## Radical Science Essays:

**Radical Science Essays** Les Levidow, 1986      **Science, Faith, Society: New Essays on the Philosophy of Michael Polanyi** Péter Hartl, 2024-04-03 The book is arguably the first comprehensive collection of essays on Michael Polanyi's social political philosophy. The essays combine philosophical and historical approaches to show Polanyi's social thought in the context of his epistemology and philosophy of science as well as the 20th century intellectual history. This volume appeals to specialists in Michael Polanyi's philosophy, political philosophers who are interested in the 20th century political thought, mainly conservative liberal political tradition. Furthermore, it appeals to scholars focusing on the intersections between epistemology and political philosophy.      *Science In China, 1600-1900: Essays* By Benjamin A Elman Benjamin A Elman, 2015-05-07 Distinguished historian Benjamin A Elman's collective volume on the history of science in imperial China brings together over 30 years of historical literature on the subject. With updates to the literature and new material including transcripts of podcasts and translated interview articles, *Science in China* takes the reader on a journey starting in the early 17th century with the missionary efforts of the Jesuits in China and ending with the Protestant missions in the 19th century. These two milestone encounters brought Western sciences to local Chinese scholars with great success in shaping modern Chinese science. Elman studies the interaction between Western and Chinese sciences through philological research and evidence and treats the two encounters not as separate events but as a continuum of creative exchange of scientific knowledge and discourse.      *Landmark Essays on Rhetoric of Science: Issues and Methods* Randy Allen Harris, 2024-11-01 *Landmark Essays in Rhetoric of Science: Issues and Methods* compiles the essential readings of the vibrant field of rhetoric of science, tracing the growth and core concerns of the field since its development in the 1970s. A companion to Randy Allen Harris's foundational *Landmark Essays in Rhetoric of Science: Case Studies*, this volume includes essays by such luminaries as Carolyn R Miller, Jeanne Fahnestock, and Alan G Gross, along with an early prophetic article by Charles Sanders Pierce. Harris's detailed introduction puts the field into its social and intellectual context and frames the important contributions of each essay, which range from reimagining classical concepts like rhetorical figures and topical invention to Modal Materialism and the Neomodern hybridization of Actor Network Theory with Genre Studies. Race, revolution, and Daoism come up along the way, and the empirical recalcitrance of the moon. This collection serves as a textbook for graduate and advanced undergraduate courses in science studies and is an invaluable resource for researchers concerned with science not as a special, autonomous, sacrosanct enterprise but as a set of value-saturated, profoundly influential rhetorical practices.      *Companion to the History of Modern Science* G.N. Cantor, G.N. Cantor, J.R.R. Christie, M.J.S. Hodge, R.C. Olby, 2020-10-07 The 67 chapters of this book describe and analyse the development of Western science from 1500 to the present day. Divided into two major sections, *The Study of the History of Science* and *Selected Writings in the History of Science*, the volume describes the methods and problems of research in the field and then applies these techniques to a wide range of fields. Areas

covered include the Copernican Revolution Genetics Science and Imperialism the History of Anthropology Science and Religion Magic and Science The companion is an indispensable resource for students and professionals in History Philosophy Sociology and the Sciences as well as the History of Science It will also appeal to the general reader interested in an introduction to the subject *The Scientific World-Perspective and Other Essays, 1931-1963* J. Giedymin, 2012-12-06

Though with considerable delay most of the writings of Polish logicians of the inter war period are now available in English This is not yet true of Polish philosophy In the present volume English speaking readers will find for the first time a sizeable collection of the articles of one of the most original and distinguished of Poland's philosophers of the present century Kazimierz Ajdukiewicz 1890-1963 To be sure Ajdukiewicz was a philosopher logician from the beginning of his career His first work of some importance a monograph entitled *From the Methodology of the Deductive Sciences* 1921 post dated two abstracts published in 1919-20 exhibited two features which were to become characteristic of the style of his later philosophy On the one hand the monograph was the result of Ajdukiewicz's deep interest in the systems of modern logic the foundations of mathematics in the properties of deductive systems and their relevance to philosophy on the other hand the monograph was an attempt at developing an understanding methodology in the sense of Gennap Versteherende Methodologie of deductive sciences i.e. a pragmatic study of axiomatic systems which would supplement purely formal investigations of those systems The former made him a close ally of logical empiricists the latter was rooted in the hermeneutic tradition of the second half of the 19th century Dilthey which spilled over into the 20th century Spranger and which was not cherished at all by logical empiricists *The "Racial" Economy of Science* Sandra Harding, 1993-10-22 The classic and recent essays gathered here will challenge scholars in the natural sciences philosophy sociology anthropology and women's studies to examine the role of racism in the construction and application of the sciences Harding has also created a useful text for diverse classroom settings Library Journal A rich lode of readily accessible thought on the nature and practice of science in society Highly recommended Choice This is an excellent collection of essays that should prove useful in a wide range of STS courses Science Technology and Society important and provocative The Women's Review of Books The timeliness and utility of this large interdisciplinary reader on the relation of Western science to other cultures and to world history can hardly be overemphasized It provides a tremendous resource for teaching and for research Ethics Excellent The Reader's Review Sandra Harding is an intellectually fearless scholar She has assembled a bold impressive collection of essays to make a volume of illuminating power This brilliantly edited book is essential reading for all who seek understanding of the multicultural debates of our age Never has a book been more timely Darlene Clark Hine These authors dispute science's legitimization of culturally approved definitions of race difference including craniology and the measurement of IQ the notorious Tuskegee syphilis experiments and the dependence of Third World research on First World agendas **Toward a Democratic Science** Richard Harvey Brown, 1998-01-01 In this important book a leading authority in the field of social

