Chinese Regions in Change Hong Yu,2015-02-20 This book offers extensive and

quality research on and original insights into China's internal regional dynamics. It provides a focused analysis of the internal dynamics and regional economic diversity of China covering the eastern, central and western regions through case study, data analysis and review of state initiated policy measures. The book also identifies and analyses existing and potential challenges facing China's regions in their pursuit of sustainable development. Different regions in China have attempted to achieve fast economic growth and move up the industrial value chain through industrial restructuring and upgrading, inter regional industrial transfer, urbanization or seeking central government's endorsement of new regional policies. The book examines the difference and similarities among local government policies to boost regional industrial and economic growth and assesses their implications and effectiveness. The author had conducted detailed studies in this field in order to bridge the existing research gap and the book will help to give rise to useful and illuminating discussion. **Intelligent Machinery** Ian Benson, 1986-04-10 Self sufficiency in advanced computer science is fast becoming a major strategic resource. This book focuses on the medium and long term directions in software research stimulated by national programmes in America, Japan and Europe. In it leading academic and industrial researchers explore the state of the art in knowledge based systems, software technology and the applications of artificial intelligence in business. The description of the prospects for technical advance within the emerging infrastructure for pre competitive research is essential reading for computer scientists involved in formulating the agenda for collaboration. It will also be invaluable to all those concerned with economic and social development who wish to make informed interventions in the processes of conception, evaluation and implementation of these programmes. Technological Change & Labour Relations Muneto Ozaki, 1992 A study which looks at the reciprocal influence of technological change and labour relations and includes case studies from six industrialized market economy countries as well as a comparative chapter. The book focuses on the introduction of microelectronic technology in machinery, manufacturing, banking and printing to examine how workers participated in the changeover and how labour relations in the enterprises studied were affected by the new technology. **Science, Technology and Governance** John De la Mothe, 2001 This anthology examines *Love's Labour's Lost* from a variety of perspectives and through a wide range of materials. Selections discuss the play in terms of historical context, dating and sources, character analysis, comic elements and verbal conceits, evidence of authorship, performance analysis and feminist interpretations. Alongside theater reviews, production photographs and critical commentary, the volume also includes essays written by practicing theater artists who have worked on the play. An index by name, literary work and concept rounds out this valuable resource. Science, Technology and Global Governance John R. De La Mothe, 2014-04-23 Science, technology and innovation have long been key factors in the competitive advantage of nations. Today, however, the new international political economy is being increasingly driven by science and technology in new ways. Integration, globalization and internationalization have all become watchwords for a series of dynamic processes in which science and technology are deeply implicated. As a result, not only are the policies of

national governments being exposed in terms of the limits of their sovereignty but science and technology are being increasingly implicated in a wide array of public issues ranging from security privacy development and economic growth to employment environment foreign policy and geopolitics Clearly in today s emerging world the ways in which governments organize their science and technology policy their science and technology intelligence and their research advisory structures and resources matter more today than ever before In turn the contract between science and democracy is being rapidly redefined This book is the first to comprehensively discuss these critical issues

Business Process Change Varun Grover, William J. Kettinger, 1995-01-01 Examines a broad range of research and case studies that throws light on potential social and human factors which determine the success of information technology

Transforming Organizations Thomas A. Kochan, Michael Useem, 1992 This book examines how organizations can and should transform their practices to compete in a world economy Research results from a multi disciplinary team of MIT researchers along with the experiences and insights of a select group of industry practitioners are integrated into a model that stresses the need for systemic and transformative rather than piecemeal or incremental changes in organization practices and public policy This integration of research and experience results in an argument for a new organizational learning model one capable of gaining advantage from employee diversity cooperation across organizational boundaries strategic restructuring and advanced technology The book begins with a foreword by Lester C Thurow

Technological Change, Rationalisation and Industrial Relations Otto Jacobi, Bob Jessop, Hans Kastendiek, Marino Regini, 2017-07-06 Originally published in 1986 the first part of this book outlines some of the general problems of technological change and labour relations It discusses the politics of rationalisation and of industrialisation in the car industry by examining case studies of Volkswagen British Leyland and FIAT The impact developments exert on trade unions in the UK Germany and Italy is discussed simultaneously

Inequality and Industrial Change James K. Galbraith, Maureen Berner, 2001-04-09 The world knows that there is a global crisis of inequality in pay But what caused it Where is it more and where less severe What can be done This book deploys new techniques and a new global data set to advance striking answers to these questions answers that have eluded even the largest international research institutions such as the OECD and the World Bank Chapters trace the U S wage structure back to 1920 the relationship of inequality and unemployment in Europe and the relationships of inequality to economic growth liberalization financial crisis state violence and industrial policy in more than fifty developing countries

National Systems of Innovation Bengt-Åke Lundvall, 2010 National Systems of Innovation presents a new perspective on the dynamics of the national and the global economy Its starting point is that the international competitiveness of nations is founded on innovation This book is an invaluable reference document for all those working in economics

Global Competition and Local Networks Rod B. McNaughton, 2018-02-06 This title was first published in 2002 The interest in becoming globally competitive through network strategies particularly networks between small and medium sized firms in local business communities is high among
