Research and Technology Christopher H. Sommers, Xueting Fan, 2008-02-28 The benefits of food irradiation to the public health have been described extensively by organizations such as the Centers for Disease Control and Prevention in the U S and the World Health Organization The American Medical Association and the American Dietetic Association have both endorsed the irradiation process Yet the potential health benefits of irradiation are unknown to many consumers and food industry representatives who are wary of irradiated foods due to myth information from consumer advocate groups Food Irradiation Research and Technology presents the latest scientific findings of researchers at the leading edge of food irradiation In this book experts from industry government and academia define the basic principles of irradiation and the public health benefits of irradiation describe advances in irradiation technology detection technology and radiation dosimetry review the regulations pertaining to food irradiation and the toxicological safety data provide food industry representatives and public health officials with effective methodologies to educate consumers and counteract misinformation review recent advances in the irradiation of meat and poultry fruits and vegetables seafood and the use of irradiation as a phytosanitary treatment Food Irradiation Research and Technology appeals to a broad readership industry food scientists involved in the processing of meat and fish fruits and vegetables food microbiologists and radiation processing specialists government and industry representatives involved in the import and export of food commodities and industry local and state officials involved in educational efforts regarding food irradiation Food scientists and technologists share a responsibility to ensure that educational materials provided to the public regarding food safety and processing technologies are based on sound science and fact not on misconceptions Food Irradiation Research and Technology meets that goal **Food Irradiation** R. A. Molins, 2001-05-24 In 1997 the FDA approved the use of low dose ionizing radiation to eliminate pathogens in red meat This food processing technology can improve the safety of food and extend the shelf life of certain foods by eliminating pathogenic bacteria parasites and other microorganisms that cause food borne disease Currently forty two countries practice some form of food irradiation Food Irradiation Principles and Applications provides a comprehensive up to date account of food irradiation principles effects applications and limitations including global regulatory issues and the economics of food irradiation Written by an international panel of scientists this book focuses on science and technology and offers thorough coverage of the current use of food irradiation around the world The contributors in this book present irradiation as a truly critical control point for raw solid foods of animal origin Food Irradiation Principles and Applications discusses such topics as Radiation inactivation of microorganisms Disinfestation of stored grains pulses dried fruits and nuts Irradiation as a quarantine treatment Irradiation of meat and poultry fish and shellfish fruits and vegetables and tuber and bulb crops