theory and communication shows how science is a rhetorical and narrative activity a story well told Richard Harvey Brown argues that expert knowledge is a form of power and explains how a narrative view of science can integrate science within a democratic civic discourse as in the movement for environmental justice in the United States *Social Change and Conservation* Krishna B. Ghimire, Michael P. Pimbert, 2013-12-02 Protected areas and conservation policies are usually established with only local nature and wildlife in mind Yet they can have far reaching consequences for local populations often undermining their access to resources and their livelihoods This book is the first comprehensive discussion of the social consequences of protected area schemes and conservation policies Drawing on case studies from North America Europe Asia Central America and Africa it critically reviews current trends in protected area management and shows how local people have been affected in terms of their customary rights livelihoods wellbeing and social cohesion The loss of secure livelihoods ultimately threatens conservation as poverty and environmental degradation intensify in and around protected areas The leading authorities who have contributed to this ground breaking volume argue for a thorough overhaul of conservation thinking and practice *Social Change and Conservation* Kléber Bertrand Ghimire, Michel P. Pimbert, 1997 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company Clearcutting the Pacific Rain Forest Richard A. Rajala, 2011-11-01 This book integrates class environmental and political analysis to uncover the history of clearcutting in the Douglas fir forests of B C Washington and Oregon between 1880 and 1965 Part I focuses on the mode of production analyzing the technological and managerial structures of worker and resource exploitation from the perspective of current trends in labour process research Rajala argues that operators sought to neutralize the variable forest environment by emulating the factory model of work organization The introduction of steam powered overhead logging methods provided industry with a rudimentary factory regime by 1930 accompanied by productivity gains and diminished workplace autonomy for loggers After a Depression inspired turn to selective logging with caterpillar tractors timber capital continued its refinement of clearcutting technologies in the post war period achieving complete mechanization of yarding with the automatic grapple Driving this process of innovation was a concept of industrial efficiency that responded to changing environmental conditions product and labour markets but sought to advance operators class interests by routinizing production The managerial component of the factory regime took shape in accordance with the principles of the early 20th century scientific management movement Requiring expertise in the organization of an expanded technologically sophisticated exploitation process operators presided over the establishment of logging engineering programs in the region s universities Graduates introduced rational planning procedures to coastal logging contributing to a rate of deforestation that generated a corporate call for technical forestry expertise after 1930 Industrial foresters then emerged from the universities to provide firms with data needed for long range investment decisions in land acquisition and management Part II constitutes an environmental and political history of clearcutting This reconstructs the process of scientific research concerning the

factory regime's impact on the ecology of the Douglas fir forest assessing how knowledge was utilized in the regulation of cutting practices Analysis of business government relations in British Columbia Washington and Oregon suggests that the reliance of those client states on revenues generated by timber capital encouraged a pattern of regulation that served corporate rather than social and ecological ends

**Other Women** Anita Levy, 2014-07-14 In this ambitious work Anita Levy exposes certain forms of middle class power that have been taken for granted as common sense and laws of nature Joining an emergent tradition of cultural historians who draw on Gramsci and Foucault she shows how middle class hegemony in the nineteenth century depended on notions of gender to legitimize a culture specific and class specific definition of the right and wrong ways of being human The author examines not only domestic fiction particularly Emily Brontë's *Wuthering Heights* but also nineteenth century works of the human sciences including sociological tracts anthropological treatises medical texts and psychological studies She finds that British intellectuals of the period produced gendered standards of behavior that did not so much subordinate women to men as they authorized the social class whose women met norms of appropriate behavior this class was considered to be peculiarly fit to care for other social and cultural groups whose women were improperly gendered When Levy reads fiction against the social sciences she demonstrates that the history of fiction cannot be understood apart from the history of the human sciences Both fiction and science share common narrative strategies for representing the essential female and other women the prostitute the primitive and the madwoman Only fiction however represented these strategies in an idiom of everyday life that verified theory and science Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Sustainable Development M. R. Redclift, 1987 Argues that environmental problems need to be looked at internationally in terms of the global economic system and that the degradation of the environment is not natural but an historical process linked to economics and politics
