippen PLT on STS 1 As a reader I had many moments where long lost memories of the triumph and tragedy of the space shuttle program were brilliantly reawakened at the turn of a page Loved it This is a must have book for every space enthusiast's library TFNG Mission Specialist Astronaut Richard Mike Mullane author of *Riding Rockets The Outrageous Tales of a Space Shuttle Astronaut* Many of the anecdotes in the book brought back memories of challenges opportunities and a team of men and women who were committed not just to the

space program but to one another I've gone back to it several times as a reference source TFNG Steve Hawley 5 time Space Shuttle Mission Specialist Astronaut The TFNG book is incredible and amazingly thorough The detail in the book is awesome It is my go to book for any of the details I've forgotten TFNG Dr Rhea Seddon 3 time Space Shuttle Mission Specialist Astronaut I can't believe how detailed and complete it is FANTASTIC work TFNG Robert L Hoot Gibson 5 time Space Shuttle Pilot Commander and former Chief of the NASA Astronaut Office

Shuttle during the December flight and the first assembled element of the ISS was in place Construction will continue with the delivery of components and assembly on orbit through a series of 46 planned flights During the study period the Assembly Complete milestone was scheduled for November 2004 with the final ISS construction flight delivering the U S Habitation Module Engineering Challenges to the Long Term Operation of the International Space Station is a study of the engineering challenges posed by longterm operation of the ISS This report states that the National Aeronautics and Space Administration NASA and the ISS developers have focused almost totally on completing the design and development of the station and completing its assembly in orbit This report addresses the issues and opportunities related to long term operations

**Future Biotechnology Research on the International Space Station** National Research Council, Commission on Physical Sciences, Mathematics, and Applications, Space Studies Board, Task Group for the Evaluation of NASA's Biotechnology Facility for the International Space Station, 2000-04-14 Under current NASA plans investigations in the area of biotechnology will be a significant component of the life sciences research to be conducted on the International Space Station ISS They encompass work on cell science and studies of the use of microgravity to grow high quality protein crystals Both these subdisciplines are advancing rapidly in terrestrial laboratories fueled by federal and industrial research budgets that dwarf those of NASA's life science program Forging strong and fruitful connections between the space investigations and laboratory bench biologists a continual challenge for NASA's life sciences program is thus of great importance to ensuring the excellence of ISS research This report evaluates the plan for NASA's biotechnology facility on the ISS and the scientific context that surrounds it and makes recommendations on how the facility can be made more effective In addition to questions about optimizing the instrumentation the report addresses strategies for enhancing the scientific impact and improving the outreach to mainstream terrestrial biology No major redirection of effort is called for but collectively the specific targeted changes recommended by the task group would have a major effect on the conduct of biotechnology research in space
