enablers of new technologies and we trust that this new edition of Comprehensive Nuclear Materials has captured the key recent developments Critically reviews the major classes and functions of materials supporting the selection assessment validation and engineering of materials in extreme nuclear environments Comprehensive resource for up to date and authoritative information which is not always available elsewhere even in journals Provides an in depth treatment of materials modeling and simulation with a specific focus on nuclear issues Serves as an excellent entry point for students and researchers new to the field

Irradiation Embrittlement of Reactor Pressure Vessels (RPVs) in Nuclear Power Plants Naoki Soneda,2014-09-01 Reactor Pressure Vessels RPVs contain the fuel and therefore the reaction at the heart of nuclear power plants They are a life determining structural component if they suffer serious damage the continued operation of the plant is in jeopardy This book critically reviews irradiation embrittlement the main degradation mechanism affecting RPV steels and mitigation routes for managing the RPV lifetime Part I reviews RPV design and fabrication in different countries with an emphasis on the materials required their important properties and manufacturing technologies Part II then considers RVP embrittlement in operational nuclear power plants using different reactors Chapters are devoted to embrittlement in light water reactors including WWER type reactors and Magnox reactors Finally Part III presents techniques for studying embrittlement including irradiation simulation techniques microstructural characterisation

techniques and probabilistic fracture mechanics Irradiation Embrittlement of Reactor Pressure Vessels RPVs in Nuclear Power Plants provides a thorough review of an issue that is central to the safety of nuclear power generation The book includes contributions from an international team of experts and will be a useful resource for nuclear plant operators and managers relevant regulatory and safety bodies nuclear metallurgists and other academics in this field Discusses reactor pressure vessel RPV design and the effect irradiation embrittlement can have the main degradation mechanism affecting RPVs Examines embrittlement processes in RPVs in different reactor types as well as techniques for studying RPV embrittlement
