The Hidden Structure of Violence Marc Pilisuk, Jennifer Achord Rountree, 2015-07-17 Acts of violence assume many forms they may travel by the arc of a guided missile or in the language of an economic policy and they may leave behind a smoldering village or a starved child The all pervasiveness of violence makes it seem like an unavoidable and ultimately incomprehensible aspect of the modern world But in this detailed and expansive book Marc Pilisuk and Jen Rountree demonstrate otherwise Widespread violence they argue is in fact an expression of the underlying social order and whether it is carried out by military forces or by patterns of investment the aim is to strengthen that order for the benefit of the powerful **The Hidden Structure of Violence** marshals vast amounts of evidence to examine the costs of direct violence including military preparedness and the social reverberations of war alongside the costs of structural violence expressed as poverty and chronic illness It also documents the relatively small number of people and corporations responsible for facilitating the violent status quo whether by setting the range of permissible discussion or benefiting directly as financiers and manufacturers The result is a stunning indictment of our violent world and a powerful critique of the ways through which violence is reproduced on a daily basis whether at the highest levels of the state or in the deepest recesses of the mind

Proceedings of the 15th International Conference on Man-Machine-Environment System Engineering Shengzhao Long, Balbir S. Dhillon, 2015-09-05. This research topic was first established in China by Professor ShengZhao Long in 1981 with direct support from one of the greatest modern Chinese scientists, XueSen Qian. In a letter to ShengZhao Long from October 22nd 1993, XueSen Qian wrote: "You have created a very important modern science subject and technology in China. MMESE primarily focuses on the relationship between Man, Machine, and Environment, studying the optimum combination of man-machine-environment systems. In this system, Man refers to working people as the subject in the workplace, e.g., operators, decision makers; Machine is the general name for any object controlled by Man, including tools, machinery, computers, systems, and technologies; and Environment describes the specific working conditions under which Man and Machine interact, e.g., temperature, noise, vibration, hazardous gases, etc. The three goals of optimization are to ensure safety, efficiency, and economy. These proceedings are an academic showcase of the best papers selected from more than 400 submissions, introducing readers to the top research topics and the latest developmental trends in the theory and application of MMESE. These proceedings are interdisciplinary studies on the concepts and methods of physiology, psychology, system engineering, computer science, environment science, management, education, and other related disciplines. Researchers and professionals who study an interdisciplinary subject crossing above disciplines, or researchers on MMESE subject, will be mainly benefited from these proceedings."

Screen Enemies of the American Way Fraser A. Sherman, 2014-01-10. American films like *America itself* have long been fascinated by the threat of outsiders posing as citizens to destroy the American way of life. This book tracks real world fears appearing in the movies: Nazi agents, Japanese American spies, Communist Party subversives, Islamic sleeper cells, as well as the science fiction threats that play to the same fears, such as alien body snatchers and android doppelgangers. The work also examines fears inspired by World War I German spies, the Japanese American internment, and the McCarthyite witch hunts, and shows how these issues and others played out on screen.
