Radford,2016-11-06 Excerpt from Radford's Cyclopedie of Construction Carpentry Building and Architecture Vol 6 of 12 A General Reference Work on Modern Building Materials and Methods and Their Practical Application to All Forms of Construction in Wood Stone Brick Steel and Concrete The keynote of the Cyclopedie is found in the emphasis constantly laid on the practical as distinguished from the theoretical form of treatment in its total avoidance of the complicated formulas of higher mathematics and in its reduction of all technical subjects to terms of the simplest and clearest English Throughout the pages devoted to Steel Construction for example the mathematics of the subject have been eliminated to such an extent that the reader will not find a single instance where even a square root sign has been used In addition to the larger problems of engineering and building construction one entire volume as well as many chapters scattered through the work is devoted to those smaller constructions that are of special interest to the teacher or student of manual training or the home shop worker of a mechanical turn of mind About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **American Builder ,1921**      *Radford's Cyclopedie of Construction; Carpentry, Building and Architecture.
