Next Generation Lives Of Third World Children:

Childhoods in South Asia Deepak Kumar Behera, 2007 This unique two part volume focuses on extensive ethnographic examination of the lived experience of children in the political culture and economic contexts of the countries in South Asia Part I present ethnographic studies of childhood experience **Abandoned Children** Catherine Panter-Brick, Malcolm T. Smith, 2000-08-03 This book is a collection on abandoned children illustrating the need to contextualise their position in particular cultural situations *A Companion to the Anthropology of Africa* Roy Richard Grinker, Stephen C. Lubkemann, Christopher B. Steiner, Euclides Gonçalves, 2018-11-09 An essential collection of scholarly essays on the anthropology of Africa offering a thorough introduction to the most important topics in this evolving and diverse field of study The study of the cultures of Africa has been central to the methodological and theoretical development of anthropology as a discipline since the late 19th century As the anthropology of Africa has emerged as a distinct field of study anthropologists working in this tradition have strived to build a disciplinary conversation that recognizes the diversity and complexity of modern and ancient African cultures while acknowledging the effects of historical anthropology on the present and future of the field of study *A Companion to the Anthropology of Africa* is a collection of insightful essays covering the key questions and subjects in the contemporary anthropology of Africa with a key focus on addressing the topics that define the contemporary discipline Written and edited by a team of leading cultural anthropologists it is an ideal introduction to the most important topics in the field both those that have consistently been a part of the critical dialogue and those that have emerged as the central questions of the discipline s future Beginning with essays on the enduring topics in the study of African cultures *A Companion to the Anthropology of Africa* provides a foundation in the contemporary critical approach to subjects of longstanding interest With these subjects as a groundwork later essays address decolonization the postcolonial experience and questions of modern identity and definition providing representation of the diverse thinking and scholarship in the modern anthropology of Africa *Rights of the Child* Brian Milne, 2015-06-30 This work reviews the progress of children s rights 25 years since the adoption of the UN Convention on the Rights of the Child It studies the progress of that human rights instrument as part of an ongoing process It examines how recent past present and future generations will benefit or suffer as part of the process in which outcomes cannot be predicted It does not project into the future Its emphasis is on a review of the period after 1989 and it comments on what has happened and offering guidance on how children s rights might progress The book presents a realistic but not always critical review of two and a half decades of intensive activity in the field of children s rights worldwide It includes both failures and examples of good practice and positive experiences It offers a review of progress and lack of progress in child rights and welfare in the twelve countries used as case studies in its predecessor *The Next Generation* Finally the volume considers the impact of current geopolitical and economic realities on children s rights in the early years of the twenty first century The book is a tribute to Judith Ennew and pays homage to all of

the people who have contributed so much to children's rights over the years and wishes to encourage others to take up the cause

The Political Economy of New Slavery Christien van den Anker, 2003-12-18 This unique volume combines chapters containing a multidisciplinary academic analysis of the causes of the continued existence of contemporary forms of slavery such as globalization poverty and migration with empirical chapters on trafficking domestic migrant workers bonded labour and child labour in Asia Latin America and Africa It provides relevant policy recommendations such as respect for victims rights and assesses longer term strategies for change including Fair Trade reparations for slavery in the past the Tobin tax and Development ethics

African Potentials B Ohta, 2022-03-23 This book challenges colonial and age old Western academic views that have dominated and marginalised African indigenous knowledge system It spreads further the wings of knowledge and endeavour about an African way of thinking on conflict resolution and co existence and analytically connects this to the pursuit of Africa's sustainable development frameworks Ohta Nyamnjoh and Matsuda are teachers you always wished for but never had Together they have made this book a path breaking one and essential reading for a broad based understanding of the African mindset

Handbook of Children's Rights Martin D. Ruck, Michele Peterson-Badali, Michael Freeman, 2016-12-08 While the notion of young people as individuals worthy or capable of having rights is of relatively recent origin over the past several decades there has been a substantial increase in both social and political commitment to children's rights as well as a tendency to grant young people some of the rights that were typically accorded only to adults In addition there has been a noticeable shift in orientation from a focus on children's protection and provision to an emphasis on children's participation and self determination With contributions from a wide range of international scholars the Handbook of Children's Rights brings together research theory and practice from diverse perspectives on children's rights This volume constitutes a comprehensive treatment of critical perspectives concerning children's rights in their various forms Its contributions address some of the major scholarly tensions and policy debates comprising the current discourse on children's rights including the best interests of the child evolving capacities of the child states rights versus children's rights rights of children versus parental or family rights children as citizens children's rights versus children's responsibilities and balancing protection and participation In addition to its multidisciplinary focus the handbook includes perspectives from social science domains in which children's rights scholarship has evolved largely independently due to distinct and seemingly competing assumptions and disciplinary approaches e.g childhood studies developmental psychology sociology of childhood anthropology and political science The handbook also brings together diverse methodological approaches to the study of children's rights including both quantitative and qualitative perspectives and policy analysis This comprehensive cosmopolitan and timely volume serves as an important reference for both scholarly and policy driven interest in the voices and perspectives of children and youth
